<i>Foreword</i>	<i>v</i>
<i>Preface</i>	<i>vii</i>
<i>Contributors</i>	<i>xiii</i>
1 Alternatives to Mammalian Pain Models 1: Use of <i>C. elegans</i> for the Study of Volatile Anesthetics	1
<i>Louise M. Steele, Margaret M. Sedensky, and Phil G. Morgan</i>	
2 Alternatives to Mammalian Pain Models 2: Using <i>Drosophila</i> to Identify Novel Genes Involved in Nociception	19
<i>Jason C. Caldwell and W. Daniel Tracey Jr.</i>	
3 Animal Models of Acute Surgical Pain.	31
<i>Hyangin Kim, Backil Sung, and Jianren Mao</i>	
4 Animal Models of Acute and Chronic Inflammatory and Nociceptive Pain	41
<i>Janel M. Boyce-Rustay, Prisca Honore, and Michael F. Jarvis</i>	
5 Noxious Heat Threshold Measured with Slowly Increasing Temperatures: Novel Rat Thermal Hyperalgesia Models	57
<i>Kata Bölcskei, Gábor Pethő, and János Szolcsányi</i>	
6 Locomotor Activity in a Novel Environment as a Test of Inflammatory Pain in Rats	67
<i>David J. Matson, Daniel C. Broom, and Daniel N. Cortright</i>	
7 Rationale and Methods for Assessment of Pain-Depressed Behavior in Preclinical Assays of Pain and Analgesia	79
<i>S. Stevens Negus, Edward J. Bilsky, Gail Pereira Do Carmo, and Glenn W. Stevenson</i>	
8 Animal Models of Orofacial Pain.	93
<i>Asma Khan and Kenneth M. Hargreaves</i>	
9 Migraine Models	105
<i>Silvia Benemei, Francesco De Cesaris, Paola Nicoletti, Serena Materazzi, Romina Nassini, and Pierangelo Geppetti</i>	
10 Experimental Models of Visceral Pain	115
<i>Mia Karpitschka and Martin E. Kreis</i>	
11 Human Correlates of Animal Models of Chronic Pain.	155
<i>Arpad Szallasi</i>	
12 Human Experimental Pain Models 1: The Ultraviolet Light UV-B Pain Model.	159
<i>James G. Modir and Mark S. Wallace</i>	
13 Human Experimental Pain Models 2: The Cold Pressor Model.....	165
<i>James G. Modir and Mark S. Wallace</i>	

14	Human Experimental Pain Models 3: Heat/Capsaicin Sensitization and Intradermal Capsaicin Models	169
	<i>James G. Modir and Mark S. Wallace</i>	
15	The Value of the Dental Impaction Pain Model in Drug Development	175
	<i>Stephen A. Cooper and Paul J. Desjardins</i>	
16	Live Cell Imaging for Studying G Protein-Coupled Receptor Activation in Single Cells	191
	<i>Deepak Kumar Saini and Narasimhan Gautam</i>	
17	Recombinant Cell Lines Stably Expressing Functional Ion Channels	209
	<i>Florian Steiner, Sraboni Ghose, and Urs Thomet</i>	
18	Ion Channels in Analgesia Research	223
	<i>Tamara Rosenbaum, Sidney A. Simon, and Leon D. Islas</i>	
19	Electrophysiological and Neurochemical Techniques to Investigate Sensory Neurons in Analgesia Research.	237
	<i>Alexandru Babes, Michael J.M. Fischer, Gordon Reid, Susanne K. Sauer, Katharina Zimmermann, and Peter W. Reeh</i>	
20	The Genetics of Pain and Analgesia in Laboratory Animals	261
	<i>William R. Lariviere and Jeffrey S. Mogil</i>	
21	RT-PCR Analysis of Pain Genes: Use of Gel-Based RT-PCR for Studying Induced and Tissue-Enriched Gene Expression	279
	<i>Kendall Mitchell and Michael J. Iadarola</i>	
22	Gene-Based Approaches in the Study of Pathological Pain.	297
	<i>Elisa Dominguez, Alice Meunier, and Michel Pohl</i>	
23	Linkage Analysis and Functional Evaluation of Inherited Clinical Pain Conditions	309
	<i>Johannes J. Krupp, Dennis Hellgren, and Anders B. Eriksson</i>	
24	Rat Bone Marrow Stromal Cells and Oligonucleotides in Pain Research	327
	<i>Maria Florencia Coronel, Norma Alejandra Chasseing, and Marcelo José Villar</i>	
25	Transplantation of Human Mesenchymal Stem Cells in the Study of Neuropathic Pain	337
	<i>Dario Siniscalco</i>	
26	Delivery of RNA Interference to Peripheral Neurons In Vivo Using Herpes Simplex Virus	347
	<i>Anna-Maria Anesti</i>	
27	Combination of Cell Culture Assays and Knockout Mouse Analyses for the Study of Opioid Partial Agonism	363
	<i>Soichiro Ide, Masabumi Minami, Ichiro Sora, and Kazutaka Ikeda</i>	
28	Assessing Potential Functionality of Catechol-O-methyltransferase (COMT) Polymorphisms Associated with Pain Sensitivity and Temporomandibular Joint Disorders	375
	<i>Andrea G. Nackley and Luda Diatchenko</i>	
29	Genetic Polymorphisms and Human Sensitivity to Opioid Analgesics	395
	<i>Daisuke Nishizawa, Masakazu Hayashida, Makoto Nagashima, Hisashi Koga, and Kazutaka Ikeda</i>	

30	Molecular Assays for Characterization of Alternatively Spliced Isoforms of the Mu Opioid Receptor (MOR)	421
	<i>Pavel Gris, Philip Cheng, John Pierson, William Maixner, and Luda Diatchenko</i>	
31	Inhalational Anesthetic Photolabeling	437
	<i>Roderic G. Eckenhoff, Jin Xi, and William P. Dailey</i>	
32	Measuring Membrane Protein Interactions Using Optical Biosensors	445
	<i>Joseph Rucker, Candice Davidoff, and Benjamin J. Doranz</i>	
33	Proteomics and Metabolomics and Their Application to Analgesia Research	457
	<i>Nichole A. Reisdorph and Richard Reisdorph</i>	
34	Preemptive Analgesia: Problems with Assessment of Clinical Significance	475
	<i>Igor Kissin</i>	
35	Standardization of Pain Measurements in Clinical Trials	483
	<i>William K. Sietsema</i>	
36	Procedural Sedation and Analgesia Research	493
	<i>James R. Miner</i>	
37	Non-invasive Transcranial Direct Current Stimulation for the Study and Treatment of Neuropathic Pain	505
	<i>Helena Knotkova and Ricardo A. Cruciani</i>	
38	Pain Imaging in the Emerging Era of Molecular Medicine	517
	<i>Christian S. Stohler and Jon-Kar Zubieta</i>	
39	Current and Emerging Pharmacologic Therapies for Pain and Challenges Which Still Lay Ahead	539
	<i>Christopher Noto and Marco Pappagallo</i>	
	<i>Concluding Remarks</i>	555
	<i>Index</i>	557
