|  |     |
|--|-----|
| <b>Preface</b>                                   | vii |
| <b>1 Submersions, Foliations, and Metrics</b>    |     |
| 1.1 Notation and basic geometric concepts        | 1   |
| 1.2 Metric foliations and Riemannian submersions | 5   |
| 1.3 Horizontal lifts and transversal holonomy    | 10  |
| 1.4 The fundamental tensors of a submersion      | 14  |
| 1.5 Curvature relations                          | 24  |
| 1.6 Projectable Jacobi fields                    | 32  |
| 1.7 The Riccati equation for Jacobi fields       | 35  |
| 1.8 The dual foliation                           | 40  |
| 1.9 Basic identities                             | 44  |
| <b>2 Basic Constructions and Examples</b>        |     |
| 2.1 General vertical warping                     | 45  |
| 2.1.1 The connection                             | 45  |
| 2.1.2 The curvature tensor                       | 47  |
| 2.1.3 The sectional curvatures                   | 52  |
| 2.1.4 The Ricci curvature                        | 53  |
| 2.2 Warped products                              | 56  |
| 2.3 Homogeneous submersions                      | 63  |
| 2.4 Left-invariant metrics on Lie groups         | 72  |
| 2.5 The Aloff-Wallach examples                   | 82  |
| 2.6 Bi-quotients of Lie groups                   | 87  |
| 2.6.1 The Gromoll-Meyer exotic sphere            | 88  |
| 2.6.2 The seven-dimensional Eschenburg examples  | 90  |
| 2.7 Associated bundles                           | 92  |
| 2.8 Fat bundles                                  | 103 |

|          |   |     |
|----------|---|-----|
| <b>3</b> | <b>Open Manifolds of Nonnegative Curvature</b>            |     |
| 3.1      | Convex sets in Riemannian manifolds . . . . .             | 109 |
| 3.2      | The soul construction . . . . .                           | 113 |
| 3.3      | The topological structure of $M$ . . . . .                | 120 |
| 3.4      | The Sharafutdinov retraction . . . . .                    | 122 |
| 3.5      | The metric projection onto the soul . . . . .             | 126 |
| 3.6      | The metric structure of bundles with $K \geq 0$ . . . . . | 130 |
| <b>4</b> | <b>Metric Foliations in Space Forms</b>                   |     |
| 4.1      | Isoparametric foliations . . . . .                        | 135 |
| 4.2      | Metric fibrations of Euclidean space . . . . .            | 140 |
| 4.3      | Metric foliations of spheres . . . . .                    | 149 |
| 4.4      | Geometry of the tangent bundle . . . . .                  | 157 |
| 4.5      | Compact space forms of nonpositive curvature . . . . .    | 161 |
|          | <b>Bibliography</b> . . . . .                             | 165 |
|          | <b>Index</b> . . . . .                                    | 173 |
