1 Fundamentals of Biomaterials

Paolo Tranquilli Leali and Antonio Merolli

1.1	Introduction	1
1.2	Metals	3
1.3	Polymers	4
1.3.1	Polymethyl-methacrylate	5
1.3.2	Polyethylene	6
1.3.3	Biodegradable Polymers	6
1.4	Ceramics	7
1.4.1	Hydroxyapatite	8
1.4.2	Bioactive Glass	9
1.5	Composites	10
	References	10

2 Potential Applications of Tissue Engineering in Hand Surgery

Matteo Santin

2.1	Introduction	13
2.1.1	Limitations of Permanent Implants	14
2.1.2	Biodegradable Biomaterials: from Tissue Replacement to Tissue Regeneration	14
2.2	Tissue Engineering	15
2.3	Scaffold Fabrication Techniques	16
2.4	Cell Types in Tissue Engineering Constructs	17
2.4.1	Embryonic Stem Cells	18
2.4.1.1	Technical Limitations	19
2.4.1.2	Ethical Concerns	19
2.4.1.3	Regulatory Issues	19
2.4.2	Adult Mesenchymal Stem Cells	19
2.4.3	Induced Pluripotent Stem Cells	20

2.5	Biomimetic Materials, Bioligands and Bioactive Molecules for Tissue Engineering Constructs	21
2.5.1	Collagen	21
2.5.2	Fibrin	22
2.5.3	Glycosaminoglycans (GAGs) and Proteoglycans (PGNs)	22
2.5.4	Ceramics	23
2.5.5	Synthetic Bioligands	24
2.5.6	Bioactive Molecules	25
2.6	Conclusions	26
	References	27
3	The Finite Element Method for the Design of Biomedical Devices	
	<i>Francesco Mollica and Luigi Ambrosio</i>	
3.1	Introduction	31
3.2	What is the Finite Element Method?	33
3.3	The Main Steps Involved in a FEM Analysis	34
3.3.1	Preprocessing	35
3.3.2	Solution	41
3.3.3	Postprocessing	41
3.4	Conclusions	44
	Further Reading	44
4	Prostheses for the Joints of the Hand	
	<i>Antonio Merolli</i>	
4.1	Introduction	47
4.2	Arthrosis and Arthritis	48
4.3	Metacarpophalangeal Joint Prostheses	49
4.4	Trapezio-metacarpal Joint Prostheses	56
4.5	Prostheses for the Interphalangeal Joints	58
4.6	Prostheses for the Scaphoid	60
4.7	Prostheses for the Lunate	60
4.8	Mid-carpal Replacement	61
	References	62
5	Causes of Failure in Flexible Metacarpophalangeal Prostheses	
	<i>Thomas J. Joyce</i>	
5.1	Introduction	69
5.2	Analysis of Implanted Sutter Metacarpophalangeal Prostheses	73
5.2.1	Clinical Details	73
5.2.2	Macroscopic Analysis	73
5.2.3	Microscopic Analysis	73
5.3	Looking Ahead	79
	References	80

6 Prosthetic Surgery of Metacarpophalangeal Joints in Rheumatoid Patients: an Open Problem

Francesco Catalano

6.1	Introduction	83
6.2	Prosthetic Surgical Treatment	84
6.3	Pathological Physiology	85
6.3.1	Involvement of the Wrist	85
6.3.1.1	Ulnar Onset	86
6.3.1.2	Central Onset	86
6.3.1.3	Radial Onset	87
6.3.2	Involvement of the Metacarpophalangeal Joints	87
6.3.3	Involvement of the Interphalangeal Joints	88
6.4	Problems Associated with Prosthetic Surgery of Metacarpophalangeal Joints in Rheumatoid Patients	88
	Further Reading	91

7 Requirements for a Metacarpophalangeal Joint Prosthesis for Rheumatoid Patients and Suggestions for Design

Antonio Merolli

7.1	Introduction	95
7.2	Four-dimensional Kinematics of the Metacarpophalangeal Joint	96
7.3	Solid Modeling and Rapid Prototyping	98
7.4	Clinical Requirement	100
7.5	Two Surgical Constraints	101
7.6	Choice of Biomaterials	101
7.7	A Possible Design	102
7.8	Conclusions	105
	References	105

8 Research Trends for Flexor Tendon Repair

Stavros Thomopoulos

8.1	Introduction	107
8.2	Animal Models for Studying Flexor Tendon Injury and Repair	109
8.3	Mechanical Approaches for Enhanced Flexor Tendon Healing	109
8.4	Biomaterials for Enhanced Flexor Tendon Gliding	111
8.5	Biomaterials for Growth Factor-enhanced Flexor Tendon Healing	114
	References	119

9 Peripheral Nerve Regeneration by Artificial Nerve Guides

Antonio Merolli and Lorenzo Rocchi

9.1	Introduction	127
9.2	Tubular Nerve Guides	128
9.3	Glue versus Stitches	131

9.4	Control Macromolecules and Seeded Cells	132
9.5	Clinical Limitations of the Tubular Nerve Guides	133
9.6	The Role of Intraneural Vascularization in Defining the Effectiveness of Nerve Regeneration	134
9.7	The NeuroBox Concept and the Search for a Nerve Regeneration Technique that is Surgically Easier, Biologically Respectful, and Technologically Affordable	135
9.8	Longer Gaps as a Current Challenge: Regeneration in the Absence of the Distal Stump as the Ultimate Challenge	138
