

# Contents

|          |  |    |
|----------|--|----|
| <b>1</b> | <b>The Story of Matter</b>                       | 1  |
|          | A Few Searching Questions                        | 1  |
|          | The Smallest of Things                           | 5  |
|          | Mysterium Cosmographicum                         | 9  |
|          | A Particle Primer                                | 11 |
|          | Thomson’s Plum Pudding and an Unexpected Rebound | 12 |
|          | The Quantum World and the Bohr Atom              | 15 |
|          | The New Quantum Mechanics                        | 21 |
|          | Exclusion  | 23 |
|          | Fermi’s Little Neutron                           | 24 |
|          | Three Quarks for Muster Mark!                    | 29 |
|          | Building the Universe                            | 31 |
|          | The Matter Alphabet                              | 31 |
|          | We Are of the Stars                              | 32 |
|          | The Hubble Deep Field                            | 38 |
|          | Moving Forwards                                  | 40 |
| <b>2</b> | <b>The World’s Most Complicated Machine</b>      | 41 |
|          | The End of the Beginning                         | 42 |
|          | Disappointment and Setback                       | 46 |
|          | Court Case Number 1:2008cv00136                  | 48 |
|          | Afterwards                                       | 50 |
|          | Overview: A Proton’s Journey                     | 51 |
|          | The Journey to the LHC                           | 56 |
|          | Collider Basics                                  | 57 |
|          | The Detectors                                    | 62 |
| <b>3</b> | <b>The Standard Model, the Higgs, and Beyond</b> | 71 |
|          | Generation the First – An Acrostic               | 71 |
|          | Feeling the Force                                | 74 |
|          | The Higgs Field – Achieving Mass                 | 78 |
|          | Feynman Diagrams                                 | 79 |
|          | Searching for the Higgs                          | 82 |
