Preface	vii
1 Algebraic Topology Background	
1.1 Stable homotopy groups of spheres	2
1.2 Framed manifolds and stable homotopy groups	4
1.3 The classical stable homotopy category	7
1.4 The classical Adams spectral sequence	14
1.5 Snaith splittings and the Kahn-Priddy theorem	15
1.6 Cohomology operations	24
1.7 Homology operations	26
1.8 The Arf-Kervaire invariant one problem	28
2 The Arf-Kervaire Invariant via QX	
2.1 The Steenrod annihilated submodule	34
2.2 The Arf-Kervaire invariant and $\pi_*(\Sigma^\infty BO)$	40
2.3 Applications to the Arf-Kervaire invariant one problem	44
3 The Upper Triangular Technology	
3.1 Connective K-theory	49
3.2 The role of the upper triangular group	58
3.3 An application to algebraic K-theory	62
4 A Brief Glimpse of Algebraic K-theory	
4.1 Simplicial sets and their realisations	66
4.2 Quillen's higher algebraic K-theory	68
4.3 The correspondence between affine schemes and commutative rings	70
4.4 Henselian rings	73
4.5 Modulo m K-theory of Henselian pairs	75
4.6 The universal homotopy construction	76
4.7 K-theory of Archimedean fields	83
4.8 Commutative Banach algebras	88
4.9 The case of $C(X)$ via excision	89

5	The Matrix Corresponding to $1 \wedge \psi^3$	
5.1	The fundamental result of upper triangular technology	93
5.2	2-adic homotopy of $bu \wedge bo$	95
5.3	The matrix	102
5.4	The matrix reloaded	110
5.5	Applications	114
6	Real Projective Space	
6.1	MU -theory and KU -theory of \mathbb{RP}^n	120
6.2	BP -theory of \mathbb{RP}^n	127
6.3	Application to the Whitehead product $[\iota_n, \iota_n]$	129
6.4	bo , bu and $bspin$ e-invariants	132
6.5	MU_* -e-invariants and Arf-Kervaire invariants	137
7	Hurewicz Images, BP-theory and the Arf-Kervaire Invariant	
7.1	J_* and J'_*	144
7.2	J_* -theory, ju_* -theory and the Arf-Kervaire invariant	147
8	Upper Triangular Technology and the Arf-Kervaire Invariant	
8.1	Adams operations	155
8.2	K -theory examples	167
8.3	The upper triangular technology examples	175
8.4	Applications of upper triangular technology	184
9	Futuristic and Contemporary Stable Homotopy	
9.1	\mathbb{A}^1 -homotopy theory	199
9.2	Spaces	201
	Bibliography	217
	Index	235

Stable Homotopy Around the Arf-Kervaire Invariant

Snaith, V.P.

2009, XIV, 239 p., Hardcover

ISBN: 978-3-7643-9903-0

A product of Birkhäuser Basel
