Introduction	xiii
------------------------	------

Part I Preliminaries

1 Set Theory	
1.1 Axioms of Set Theory	3
1.2 Ordered sets	5
1.3 Ordinal numbers	6
1.4 Sets of ordinal numbers	8
1.5 Cardinality of ordinal numbers	10
1.6 Transfinite induction	12
1.7 The Zermelo theorem	14
1.8 Lemma of Kuratowski-Zorn	15
2 Topology	
2.1 Category	19
2.2 Baire property	23
2.3 Borel sets	25
2.4 The space \mathfrak{z}	28
2.5 Analytic sets	32
2.6 Operation A	35
2.7 Theorem of Marczewski	37
2.8 Cantor-Bendixson theorem	39
2.9 Theorem of S. Piccard	42
3 Measure Theory	
3.1 Outer and inner measure	47
3.2 Linear transforms	54
3.3 Saturated non-measurable sets	56
3.4 Lusin sets	59
3.5 Outer density	61
3.6 Some lemmas	63

3.7	Theorem of Steinhaus	67
3.8	Non-measurable sets	71
4	Algebra	
4.1	Linear independence and dependence	75
4.2	Bases	78
4.3	Homomorphisms	83
4.4	Cones	87
4.5	Groups and semigroups	89
4.6	Partitions of groups	95
4.7	Rings and fields	98
4.8	Algebraic independence and dependence	101
4.9	Algebraic and transcendental elements	103
4.10	Algebraic bases	105
4.11	Simple extensions of fields	106
4.12	Isomorphism of fields and rings	108
	Part II Cauchy's Functional Equation and Jensen's Inequality	
5	Additive Functions and Convex Functions	
5.1	Convex sets	117
5.2	Additive functions	128
5.3	Convex functions	130
5.4	Homogeneity fields	137
5.5	Additive functions on product spaces	138
5.6	Additive functions on \mathbb{C}	139
6	Elementary Properties of Convex Functions	
6.1	Convex functions on rational lines	143
6.2	Local boundedness of convex functions	148
6.3	The lower hull of a convex functions	150
6.4	Theorem of Bernstein-Doetsch	155
7	Continuous Convex Functions	
7.1	The basic theorem	161
7.2	Compositions and inverses	162
7.3	Differences quotients	164
7.4	Differentiation	168
7.5	Differential conditions of convexity	171
7.6	Functions of several variables	174
7.7	Derivatives of a function	177
7.8	Derivatives of convex functions	180
7.9	Differentiability of convex functions	188
7.10	Sequences of convex functions	192

8 Inequalities

8.1	Jensen inequality	197
8.2	Jensen-Steffensen inequalities	201
8.3	Inequalities for means	208
8.4	Hardy-Littlewood-Pólya majorization principle	211
8.5	Lim's inequality	214
8.6	Hadamard inequality	215
8.7	Petrović inequality	217
8.8	Mulholland's inequality	218
8.9	The general inequality of convexity	223

9 Boundedness and Continuity of Convex Functions and Additive Functions

9.1	The classes $\mathfrak{A}, \mathfrak{B}, \mathfrak{C}$	227
9.2	Conservative operations	229
9.3	Simple conditions	231
9.4	Measurability of convex functions	241
9.5	Plane curves	242
9.6	Skew curves	244
9.7	Boundedness below	246
9.8	Restrictions of convex functions and additive functions	251

10 The Classes $\mathfrak{A}, \mathfrak{B}, \mathfrak{C}$

10.1	A Hahn-Banach theorem	257
10.2	The class \mathfrak{B}	260
10.3	The class \mathfrak{C}	266
10.4	The class \mathfrak{A}	267
10.5	Set-theoretic operations	269
10.6	The classes \mathfrak{D}	271
10.7	The classes \mathfrak{A}_C and \mathfrak{B}_C	276

11 Properties of Hamel Bases

11.1	General properties	281
11.2	Measure	282
11.3	Topological properties	285
11.4	Burstin bases	285
11.5	Erdős sets	288
11.6	Lusin sets	294
11.7	Perfect sets	299
11.8	The operations R and U	301

12 Further Properties of Additive Functions and Convex Functions	
12.1 Graphs	305
12.2 Additive functions	308
12.3 Convex functions	313
12.4 Big graph	316
12.5 Invertible additive functions	322
12.6 Level sets	327
12.7 Partitions	330
12.8 Monotonicity	335
 Part III Related Topics	
13 Related Equations	
13.1 The remaining Cauchy equations	343
13.2 Jensen equation	351
13.3 Pexider equations	355
13.4 Multiadditive functions	363
13.5 Cauchy equation on an interval	367
13.6 The restricted Cauchy equation	369
13.7 Hosszú equation	374
13.8 Mikusiński equation	376
13.9 An alternative equation	380
13.10 The general linear equation	382
14 Derivations and Automorphisms	
14.1 Derivations	391
14.2 Extensions of derivations	394
14.3 Relations between additive functions	399
14.4 Automorphisms of \mathbb{R}	402
14.5 Automorphisms of \mathbb{C}	403
14.6 Non-trivial endomorphisms of \mathbb{C}	406
15 Convex Functions of Higher Orders	
15.1 The difference operator	415
15.2 Divided differences	421
15.3 Convex functions of higher order	429
15.4 Local boundedness of p -convex functions	432
15.5 Operation H	435
15.6 Continuous p -convex functions	439
15.7 Continuous p -convex functions. Case $N = 1$	442
15.8 Differentiability of p -convex functions	444
15.9 Polynomial functions	446

16 Subadditive Functions	
16.1 General properties	455
16.2 Boundedness. Continuity	458
16.3 Differentiability	465
16.4 Sublinear functions	471
16.5 Norm	473
16.6 Infinitary subadditive functions	475
17 Nearly Additive Functions and Nearly Convex Functions	
17.1 Approximately additive functions	483
17.2 Approximately multiadditive functions	485
17.3 Functions with bounded differences	486
17.4 Approximately convex functions	490
17.5 Set ideals	498
17.6 Almost additive functions	505
17.7 Almost polynomial functions	510
17.8 Almost convex functions	515
17.9 Almost subadditive functions	524
18 Extensions of Homomorphisms	
18.1 Commutative divisible groups	535
18.2 The simplest case of S generating X	537
18.3 A generalization	540
18.4 Further extension theorems	546
18.5 Cauchy equation on a cylinder	551
18.6 Cauchy nucleus	556
18.7 Theorem of Ger	560
18.8 Inverse additive functions	564
18.9 Concluding remarks	569
Bibliography	571
Indices	
Index of Symbols	587
Subject Index	589
Index of Names	593

An Introduction to the Theory of Functional Equations
and Inequalities

Cauchy's Equation and Jensen's Inequality

Kuczma, M. - Gilányi, A. (Ed.)

2009, XIV, 595 p., Softcover

ISBN: 978-3-7643-8748-8

A product of Birkhäuser Basel
