

Contents

<i>Preface</i>	<i>vii</i>
<i>Contributors</i>	<i>xiii</i>
1 The Rat: A Model Used in Biomedical Research <i>Howard J. Jacob</i>	1
2 Genetic Mapping and Positional Cloning <i>Timothy J. Aitman, Enrico Petretto, and Jacques Behmoaras</i>	13
3 Sequencing of the Rat Genome and Databases <i>Elizabeth A. Worthey, Alexander J. Stoddard, and Howard J. Jacob</i>	33
4 Design of Expression Cassettes for the Generation of Transgenic Animals (Including Insulators) <i>Louis-Marie Houdebine</i>	55
5 Inducible and Conditional Promoter Systems to Generate Transgenic Animals. <i>Yoji Hakamata and Eiji Kobayashi</i>	71
6 Generation of Transgenic Rats by Microinjection of Short DNA Fragments <i>Séverine Ménoret, Séverine Remy, Claire Usal, Laurent Tesson, and Ignacio Anegón</i>	81
7 Generation of Transgenic Rats Using YAC and BAC DNA Constructs <i>Ri-ichi Takahashi and Masatsugu Ueda</i>	93
8 The Use of Lentiviral Vectors to Obtain Transgenic Rats. <i>Séverine Remy, Tuan Huy Nguyen, Séverine Ménoret, Laurent Tesson, Claire Usal, and Ignacio Anegón</i>	109
9 Generation of Transgenic Rats by Ooplasmic Injection of Sperm Cells Exposed to Exogenous DNA <i>Masumi Hirabayashi and Shinichi Hoshi</i>	127
10 Procedures for Somatic Cell Nuclear Transfer in the Rat <i>Jean Cozzi, Eryao Wang, Christelle Jacquet, Alexandre Fraichard, Yacine Cherifi, and Qi Zhou</i>	137
11 ENU Mutagenesis to Generate Genetically Modified Rat Models <i>Ruben van Bostel, Michael N. Gould, Edwin Cuppen, and Bart M.G. Smits</i>	151
12 Establishment of Embryonic Stem Cells from Rat Blastocysts <i>Masaki Kawamata and Takahiro Ochiya</i>	169
13 Derivation, Culture, and In vivo Developmental Capacity of Embryonic Cell Lines from Rat Blastocysts. <i>Simon-Pierre Demers and Lawrence C. Smith</i>	179
14 Interference RNA for In vivo Knock-Down of Gene Expression or Genome-Wide Screening Using shRNA <i>Silvère Petit and Kader Thiam</i>	189

15	Generation of Gene-Specific Mutated Rats Using Zinc-Finger Nucleases.	211
	<i>Aron M. Geurts, Gregory J. Cost, Séverine Rémy, Xiaoxia Cui, Laurent Tesson, Claire Usal, Séverine Ménoret, Howard J. Jacob, Ignacio Anegón, and Roland Buelow</i>	
16	Application of Microarray-Based Analysis of Gene Expression in the Field of Toxicogenomics	227
	<i>Nan Mei, James C. Fuscoe, Edward K. Lobenhofer, and Lei Guo</i>	
17	Generation of Congenic and Consomic Rat Strains	243
	<i>Dominique Lagrange and Gilbert J Fournié</i>	
18	Generation of Rat “Supersonic” Congenic/Conplastic Strains Using Superovulation and Embryo Transfer	267
	<i>Vladimír Landa, Václav Zídek, and Michal Pravenec</i>	
19	Analysis by Quantitative PCR of Zygosity in Genetically Modified Organisms	277
	<i>Laurent Tesson, Séverine Rémy, Séverine Ménoret, Claire Usal, and Ignacio Anegón</i>	
20	A Restriction Enzyme-PCR-Based Technique to Determine Transgene Insertion Sites	287
	<i>Elizabeth C. Bryda and Beth A. Bauer</i>	
21	Cryopreservation and Orthotopic Transplantation of Rat Ovaries	301
	<i>Martina Dorsch and Dirk Wedekind</i>	
22	Techniques for In Vitro and In Vivo Fertilization in the Rat	311
	<i>Naomi Kashiwazaki, Yasunari Seita, Akiko Takizawa, Naoki Maedomari, Junya Ito, and Tadao Serikawa</i>	
23	Rat Strain Repositories	323
	<i>Birger Voigt</i>	
24	Neurobehavioral Tests in Rat Models of Degenerative Brain Diseases	333
	<i>Yvonne K. Urbach, Felix Bode, Huu Phuc Nguyen, Olaf Riess, and Stephan von Hörsten</i>	
25	Rat Genomics Applied to Psychiatric Research	357
	<i>Marie-Pierre Moisan and André Ramos</i>	
26	Genomics Studies of Immune-Mediated Diseases Using the BN–LEW Rat Model	389
	<i>Isabelle Bernard, Gilbert J. Fournié, and Abdelhadi Saoudi</i>	
27	Rat Models of Cardiovascular Diseases	403
	<i>Michael Bader</i>	
28	Use of Rat Genomics for Investigating the Metabolic Syndrome	415
	<i>Michal Pravenec</i>	
29	Genomic Research in Rat Models of Kidney Disease	427
	<i>Yoram Yagil and Chana Yagil</i>	
30	Cancer Research in Rat Models.	445
	<i>Claude Szpirer</i>	
	<i>Index.</i>	459

Rat Genomics

Methods and Protocols

Anegon, I. (Ed.)

2010, XVI, 462 p. 70 illus., 2 illus. in color., Hardcover

ISBN: 978-1-60327-388-6
