Preface V

Part I Geometric Background

1 Affine Euclidean Space $\mathbb{A}\mathbb{R}^n$ 3

1.1 Euclidean Space \mathbb{R}^n 4

1.2 Affine Euclidean Space $\mathbb{A}\mathbb{R}^n$ 5

1.3 Affine Subspaces 6

1.3.1 Subspaces 6

1.3.2 Systems of Linear Equations 6

1.3.3 Points and Lines 6

1.3.4 Planes 7

1.3.5 Hyperplanes 7

1.3.6 Orthogonal Projection 7

1.4 Half-Spaces 8

1.5 Bases and Coordinates 8

1.6 Convex Sets 9

2 Isometries of $\mathbb{A}\mathbb{R}^n$ 11

2.1 Fixed Points of Groups of Isometries 11

2.2 Structure of $\text{Isom } \mathbb{A}\mathbb{R}^n$ 12

2.2.1 Translations 12

2.2.2 Orthogonal Transformations 13

3 Hyperplane Arrangements 17

3.1 Faces of a Hyperplane Arrangement 17

3.2 Chambers 18

3.3 Galleries 19

3.4 Polyhedra 20

4	Polyhedral Cones	25
4.1	Finitely Generated Cones	25
4.1.1	Cones	25
4.1.2	Extreme Vectors and Edges	26
4.2	Simple Systems of Generators	27
4.3	Duality	29
4.4	Duality for Simplicial Cones	30
4.5	Faces of a Simplicial Cone	31

Part II Mirrors, Reflections, Roots

5	Mirrors and Reflections	37
6	Systems of Mirrors	41
6.1	Systems of Mirrors	41
6.2	Finite Reflection Groups	44
7	Dihedral Groups	49
7.1	Groups Generated by Two Involutions	49
7.2	Proof of Theorem 7.1	50
7.3	Dihedral Groups: Geometric Interpretation	51
8	Root Systems	55
8.1	Mirrors and Their Normal Vectors	55
8.2	Root Systems	56
8.3	Planar Root Systems	57
8.4	Positive and Simple Systems	59
9	Root Systems A_{n-1}, BC_n, D_n	63
9.1	Root System A_{n-1}	63
9.1.1	A Few Words about Permutations	63
9.1.2	Permutation Representation of Sym_n	64
9.1.3	Regular Simplices	64
9.1.4	The Root System A_{n-1}	65
9.1.5	The Standard Simple System	66
9.1.6	Action of Sym_n on the Set of all Simple Systems	66
9.2	Root Systems of Types C_n and B_n	68
9.2.1	Hyperoctahedral Group	68
9.2.2	Admissible Orderings	69
9.2.3	Root Systems C_n and B_n	70
9.2.4	Action of W on Φ	71
9.3	The Root System D_n	72

Part III Coxeter Complexes

10 Chambers	79
11 Generation	83
11.1 Simple Reflections	83
11.2 Foldings	84
11.3 Galleries and Paths	85
11.4 Action of W on \mathcal{C}	87
11.5 Paths and Foldings	87
11.6 Simple Transitivity of W on \mathcal{C} : Proof of Theorem 11.6	89
12 Coxeter Complex	91
12.1 Labeling of the Coxeter Complex	91
12.2 Length of Elements in W	93
12.3 Opposite Chamber	93
12.4 Isotropy Groups	94
12.5 Parabolic Subgroups	95
13 Residues	99
13.1 Residues	99
13.2 Example	100
13.3 The Mirror System of a Residue	101
13.4 Residues are Convex	102
13.5 Residues: the Gate Property	102
13.6 The Opposite Chamber	103
14 Generalized Permutahedra	105

Part IV Classification

15 Generators and Relations	113
15.1 Reflection Groups are Coxeter Groups	113
15.2 Proof of Theorem 15.1	115
16 Classification of Finite Reflection Groups	117
16.1 Coxeter Graph	117
16.2 Decomposable Reflection Groups	118
16.3 Labeled Graphs and Associated Bilinear Forms	118
16.4 Classification of Positive Definite Graphs	119

17 Construction of Root Systems	123
17.1 Root System A_n	123
17.2 Root System $B_n, n \geq 2$	124
17.3 Root System $C_n, n \geq 2$	125
17.4 Root System $D_n, n \geq 4$	126
17.5 Root System E_8	126
17.6 Root System E_7	127
17.7 Root System E_6	128
17.8 Root System F_4	128
17.9 Root System G_2	129
17.10 Crystallographic Condition	129
18 Orders of Reflection Groups	133
<hr/>	
Part V Three-Dimensional Reflection Groups	
<hr/>	
19 Reflection Groups in Three Dimensions	139
19.1 Planar Mirror Systems	139
19.2 From Mirror Systems to Tessellations of the Sphere	139
19.3 The Area of a Spherical Triangle	141
19.4 Classification of Finite Reflection Groups in Three Dimensions	142
20 Icosahedron	147
20.1 Construction	147
20.2 Uniqueness and Rigidity	149
20.3 The Symmetry Group of the Icosahedron	151
<hr/>	
Part VI Appendices	
<hr/>	
A The Forgotten Art of Blackboard Drawing	157
B Hints and Solutions to Selected Exercises	161
References	167
Index	169

Mirrors and Reflections

The Geometry of Finite Reflection Groups

Borovik, A.V.; Borovik, A.

2010, XII, 172 p. 74 illus., Softcover

ISBN: 978-0-387-79065-7
