Preface	xi
Selected Notation	xv
A Glance at Quantum Mechanics	1
1 Linear Operators and Spectra	
1.1 Bounded Operators	5
1.2 Closed Operators	15
1.3 Compact Operators	20
1.4 Hilbert-Schmidt Operators	27
1.5 The spectrum	32
1.6 Spectra of Compact Operators	39
2 Adjoint Operator	
2.1 Adjoint Operator	43
2.2 Cayley Transform I	49
2.3 Examples	54
2.3.1 Momentum and Energy	54
2.3.2 Multiplication Operator	62
2.4 Weyl Sequences	64
2.5 Cayley Transform II	68
2.6 Examples	73
3 Fourier Transform and Free Hamiltonian	
3.1 Fourier Transform	79
3.2 Sobolev Spaces	82
3.3 Momentum Operator	89
3.4 Kinetic Energy and Free Particle	90
3.4.1 Free Resolvent	92

4	Operators via Sesquilinear Forms	
4.1	Sesquilinear Forms	95
4.2	Operators Associated with Forms	100
4.3	Friedrichs Extension	107
4.4	Examples	111
4.4.1	Hardy's Inequality	118
5	Unitary Evolution Groups	
5.1	Unitary Evolution Groups	121
5.2	Bounded Infinitesimal Generators	126
5.3	Stone Theorem	129
5.4	Examples	132
5.5	Free Quantum Dynamics	137
5.5.1	Heat Equation	141
5.6	Trotter Product Formula	142
6	Kato-Rellich Theorem	
6.1	Relatively Bounded Perturbations	145
6.1.1	KLMN Theorem	149
6.2	Applications	150
6.2.1	H-Atom and Virial Theorem	150
6.2.2	KLMN: Applications	155
6.2.3	Some $L^2_{\text{loc}}(\mathbb{R}^n)$ Potentials	158
6.3	Kato's Inequality and Pointwise Positivity	161
7	Boundary Triples and Self-Adjointness	
7.1	Boundary Forms	169
7.1.1	Boundary Triples	172
7.2	Schrödinger Operators on Intervals	174
7.2.1	Regular and Singular End Points	175
7.2.2	Limit Point, Limit Circle	178
7.3	Regular Examples	181
7.4	Singular Examples and All That	184
7.4.1	One-dimensional H-Atom	185
7.4.2	Some Point Interactions	188
7.5	Spherically Symmetric Potentials	192
7.5.1	A Multiply Connected Domain	195

8 Spectral Theorem

8.1	Compact Self-Adjoint Operators	201
8.1.1	Compact Normal Operators	204
8.2	Resolution of the Identity	205
8.3	Spectral Theorem	211
8.4	Examples	219
8.4.1	Multiplication Operator	219
8.4.2	Purely Point Operators	223
8.4.3	Tight-Binding Kinetic Energy	224
8.5	Comments on Proofs	225

9 Applications of the Spectral Theorem

9.1	Quantum Interpretation of Spectral Measures	229
9.2	Proof of Theorem 5.3.1	230
9.3	Form Domain of Positive Operators	231
9.3.1	Domain of Form Sum of Operators	236
9.4	Polar Decomposition	238
9.4.1	Trace-Class Operators	239
9.5	Miscellanea	242
9.6	Spectral Mapping	248
9.7	Duhamel Formula	249
9.8	Reducing Subspaces	250
9.9	Sequences and Evolution Groups	254

10 Convergence of Self-Adjoint Operators

10.1	Resolvent and Dynamical Convergences	257
10.2	Resolvent Convergence and Spectrum	264
10.3	Examples	266
10.3.1	Nonrelativistic Limit of Dirac Operator	269
10.4	Sesquilinear Form Convergence	271
10.4.1	Nondecreasing Sequences	271
10.4.2	Nonincreasing Sequences	276
10.5	Application to the Aharonov-Bohm Effect	279

11 Spectral Decomposition I

11.1	Spectral Reduction	283
11.2	Discrete and Essential Spectra	285
11.3	Essential Spectrum and Compact Perturbations	289
11.3.1	Operators With Compact Resolvent	291
11.4	Applications	293
11.4.1	Eigenvalues of the H-Atom	293
11.4.2	Embedded Eigenvalue	297

11.4.3	Three Simple Classes of Potentials	298
11.4.4	Existence of Negative Eigenvalues	300
11.4.5	Resolvent Convergence and Essential Spectrum	303
11.5	Discrete Spectrum for Unbounded Potentials	305
11.6	Spectra of Self-Adjoint Extensions	307
11.6.1	Green Function and a Free Compact Resolvent	310
12	Spectral Decomposition II	
12.1	Point, Absolutely Continuous and Singular Continuous Subspaces	313
12.2	Examples	318
12.3	Some Absolutely Continuous Spectra	324
12.3.1	Multiplication Operators	324
12.3.2	Putnam Commutator Theorem	326
12.3.3	Scattering and Kato-Rosenblum Theorem	331
12.4	Magnetic Field: Landau Levels	337
12.4.1	Magnetic Resolvent Convergence	342
12.5	Weyl-von Neumann Theorem	343
12.6	Wonderland Theorem	348
13	Spectrum and Quantum Dynamics	
13.1	Point Subspace: Precompact Orbits	353
13.2	Almost Periodic Trajectories	356
13.3	Quantum Return Probability	358
13.4	RAGE Theorem and Test Operators	363
13.5	Continuous Subspace: Return Probability Decay	365
13.6	Bound and Scattering States in \mathbb{R}^n	369
13.7	α -Hölder Spectral Measures	374
14	Some Quantum Relations	
14.1	Hermitian \times Self-Adjoint Operators	379
14.2	Uncertainty Principle	381
14.3	Commuting Observables	384
14.4	Probability Current	388
14.5	Ehrenfest Theorem	392
	Bibliography	395
	Index	405

Intermediate Spectral Theory and Quantum Dynamics
de Oliveira, C.R.

2009, XIII, 410 p., Hardcover

ISBN: 978-3-7643-8794-5

A product of Birkhäuser Basel
