# Contents

<i>Foreword</i> . . . . .	<i>v</i>
<i>Preface</i> . . . . .	<i>vii</i>
<i>Contributors</i> . . . . .	<i>xiii</i>
SECTION I    REVIEWS . . . . .	1
1. Review of Human DC Subtypes . . . . . <i>Xinsheng Ju, Georgina Clark, and Derek N.J. Hart</i>	3
2. Review of Murine Dendritic Cells: Types, Location, and Development . . . . . <i>Tewfik Miloud, Günter J. Hämmerling, and Natalio Garbi</i>	21
SECTION II    HUMAN DC PROTOCOLS . . . . .	43
3. Isolation of Human Blood DC Subtypes . . . . . <i>Andrew J. Kassianos, Sarah L. Jongbloed, Derek N.J. Hart, and Kristen J. Radford</i>	45
4. Isolation of Immature Primary Langerhans Cells from Human Epidermal Skin . . . . . <i>Marcin A.W.P. de Jong, Lot de Witte, and Teunis B.H. Geijtenbeek</i>	55
5. Isolation and In Vitro Generation of Gene-Manipulated Human Plasmacytoid and Conventional Dendritic Cells . . . . . <i>Remko Schotte, Heike Schmidlin, Maho Nagasawa, Wendy Dontje, Julien J. Karrich, Christel Uittenbogaart, Hergen Spits, and Bianca Blom</i>	67
6. In Vivo Modulation of Gene Expression by Lentiviral Transduction in “Human Immune System” Rag2 <sup>-/-</sup> γc <sup>-/-</sup> Mice . . . . . <i>Anja U. van Lent, Mireille Centlivre, Maho Nagasawa, Julien J. Karrich, Stephan M. Poum, Kees Weijer, Hergen Spits, Bianca Blom, and Nicolas Legrand</i>	87
7. Generation of Stable Th1/CTL-, Th2-, and Th17-Inducing Human Dendritic Cells . . . . . <i>Pawel Kalinski, Eva Wieckowski, Ravikumar Muthuswamy, and Esther de Jong</i>	117
8. Pharmacological Modification of Dendritic Cells to Promote Their Tolerogenicity in Transplantation . . . . . <i>Hèth R. Turunquist, Ryan T. Fischer, and Angus W. Thomson</i>	135
9. Towards a Standardized Protocol for the Generation of Monocyte-Derived Dendritic Cell Vaccines . . . . . <i>Michael Erdmann and Beatrice Schuler-Thurner</i>	149

SECTION III	MURINE DENDRITIC CELL METHODS	165
10.	CD8 <sup>+</sup> , CD8 <sup>-</sup> , and Plasmacytoid Dendritic Cell Generation In Vitro Using flt3 Ligand <i>Shalin H. Naik, Meredith O’Keeffe, Anna Proietto, Hubertus Hochrein Ken Shortman, and Li Wu</i>	167
11.	Generation of Large Numbers of Pro-DCs and Pre-DCs In Vitro <i>Shalin H. Naik</i>	177
12.	The Generation of Plasmacytoid and Conventional Dendritic Cells with M-CSF <i>Meredith O’Keeffe, Ben Fancke, and Hubertus Hochrein</i>	187
13.	Isolation of Common Dendritic Cell Progenitors (CDP) from Mouse Bone Marrow <i>Nobuyuki Onai, Markus G. Manz, and Michael A. Schmid</i>	195
14.	The Isolation of Mouse Dendritic Cells from Lymphoid Tissues and the Identification of Dendritic Cell Subtypes by Multiparameter Flow Cytometry <i>David Vremec</i>	205
15.	Isolation of Cutaneous Dendritic Cells <i>Julie Helft and Miriam Merad</i>	231
16.	Isolation of Skin Dendritic Cells from Mouse and Man <i>Patrizia Stoitznier, Nikolaus Romani, Alexander D. McLellan, Christoph H. Tripp, and Susanne Ebner</i>	235
17.	Identification and Isolation of Rodent Respiratory Tract Dendritic Cells <i>Philip A. Stumbles, Deborah H. Strickland, Mathew E. Wikstrom, Jennifer A. Thomas, Christophe von Garnier, and Patrick G. Holt</i>	249
18.	Isolation of Mouse Thymic Dendritic Cell Precursors <i>Li Wu and Angela D’Amico</i>	265
19.	Isolation of Rat Intestinal Lymph DC <i>Simon Milling and Gordon MacPherson</i>	281
20.	Mouse Models of Viral Infection: Influenza Infection in the Lung <i>Adele M. Mount and Gabrielle T. Belz</i>	299
21.	DCs in Mouse Models of Intracellular Bacterial Infection <i>Michael Neuenhahn, Matthias Schiemann, and Dirk H. Busch</i>	319
22.	Studying the Function of Dendritic Cells in Mouse Models of Asthma <i>Philippe Pouliot, Monique A. Willart, Hamida Hammad, and Bart N. Lambrecht</i>	331
23.	Direct Ex Vivo Activation of T cells for Analysis of Dendritic Cells Antigen Presentation <i>Gabrielle T. Belz</i>	351

24.	Methods to Study Pulmonary Dendritic Cell Migration . . . . .	371
	<i>Claudia Jakubzick and Gwendalyn J. Randolph</i>	
25.	Measuring pH, ROS Production, Maturation, and Degradation in Dendritic Cell Phagosomes Using Cytofluorometry-Based Assays . . . . .	383
	<i>Ariel Savina, Pablo Vargas, Pierre Guermonprez, Ana-Maria Lennon, and Sebastian Amigorena</i>	
26.	Adaptive Treg Generation by DCs and Their Functional Analysis . . . . .	403
	<i>Li Wang</i>	
27.	Generation of Parabiotic Mice for the Study of DC and DC Precursor Circulation	413
	<i>Claudia Waskow</i>	
28.	Defining In Vivo Dendritic Cell Functions Using CD11c-DTR Transgenic Mice . . . . .	429
	<i>Liat Bar-On and Steffen Jung</i>	
	<i>Subject Index . . . . .</i>	443

Dendritic Cell Protocols

Naik, S.H. (Ed.)

2010, XVIII, 446 p. 66 illus., 6 illus. in color., Hardcover

ISBN: 978-1-60761-420-3
