<b>1 Executive Summary</b>	1
1.1 Objectives of the EduaR&D Project Carried Out by Fh-ISI	2
1.2 The Conceptual Approach	3
1.3 Results	6
1.3.1 Analysis of Energy Technology and Energy Economics Aspects	6
1.3.2 General Conclusions on the Developed Method	7
1.3.3 Specific Conclusions and Recommendations for the Four Technologies	8
1.3.4 The Manual – The Product of this Project	11
1.4 Outlook	11
<b>2 Introduction and Objectives of the EduaR&amp;D Project Carried Out by Fh-ISI</b>	13
2.1 Objectives of the EduaR&D Project	14
<b>3 The Conceptual Approach</b>	17
3.1 Basic Idea: Three Angles of Analysis	18
3.2 Selection of Energy Technologies Based on Energy Technology and Energy Economics Criteria	20
3.2.1 Applied Boundary Conditions and Energy Economics Projections	25
3.2.2 Decentralized Electricity and Heat Generation – Fuel Cell Options and Their Competitors	27
3.2.3 Low-Energy and Passive Houses and Buildings	28
3.2.4 Carbon Capture and Storage from Coal-Based Power Plants	31
3.2.5 Industrial Furnaces	33
3.3 Delineation of a Technology	34
3.4 The Analysis of the Technology Cycle	35
3.4.1 General Model	35
3.4.2 Empirical Analysis and Indicators	36
3.4.3 Lessons from Previous Assessments	38
3.4.4 Policy Implications	40

3.5	Innovation System Approach . . . . .	41
3.5.1	Definition of Technological Innovation Systems . . . . .	41
3.5.2	Key Questions and Methodological Approach . . . . .	42
3.6	Integration of the Methodologies and Policy Aspects . . . . .	47
3.6.1	The Contributions of the Methodological Approaches to Policy Design . . . . .	47
3.6.2	Market and System Failures and Policy Instruments in the Technology Cycle . . . . .	47
3.7	Structure of the Analysis – Overview . . . . .	61
	References . . . . .	63
<b>4</b>	<b>Fuel Cell Technologies . . . . .</b>	<b>67</b>
4.1	Technology Description and Energy-Economic Significance . . . . .	67
4.2	The Analysis on the Micro-Level . . . . .	69
4.2.1	Technological and Economic Challenges . . . . .	69
4.2.2	Position in the Technology Cycle . . . . .	71
4.3	The Technological Innovation System . . . . .	84
4.3.1	The Overall System . . . . .	84
4.3.2	The Various Elements of the Innovation System and Their Roles . . . . .	86
4.3.3	Intermediaries, Financial and Other Institutions . . . . .	88
4.3.4	Regulation . . . . .	93
4.3.5	Co-Operations . . . . .	93
4.3.6	Drivers of Future Markets . . . . .	94
4.4	Obstacles and Market Imperfections . . . . .	94
4.4.1	Risk-Aversion as a Result of Unfulfilled Promises . . . . .	95
4.4.2	Framework Conditions (Energy Basis, Energy Price) . . . . .	95
4.4.3	Strong Developments in Alternative Technologies . . . . .	95
4.4.4	System . . . . .	95
4.5	Implications for Public Policy . . . . .	97
4.5.1	Bottlenecks and Opportunities . . . . .	97
4.5.2	Policy Recommendations . . . . .	100
	References . . . . .	103
<b>5</b>	<b>Passive Houses and Buildings . . . . .</b>	<b>105</b>
5.1	Description of the Passive House Technology and Energy Economic Relevance . . . . .	105
5.1.1	Superinsulation . . . . .	107
5.1.2	Heat Recovery Systems with Active Heating or Cooling Components . . . . .	108
5.1.3	Windows and Passive Solar Gains . . . . .	109
5.1.4	Competing Concepts . . . . .	109
5.2	Analysis on the Micro Level . . . . .	111
5.2.1	Technological and Economical Challenges . . . . .	111
5.2.2	Passive House Technologies in the Technology Cycle . . . . .	112

5.3	The Technological Innovation System .....	118
5.3.1	The Overall System .....	118
5.3.2	The Various Elements of the Innovation System and Their Roles .....	121
5.3.3	Public Policy .....	134
5.3.4	Regulation .....	135
5.3.5	Collaboration .....	136
5.4	Implications for Public Funding and Intervention .....	136
5.4.1	Bottlenecks and Opportunities .....	136
5.4.2	Policy Recommendations .....	138
	References .....	140
<b>6</b>	<b>Carbon Dioxide-Free Power Stations/Carbon Dioxide Capture and Storage .....</b>	<b>143</b>
6.1	Description and Significance for Energy Supply .....	143
6.2	Micro-Level Analysis .....	144
6.2.1	Technological and Economic Challenges .....	144
6.2.2	Status of CCS in the Technology Cycle .....	145
6.3	The Innovation System of CCS .....	151
6.3.1	The Overall System .....	151
6.3.2	Components of the Innovation System .....	153
6.3.3	The Role of Public Research Funding .....	160
6.3.4	Regulation .....	161
6.3.5	Cooperation and Interaction in the Innovation System .....	162
6.3.6	Bottlenecks and Opportunities .....	163
6.3.7	Policy Recommendations for Public Research Policy .....	165
6.3.8	Other Policy Recommendations .....	168
	References .....	169
<b>7</b>	<b>Industrial Furnaces .....</b>	<b>171</b>
7.1	Technology Description and Energy-Economic Significance .....	171
7.2	The Analysis on a Micro-Level .....	173
7.2.1	Technological and Economic Challenges .....	173
7.2.2	Position in the Technology Cycle .....	176
7.3	The Innovation System of Industrial Furnaces .....	189
7.3.1	The Overall System .....	189
7.3.2	The Manufacturers/Industry .....	189
7.3.3	Public Research .....	193
7.3.4	Interest Organisations .....	197
7.3.5	Demand .....	197
7.3.6	Public Policy .....	199
7.4	Implications for Public Policy .....	201
7.4.1	Bottlenecks and Opportunities .....	201
7.4.2	Policy Recommendations .....	203
	References .....	205

<b>8 Conclusions and Recommendations</b>	209
8.1 The Overall Approach and the Interaction Between the Three Assessment Areas	210
8.2 Conclusions Derived from Observations in the Three Conceptual Areas	213
8.2.1 Energy Technology and Economics Analysis	213
8.2.2 Indicator-Based Technology Cycle Analysis	214
8.2.3 Technological Innovation Systems Analysis	217
8.3 Observations and Recommendations Regarding the Four Energy Technologies	218
8.3.1 Fuel Cells	218
8.3.2 Passive Houses and Buildings	220
8.3.3 Carbon Capture from Central Fossil Conversion Plants	223
8.3.4 Industrial Furnaces	224
8.4 Final Conclusion and Outlook	227
8.4.1 Outlook	227
<b>9 Annex</b>	229
9.1 Manual	229
9.1.1 Objective and Outline of the Manual	229
9.1.2 Characterization of the Technology to Be Examined – Market Contextualization	230
9.1.3 Analysis and Evaluation Steps of the Three Pillars	230
9.1.4 Policy Measures	234
9.2 Verfahrensanleitung (Manual in German)	234
9.2.1 Entwurf der Struktur der Anleitung Ziel der Anleitung und Überblick	234
9.2.2 Kennzeichnung der zu untersuchenden Technologie – Marktkontexturierung	235
9.2.3 Analyse und –Bewertungsschritte der drei methodischen Säulen	236
9.2.4 Policy-Maßnahmen	240
