

## Table of Contents

---

<b>Research Articles</b>	
<hr/>	
H. Adachi	
<b>Unemployment and income distribution in the medium-run growth model</b>	1
C. Castaing, M. Saadoune	
<b>Convergences in a dual space with applications to Fatou lemma</b>	23
A.D. Ioffe	
<b>Variational analysis and mathematical economics 1: Subdifferential calculus and the second theorem of welfare economics</b>	71
V.L. Levin	
<b>Smooth feasible solutions to a dual Monge–Kantorovich problem with applications to best approximation and utility theory in mathematical economics</b>	97
K. Matsumoto	
<b>Optimal growth rate in random trade time</b>	129
H. Tsukahara	
<b>Some properties of distortion risk measures</b>	153
<b>Subject Index</b>	167
<b>Instructions for Authors</b>	169

Advances in Mathematical Economics Volume12

Kusuoka, S.; Maruyama, T. (Eds.)

2009, V, 170 p., Hardcover

ISBN: 978-4-431-92934-5
