Part I Web-Based Support Systems for Specific Domains

1	Context-Aware Adaptation in Web-Based Groupware Systems	3
	Manuele Kirsch Pinheiro, Angela Carrillo-Ramos, Marlène Villanova-Oliver, Jérôme Gensel, and Yolande Berbers	
1.1	Introduction	4
1.1.1	The Web and the Collaboration Issue in Mobile Environment	4
1.1.2	Adaptation to Web-Based Groupware Systems Mobile Users	5
1.1.3	A Context- and Preference-Based Adaptation for Web-Based Groupware Systems	6
1.1.4	Chapter Organization	7
1.2	Related Work	7
1.3	Context Representation	9
1.4	Representation of the Group Awareness Information	12
1.5	Representing User's Preferences	13
1.5.1	Filtering Rules	14
1.5.2	Context-Aware Profiles	16
1.5.3	Contextual Conditions	17
1.5.4	Personalizing Informational Content	18
1.5.5	Sharing Profiles	20
1.6	Filtering Process	21
1.6.1	Selecting Profiles	21
1.6.2	Selecting and Organizing Content	23
1.7	Implementation	26
1.7.1	BW- \mathcal{M} Framework	26
1.7.2	Implementation Issues	27
1.8	Conclusion	28
	References	29

2	Framework for Supporting Web-Based Collaborative Applications . .	33
	Wei Dai	
2.1	Introduction	33
2.1.1	Barriers and Obstacles	34
2.1.2	Research Motivations	34
2.1.3	Benefits	35
2.1.4	Research Questions and Aims	35
2.2	Research Background	35
2.2.1	Service System	35
2.2.2	Dynamic Re-configurable System	36
2.3	Solution Approach	37
2.3.1	Dynamic Services Management	37
2.3.2	Service Availability	38
2.3.3	Services Invocation and Execution	38
2.4	Application – Web-based Solution for e-Health	39
2.5	Conclusion	41
	References	41
3	Helplets: A Common Sense-Based Collaborative Help Collection and Retrieval Architecture for Web-Enabled Systems	43
	Mohammad Nauman, Shahbaz Khan, and Sanaullah Khan	
3.1	Introduction	44
3.2	Issues in Contemporary Help Systems	45
3.2.1	Tutorial Embedding	46
3.2.2	Tutorial Decomposition	46
3.3	Machine Common Sense	46
3.4	Helplet Architecture	48
3.4.1	Knowledge Collection: Helplets	50
3.4.2	Knowledge Organization: Folksonomy	50
3.4.3	Knowledge Retrieval: Common Sense	52
3.5	Related Work	60
3.6	Conclusion	62
	References	63
4	Web-based Virtual Research Environments	65
	Xiaobo Yang and Robert J. Allan	
4.1	Introduction	65
4.2	Short Review of VREs	67
4.3	Our Experience of VRE	71
4.3.1	Architecture	71
4.3.2	The Sakai Collaborative Learning Framework	72
4.3.3	Prototype: Sakai VRE Portal Demonstrator	73
4.3.4	Production: Psi-k VRE	76
4.3.5	Production: Social Science e-Infrastructure VRE	77
4.4	Further Discussion and Summary	78
	References	79

5	Web-Based Learning Support System	81
	Lisa Fan	
5.1	Introduction	81
5.2	Learning and Learning Support Systems	82
5.3	Functions of Web-based Learning Support Systems	83
5.4	Designs and Implementation of a WLSS	85
5.5	The Proposed Framework Based on KSM	88
5.6	Rough set-based Learning Support to Predict Academic Performance	89
5.6.1	Survey and Data Collection	90
5.6.2	Results and Discussion	91
5.7	Conclusion	93
	References	94
6	A Cybernetic Design Methodology for ‘Intelligent’ Online Learning Support	97
	Stephen R. Quinton	
6.1	Introduction	97
6.2	Rationale	99
6.3	The Need for ‘Intelligent’ Cognition Support Systems	100
6.4	Metacognition as the Primary Learning Goal	103
6.5	A Brief History of Cognition Support Systems	106
6.6	Enabling Effective Cognition and Metacognition Development	110
6.7	Relationships and Connectedness: Pathways to Meaning	112
6.8	A Model for Constructing “Intelligent” Cognition Support Systems	115
6.9	Conclusion	119
6.10	Research Questions for Further Study	121
	References	122
7	A Web-Based Learning Support System for Inquiry-Based Learning	125
	Dong Won Kim and JingTao Yao	
7.1	Introduction	125
7.2	Web-Based Learning Support Systems and Inquiry-Based Learning	126
7.2.1	Web-Based Learning Support Systems	126
7.2.2	Web Services	127
7.2.3	Online-Learning Games	127
7.2.4	Inquiry-Based Learning	128
7.2.5	Web-Based Learning Support Systems for Inquiry-Based Learning	129
7.3	Modeling <i>Online Treasure Hunt</i>	129
7.3.1	Treasure Hunts	129
7.3.2	Treasure Hunt Model for Inquiry-Based Learning	130

7.4	Implementation of <i>Online Treasure Hunt</i>	132
7.4.1	Architecture of Online Treasure Hunt	132
7.4.2	Teaching Support Subsystem	133
7.4.3	Learning Support Subsystem	134
7.4.4	Treasure Hunt Game	135
7.4.5	Treasure Hunt Process	136
7.5	A Demonstrative Example of the System	137
7.6	Conclusion	141
	References	142

Part II Web-Based Applications and WSS Techniques

8	Combinatorial Fusion Analysis for Meta Search Information Retrieval	147
	D. Frank Hsu and Isak Taksa	
8.1	Introduction	147
8.2	Combinatorial Fusion Analysis	151
8.2.1	Multiple Scoring Systems	151
8.2.2	Rank/Score Function and the Rank-Score Characteristics (RSC) Graph	152
8.2.3	Rank and Score Combination	155
8.2.4	Performance Evaluation	156
8.2.5	Diversity	159
8.3	Combinatorial Fusion Analysis Applications in Information Retrieval	160
8.3.1	Predicting Fusion Results	160
8.3.2	Comparing Rank and Score Combination	161
8.4	Conclusion and Future Work	162
	References	163
9	Automating Information Discovery Within the Invisible Web	167
	Edwina Sweeney, Kevin Curran, and Ermai Xie	
9.1	Introduction	168
9.2	The Deep Web	169
9.3	State of the Art in Searching the Deep Web	172
9.3.1	Automatic Information Discovery from the Invisible Web	173
9.3.2	Query Routing: Finding Ways in the Maze of the Deep Web	174
9.3.3	Downloading the Hidden Web Content	175
9.3.4	Information Discover, Extraction, and Integration for Hidden Web	178
9.4	Conclusion	180
	References	180

Part III Design and Development of Web-Based Support Systems

14	A Web-Based System for Managing Software Architectural Knowledge	305
	Muhammad Ali Babar	
14.1	Introduction	305
14.2	Background and Motivation	306
	14.2.1 Architecture-Based Software Development	307
	14.2.2 Knowledge Management Issues in Software Architecture Process	308
	14.2.3 Support for Architectural Knowledge Management	309
14.3	Tool Support for Managing Architectural Knowledge	310
	14.3.1 The Architecture of PAKME	310
	14.3.2 The Data Model of PAKME	312
	14.3.3 Implementation	313
14.4	Managing Architectural Knowledge with PAKME	315
	14.4.1 Capturing and Presenting Knowledge	316
	14.4.2 Supporting Knowledge Use/Reuse	319
14.5	An Industrial Case of Using PAKME	322
	14.5.1 Use of PAKME's Knowledge Base	324
	14.5.2 Use of PAKME's Project Base	324
	14.5.3 Observations from the Study	325
14.6	Related Work	328
14.7	Summary	329
	References	330
15	CoP Sensing Framework on Web-Based Environment	333
	S.M.F.D. Syed Mustapha	
15.1	Introduction	333
15.2	Community of Practice (CoP) Characteristics	335
15.3	CoP Objects in the Social Learning Framework	338
15.4	Web-Based System for Sensing Social Learning Framework	338
	15.4.1 Community Structure	340
	15.4.2 Learning Through Participation and Reification	345
	15.4.3 Negotiation of Meaning	347
	15.4.4 Learning as Temporal	348
	15.4.5 Boundary Objects and Boundary Encounters	349
	15.4.6 Mutual Engagement, Joint Enterprise, and Shared Repertoire	350
	15.4.7 Identity	353
15.5	Integrated Schema of the Entire System	354
15.6	Conclusion	355
	References	355

16	Designing a Successful Bidding Strategy Using Fuzzy Sets and Agent Attitudes	359
	Jun Ma and Madhu Lata Goyal	
16.1	Introduction	359
16.2	Related Works	360
16.3	A Fuzzy Bidding Strategy (FA-Bid)	362
16.3.1	Basic Scenario	362
16.3.2	FA-Bid Overview	363
16.3.3	Attribute Evaluation	364
16.3.4	Attitude Estimation	366
16.3.5	Overall Assessment	366
16.3.6	Agent Price Determination	367
16.4	Conclusions	368
