Part I Basic Science Underlying Retinal Degeneration

- 1 Analysis of Genes Differentially Expressed During Retinal Degeneration in Three Mouse Models** 3
Yogita Kanan, Michael Centola, Frank Bart,
and Muayyad R. Al-Ubaidi
- 2 Regulation of Angiogenesis by Macrophages** 15
Rajendra S. Apte*
- 3 Protein Kinase C Regulates Rod Photoreceptor Differentiation Through Modulation of STAT3 Signaling** 21
Carolina Pinzon-Guzman, Samuel Shaomin Zhang,
and Colin J. Barnstable
- 4 Pigment Epithelium-derived Factor Receptor (PEDF-R): A Plasma Membrane-linked Phospholipase with PEDF Binding Affinity** 29
Preeti Subramanian, Patricia M. Notario,
and S. Patricia Becerra
- 5 The Function of Oligomerization-Incompetent RDS in Rods** 39
Dibyendu Chakraborty, Shannon M. Conley, Steven J. Fliesler, and Muna I. Naash
- 6 The Association Between Telomere Length and Sensitivity to Apoptosis of HUVEC** 47
Ji Zhang, Chen Hui, Liu Su, Wu Xiaoyun, Huang Xi,
and Fan Yingchuan
- 7 Photoreceptor Guanylate Cyclases and cGMP Phosphodiesterases in Zebrafish** 55
Ross F. Collery* and Breandán N. Kennedy
- 8 RDS in Cones Does Not Interact with the Beta Subunit of the Cyclic Nucleotide Gated Channel** 63
Shannon M. Conley*, Xi-Qin Ding, and Muna I. Naash

9	Increased Expression of TGF-β1 and Smad 4 on Oxygen-Induced Retinopathy in Neonatal Mice	71
	Fan Yingchuan, Lei Chuntao, Chen Hui, and Hu Jianbin	
10	ZBED4, A Novel Retinal Protein Expressed in Cones and Müller Cells	79
	Debora B. Farber, V.P. Theendakara, N.B. Akhmedov, and M. Saghizadeh	
11	Tubby-Like Protein 1 (Tulp1) Is Required for Normal Photoreceptor Synaptic Development	89
	Gregory H. Grossman*, Gayle J.T. Pauer, Umadevi Narendra, and Stephanie A. Hagstrom	
12	Growth-Associated Protein43 (GAP43) Is a Biochemical Marker for the Whole Period of Fish Optic Nerve Regeneration	97
	Manabu Kaneda, Mikiko Nagashima, Kazuhiro Mawatari, Tomoya Nunome, Kenichiro Muramoto, Kayo Sugitani, and Satoru Kato	
13	Multiprotein Complexes of Retinitis Pigmentosa GTPase Regulator (RPGR), a Ciliary Protein Mutated in X-Linked Retinitis Pigmentosa (XLRP)	105
	Carlos Murga-Zamalloa, Anand Swaroop, and Hemant Khanna*	
14	Misfolded Proteins and Retinal Dystrophies	115
	Jonathan H. Lin* and Matthew M. LaVail	
15	Neural Retina and MerTK-Independent Apical Polarity of αvβ5 Integrin Receptors in the Retinal Pigment Epithelium	123
	Mallika Mallavarapu* and Silvia C. Finnemann	
16	Mertk in Daily Retinal Phagocytosis: A History in the Making	133
	Emeline F. Nandrot and Eric M. Dufour	
17	The Interphotoreceptor Retinoid Binding (IRBP) Is Essential for Normal Retinoid Processing in Cone Photoreceptors	141
	Ryan O. Parker* and Rosalie K. Crouch	
18	Aseptic Injury to Epithelial Cells Alters Cell Surface Complement Regulation in a Tissue Specific Fashion	151
	Joshua M. Thurman, Brandon Renner, Kannan Kunchithapautham, V. Michael Holers, and Bärbel Rohrer	
19	Role of Metalloproteases in Retinal Degeneration Induced by Violet and Blue Light	159
	C. Sanchez-Ramos, J.A. Vega, M.E. del Valle, A. Fernandez-Balbuena, C. Bonnin-Arias, and J.M. Benitez-del Castillo	

20	Mitochondrial Decay and Impairment of Antioxidant Defenses in Aging RPE Cells	165
	Yuan He and Joyce Tombran-Tink	
21	Ciliary Transport of Opsin	185
	Deepti Trivedi* and David S. Williams	
22	Effect of Hesperidin on Expression of Inducible Nitric Oxide Synthase in Cultured Rabbit Retinal Pigment Epithelial Cells	193
	Luo Xiaoting, Zeng Xiangyun, Li Shumei, Dong Minghua, and Xiong Liang	
23	Profiling MicroRNAs Differentially Expressed in Rabbit Retina	203
	Naihong Yan, Ke Ma, Jia Ma, Wei Chen, Yun Wang, Guiqun Cao, Dominic Man-Kit Lam, and Xuyang Liu	
24	Unexpected Transcriptional Activity of the Human <i>VMD2</i> Promoter in Retinal Development	211
	Meili Zhu, Lixin Zheng, Yumi Ueki, John D. Ash, and Yun-Zheng Le	
25	Microarray Analysis of Hyperoxia Stressed Mouse Retina: Differential Gene Expression in the Inferior and Superior Region	217
	Yuan Zhu*, Riccardo Natoli, Krisztina Valter, and Jonathan Stone	
26	Photoreceptor Sensory Cilia and Inherited Retinal Degeneration	223
	Qin Liu*, Qi Zhang, and Eric A. Pierce	
27	Role of Elovl4 Protein in the Biosynthesis of Docosahexaenoic Acid	233
	Martin-Paul Agbaga*, Richard S. Brush, Md Nawajes A. Mandal, Michael H. Elliott, Muayyad R. Al-Ubaidi, and Robert E. Anderson	

Part II Molecular Genetics and Candidate Genes

28	Molecular Pathogenesis of Achromatopsia Associated with Mutations in the Cone Cyclic Nucleotide-Gated Channel CNGA3 Subunit	245
	Xi-Qin Ding, J. Browning Fitzgerald, Alexander B. Quiambao, Cynthia S. Harry, and Anna P. Malykhina	
29	Mutation Spectra in Autosomal Dominant and Recessive Retinitis Pigmentosa in Northern Sweden	255
	Irina Golovleva, Linda Köhn, Marie Burstedt, Stephen Daiger, and Ola Sandgren	

30	1 Rhodopsin Mutations in Congenital Night Blindness	263
	Suzanne D. McAlear, Timothy W. Kraft, and Alecia K. Gross*	
31	GCAP1 Mutations Associated with Autosomal Dominant Cone Dystrophy	273
	Li Jiang* and Wolfgang Baehr	
32	Genotypic Analysis of X-linked Retinoschisis in Western Australia	283
	Tina Lamey, Sarina Laurin, Enid Chelva, and John De Roach	
33	Mutation Frequency of IMPDH1 Gene of Han Population in Ganzhou City	293
	Li Shumei, Luo Xiaoting, Zeng Xiangyun, Hu Liqun, Xiong Liang, and Li Sisi	
Part III Diagnostic, Clinical, Cytopathological and Physiologic Aspects of Retinal Degeneration		
34	Reversible and Size-Selective Opening of the Inner Blood-Retina Barrier: A Novel Therapeutic Strategy	301
	Matthew Campbell, Anh Thi Hong Nguyen, Anna-Sophia Kiang, Lawrence Tam, Paul F. Kenna, SORCHA NI Dhubhghaill, Marian Humphries, G. Jane Farrar, and Peter Humphries	
35	Spectral Domain Optical Coherence Tomography and Adaptive Optics: Imaging Photoreceptor Layer Morphology to Interpret Preclinical Phenotypes	309
	Jungtae Rha, Adam M. Dubis, Melissa Wagner-Schuman, Diane M. Tait, Pooja Godara, Brett Schroeder, Kimberly Stepien, and Joseph Carroll*	
36	Pharmacological Manipulation of Rhodopsin Retinitis Pigmentosa	317
	Hugo F. Mendes, Raffaella Zaccarini, and Michael E. Cheetham	
37	Targeted High-Throughput DNA Sequencing for Gene Discovery in Retinitis Pigmentosa	325
	Stephen P. Daiger, Lori S. Sullivan, Sara J. Bowne, David G. Birch, John R. Heckenlively, Eric A. Pierce, and George M. Weinstock	
38	Advances in Imaging of Stargardt Disease	333
	Y. Chen, A. Roorda, and J. L. Duncan	

39	Protamine Sulfate Downregulates Vascular Endothelial Growth Factor (VEGF) Expression and Inhibits VEGF and Its Receptor Binding in Vitro	341
	Jianbin Hu, Chao Qu, Yufeng Yu, Ma Ping, Dong Wei, and Dong Dandan	
40	Computer-Assisted Semi-Quantitative Analysis of Mouse Choroidal Density	349
	Yun-Zheng Le	
41	Thioredoxins 1 and 2 Protect Retinal Ganglion Cells from Pharmacologically Induced Oxidative Stress, Optic Nerve Transection and Ocular Hypertension	355
	Yasunari Munemasa, Jacky M.K. Kwong, Seok H. Kim, Jae H. Ahn, Joseph Caprioli, and Natik Piri	
42	Near-Infrared Light Protect the Photoreceptor from Light-Induced Damage in Rats	365
	Chao Qu, Wei Cao, Yingchuan Fan, and Ying Lin	
43	BDNF Improves the Efficacy ERG Amplitude Maintenance by Transplantation of Retinal Stem Cells in RCS Rats	375
	Chunyu Tian, Chuan Chuang Weng, and Zheng Qin Yin	
44	The Role of Purinergic Receptors in Retinal Function and Disease	385
	Michelle M. Ward*, Theresa Puthussery, Kirstan A. Vessey, and Erica L. Fletcher	

Part IV Macular Degeneration

45	Fundus Autofluorescence Imaging in Age-Related Macular Degeneration and Geographic Atrophy	395
	Srilaxmi Beareilly* and Scott W. Cousins	
46	Endoplasmic Reticulum Stress as a Primary Pathogenic Mechanism Leading to Age-Related Macular Degeneration	403
	Richard T. Libby and Douglas B. Gould*	
47	Proteomic and Genomic Biomarkers for Age-Related Macular Degeneration	411
	Jiayin Gu, Gayle J.T. Pauer, Xiuzhen Yue, Umadevi Narendra, Gwen M. Sturgill, James Bena, Xiaorong Gu*, Neal S. Peachey, Robert G. Salomon, Stephanie A. Hagstrom, John W. Crabb, and The Clinical Genomic, and Proteomic AMD Study Group	

48	Impaired Intracellular Signaling May Allow Up-Regulation of CTGF-Synthesis and Secondary Peri-Retinal Fibrosis in Human Retinal Pigment Epithelial Cells from Patients with Age-Related Macular Degeneration	419
	Piyush C. Kothary, Jaya Badhwar, Christina Weng, and Monte A. Del Monte	
49	PPAR Nuclear Receptors and Altered RPE Lipid Metabolism in Age-Related Macular Degeneration	429
	Goldis Malek, Peng Hu, Albert Wielgus, Mary Dwyer, and Scott Cousins	
50	The Pathophysiology of Cigarette Smoking and Age-Related Macular Degeneration	437
	S. S. Ni Dhubhghaill, M.T. Cahill, M. Campbell, L. Cassidy, M.M. Humphries, and P. Humphries	
51	Oxidative Stress and the Ubiquitin Proteolytic System in Age-Related Macular Degeneration	447
	Scott M. Plafker*	
52	Slit-Robo Signaling in Ocular Angiogenesis	457
	Haoyu Chen*, Mingzhi Zhang, Shibo Tang, Nyall R. London, Dean Y. Li, and Kang Zhang	

Part V Animal Models of Retinal Degeneration

53	Evaluation of Retinal Degeneration in P27KIP1 Null Mouse . . .	467
	Yumi Tokita-Ishikawa, Ryosuke Wakusawa, and Toshiaki Abe	
54	Differences in Photoreceptor Sensitivity to Oxygen Stress Between Long Evans and Sprague-Dawley Rats	473
	Vicki Chrysostomou, Jonathan Stone, and Krisztina Valter	
55	Retinal Degeneration in a Rat Model of Smith-Lemli-Opitz Syndrome: Thinking Beyond Cholesterol Deficiency	481
	Steven J. Fliesler	
56	Do Calcium Channel Blockers Rescue Dying Photoreceptors in the <i>Pde6b^{rd1}</i> Mouse?	491
	Peter Barabas, Carolee Cutler Peck, and David Krizaj	
57	Effect of PBNA on the NO Content and NOS Activity in Ischemia/Reperfusion Injury in the Rat Retina	501
	Liangdong Li, Zhihua Huang, Hai Xiao, Xigui Chen, and Jing Zeng	

58	Recent Insights into the Mechanisms Underlying Light-Dependent Retinal Degeneration from <i>X. Laevis</i> Models of Retinitis Pigmentosa	509
	Orson L. Moritz* and Beatrice M. Tam	
59	A Hypoplastic Retinal Lamination in the Purpurin Knock Down Embryo in Zebrafish	517
	Mikiko Nagashima*, Junichi Saito, Kazuhiro Mawatari, Yusuke Mori, Toru Matsukawa, Yoshiki Koriyama, and Satoru Kato
