

Contents

Preface	ix
1 Introduction	1
2 Decision Systems	9
2.1 Preliminaries	9
2.2 The Structure of Decision Systems	12
2.3 Decision Situations	17
2.4 Experiments in Decision Systems	25
2.5 The Decision-Maker	27
2.6 Existence of Uncertainty in Decision Systems	30
2.7 Criterion Choice Rule	33
3 Indifferent Uncertainty	39
3.1 Preliminaries	39
3.2 I_I -independent Sequences	45
3.3 Main Identity	52
3.4 Risk Estimates	56
3.5 Decision-Making under I_I -independence and Antagonistic Games	61
3.6 Some Examples of I_I -Independence	63
4 Nonstochastic Randomness	71
4.1 Preliminaries	71
4.2 The Concept of Statistical Regularity	80
4.3 Sampling Directedness and Statistical Regularity	82
4.4 Coordinated Families of Regularities	89
4.5 Statistical Regularity of a Sequence	96
4.6 Statistical Regularity of I_I -Independence	98

4.7	Sampling Directedness as a Realization of a Random-in-a-Broad-Sense Phenomenon	102
5	General Decision Problems	109
5.1	Preliminaries	109
5.2	On the Preference Relation in Mass Operations	113
5.3	Statistical Regularity and Criterion Choice	123
6	Experiment in Decision Problems	131
6.1	Preliminaries	131
6.2	Informativity of Experiments	136
6.3	Optimality of Experiments	145
7	Informativity of Experiment in Bayesian Decision Problems	149
7.1	Preliminaries	149
7.2	Theorem of Existence and Uniqueness of Uncertainty Functions	156
7.3	The Inverse Theorem	181
7.4	A Generalization to Countable Θ	184
8	Reducibility of Experiments in Multistep Decision Problems	193
8.1	Preliminaries	193
8.2	Reducibility of Bayesian Decision Problems	196
8.3	Reducibility of a General Decision Problem	200
9	Concluding Remarks	205
A	Mathematical Supplement	209
A.1	Elements of the Theory of Binary Relations	209
A.2	Elements of the Theory of Real Functions	232
	References	265
	Index	271

Decision Systems and Nonstochastic Randomness

Ivanenko, V.I.

2010, XII, 272 p., Hardcover

ISBN: 978-1-4419-5547-0
