
Contents

Preface *v*

Contributors *xiii*

1. RNA Modifications: A Mechanism that Modulates Gene Expression 1
John Karijovich, Athena Kantartzis, and Yi-Tao Yu

2. Quantitative Analysis of RNA Modifications 21
John Karijovich, Athena Kantartzis, and Yi-Tao Yu

3. Advances in RNA Sensing by the Immune System: Separation of siRNA
Unwanted Effects from RNA Interference 33
Mouldy Sioud

4. Progress in siRNA Delivery Using Multifunctional Nanoparticles 53
*Weiwei Gao, Zeyu Xiao, Alex Radovic-Moreno, Jinjun Shi,
Robert Langer, and Omid C. Farokhzad*

5. Optimized Protocols for siRNA Delivery into Monocytes
and Dendritic Cells 69
Anne Mobergslien and Mouldy Sioud

6. Systemic Delivery of Synthetic siRNAs 85
Dag R. Sørensen and Mouldy Sioud

7. What Are the Key Targeted Delivery Technologies of siRNA Now? 91
Mouldy Sioud

8. Using OligoWalk to Identify Efficient siRNA Sequences 107
David H. Mathews

9. Jet-Injection of Short Hairpin RNA-Encoding Vectors
into Tumor Cells 121
Wolfgang Walther, Ulrike Stein, and Hermann Lage

10. Short Hairpin RNA (shRNA): Design, Delivery, and Assessment
of Gene Knockdown 139
*Chris B. Moore, Elizabeth H. Guthrie, Max Tze-Han Huang,
and Debra J. Taxman*

11. Effective Pol III-Expressed Long Hairpin RNAs Targeted
to Multiple Unique Sites of HIV-1 157
Sheena M. Saayman, Patrick Arbuthnot, and Marc S. Weinberg

12.	Functional Studies on RNA-Transfected Cell Microarrays	173
	<i>Christina Seten Fjeldbo, Kristine Misund, Clara-Cecilie Günther, Mette Langaas, Tonje Strømmen Steigedal, Liv Thommesen, Astrid Lagreid, and Torunn Bruland</i>	
13.	Transfection Microarrays for High-Throughput Phenotypic Screening of Genes Involved in Cell Migration	191
	<i>Reiko Onuki-Nagasaki, Akira Nagasaki, Kazumi Hakamada, Taro Q.P. Uyeda, Satoshi Fujita, Masato Miyake, and Jun Miyake</i>	
14.	Intron-Mediated RNA Interference, Intronic MicroRNAs, and Applications	203
	<i>Shao-Yao Ying, Chen Pu Chang, and Shi-Lung Lin</i>	
15.	Inhibition of the microRNA Pathway in Zebrafish by siRNA	237
	<i>Anders Fjose and Xiao-Feng Zhao</i>	
16.	Profiling of miRNA Expression and Prediction of Target Genes	255
	<i>Mouldy Sioud and Lina Cekaite</i>	
17.	Small RNA Cloning	271
	<i>Seungil Ro and Wei Yan</i>	
18.	In Situ Hybridization Detection of microRNAs	285
	<i>Rui Song, Seungil Ro, and Wei Yan</i>	
19.	Detection and Quantitative Analysis of Small RNAs by PCR	293
	<i>Seungil Ro and Wei Yan</i>	
20.	In Vivo Reprogramming of Human Telomerase Reverse Transcriptase (hTERT) by <i>Trans</i> -Splicing Ribozyme to Target Tumor Cells	305
	<i>Sang-Jin Lee, Seong-Wook Lee, Jin-Sook Jeong, and In-Hoo Kim</i>	
21.	Design and Function of Triplex Hairpin Ribozymes	321
	<i>Guillermo Aquino-Jarquin, Ramiro Rojas-Hernández, and Luis Marat Alvarez-Salas</i>	
22.	Catalytic MIGS RNA as an Antiviral Agent in Animals	337
	<i>Yong Bai, Paul Jay Fannin Rider, and Fenyong Liu</i>	
23.	Using Live Cells to Generate Aptamers for Cancer Study	353
	<i>Ling Meng, Kwame Sefah, Dalia Lopez Colon, Hui Chen, Meghan O'Donoghue, Xiangling Xiong, and Weihong Tan</i>	
24.	Primer-Free Aptamer Selection Using a Random DNA Library	367
	<i>Weihua Pan and Gary A. Clawson</i>	
25.	Development of TLR7/8 Small RNA Antagonists	385
	<i>Mouldy Sioud</i>	
26.	Modulation of Dendritic Cell Maturation and Function by siRNA-Bearing 5'-Triphosphate	393
	<i>Mouldy Sioud</i>	

27.	Immunotherapy of Cancer with Dendritic Cells Loaded with Tumor Antigens and Activated Through mRNA Electroporation	403
	<i>An M.T. Van Nuffel, Jurgen Corthals, Bart Neyns, Carlo Heirman, Kris Thielemans, and Aude Bonehill</i>	
28.	Non-MHC-Dependent Redirected T Cells Against Tumor Cells	451
	<i>Hilde Almåsbak, Marianne Lundby, and Anne-Marie Rasmussen</i>	
29.	Overcoming Self-Tolerance to Tumour Cells	493
	<i>Mouldy Sioud</i>	
30.	Recent Advances in Hematopoietic Stem Cell Transplantation and Perspectives of RNAi Applications	505
	<i>Yngvar Floisand and Mouldy Sioud</i>	
	<i>Subject Index</i>	523
