| | | |
|----------|---|----|
| 1 | Introduction: the Global Risk Arena, Technological Systems and This Book | 1 |
| | Per Jacobsson, Göran Grimvall, Åke J. Holmgren, and Torbjörn Thedéen | |
| 1.1 | Technological Risk-driving Forces..... | 1 |
| 1.2 | Technology and Three Kinds of Risk | 4 |
| 1.3 | The Philosophy of the Book | 4 |
| 1.4 | Technological Risks with Which This Book Is Not Concerned | 5 |
| 1.5 | The Readership..... | 5 |
| | References | 6 |
| 2 | Reflections on Risks and Technology | 7 |
| | Lennart Sjöberg and Torbjörn Thedéen | |
| 2.1 | Risks and Technology | 7 |
| 2.2 | What Is a Risk?..... | 8 |
| 2.3 | History of Risk Research..... | 9 |
| 2.4 | What Is an Acceptable Risk? | 10 |
| 2.5 | Society's Reaction to Risks..... | 12 |
| 2.6 | Risks in the Public Debate | 15 |
| | References | 17 |
| 3 | Risks in the Past and Present | 19 |
| | Birgitta Odén | |
| 3.1 | Background | 19 |
| 3.2 | The Problem | 20 |
| 3.3 | The Historical Perspective | 21 |
| 3.4 | Changing Society | 21 |
| 3.5 | Assessment and Prevention of Risks..... | 23 |

| | | |
|----------|---|-----------|
| 3.5.1 | Risks in Traditional Society..... | 23 |
| 3.5.2 | War..... | 24 |
| 3.5.3 | Homicide and Manslaughter..... | 24 |
| 3.5.4 | Contagious Disease..... | 25 |
| 3.5.5 | Transport and Communication | 26 |
| 3.5.6 | Fire..... | 29 |
| 3.5.7 | Natural Catastrophes..... | 31 |
| 3.6 | Fatal Accidents in the Past and the Present | 31 |
| | Acknowledgments | 33 |
| | References | 33 |
| 4 | The Dangerous Steam Engine | 35 |
| | Jan Hult | |
| 4.1 | Safety Devices | 35 |
| 4.2 | Early Accidents in the Home Country of the Steam Engine | 37 |
| 4.3 | Simultaneous Development in the USA | 38 |
| 4.4 | Nuclear Engineering — Steam Technology at the Crossroads..... | 40 |
| 4.5 | Other Examples of Historical Safety Measures | 42 |
| 4.5.1 | Dramatic Accidents and Slowly Acting Dangers | 42 |
| 4.5.2 | The Falun Mine..... | 42 |
| 4.5.3 | The Otis Elevator..... | 42 |
| 4.5.4 | Sundry Safety Equipment..... | 43 |
| 4.6 | Concluding Remarks | 44 |
| | References | 44 |
| 5 | Risks and Safety in Building Structures | 47 |
| | Håkan Sundquist | |
| 5.1 | Introduction | 47 |
| 5.2 | Structures Are Degraded by Use and by the Environment | 47 |
| 5.2.1 | Commonly Occurring Loads | 47 |
| 5.2.2 | The Environment | 48 |
| 5.2.3 | Use | 48 |
| 5.2.4 | Accidental Loads Due to Human Activity..... | 48 |
| 5.2.5 | Nature Reclaims..... | 49 |
| 5.2.6 | Violent Natural Loads..... | 49 |
| 5.2.7 | The Richter Scale for Earthquakes – an Empirical Scale..... | 50 |
| 5.3 | How Does a Design Engineer Think? | 51 |
| 5.4 | Human Errors | 54 |
| 5.4.1 | We Are All Humans | 54 |
| 5.4.2 | Quality | 54 |
| 5.4.3 | Control | 54 |
| 5.5 | Learning Through Accidents..... | 55 |
| 5.5.1 | The Leaning Tower of Pisa..... | 55 |
| 5.5.2 | The Getå Accident – the Worst Train Accident in Sweden . | 56 |
| 5.5.3 | The Worst Building Accident Due to a Structural Fault in | |

| | | |
|----------|---|-----------|
| | Modern Times – a Combination of Errors..... | 57 |
| 5.5.4 | What Has Been Learned About the Risk of Gas Explosions?..... | 59 |
| 5.5.5 | Loads Due to Terrorism..... | 60 |
| 5.5.6 | Do Not Always Trust Beautiful Computer Calculations..... | 61 |
| 5.5.7 | Bridges Which Collapse – Learning from History | 63 |
| 5.5.8 | Bridges Which Shake Down. The Engineer Must Also Learn from History..... | 63 |
| 5.5.9 | Fatigue Failure and Other Phenomena in Metallic Materials | 64 |
| 5.5.10 | The Designer's Nightmare – the Unforeseen Load | 65 |
| 5.6 | Safety Regulations Within the Building Sector | 66 |
| 5.7 | Concluding Remarks | 67 |
| | References | 67 |
| 6 | Risks in the Conversion of Energy..... | 69 |
| | Monica Gullberg and Torbjörn Thedéen | |
| 6.1 | Introduction | 69 |
| 6.2 | Energy Concepts | 69 |
| 6.3 | The World's Energy Supply | 70 |
| 6.4 | Energy Systems and Energy Use | 71 |
| 6.5 | Examples of National Energy Balances | 72 |
| 6.6 | Risks in Energy Systems..... | 73 |
| 6.7 | Methods for the Evaluation of Risks in the Conversion of Energy .. | 74 |
| 6.8 | Examples of Risks in Energy Conversion..... | 74 |
| 6.8.1 | Disaster Risks | 74 |
| 6.8.2 | Risks During Normal Operation..... | 79 |
| 6.9 | Evaluation and Comparison of the Risks Associated with Energy Conversion..... | 81 |
| 6.10 | Energy Today and in the Future | 82 |
| | References | 83 |
| 7 | Chemical and Physical Health Risks – Chemicals, Radiation, and Noise | 85 |
| | Ulf Ulfvarson | |
| 7.1 | Environment, Technology, and Health | 85 |
| 7.2 | How Do We Know What Is Harmful..... | 86 |
| 7.2.1 | Tests of Functions and Other Tests | 87 |
| 7.2.2 | Epidemiology..... | 87 |
| 7.2.3 | Statistics of Injuries | 88 |
| 7.2.4 | Data on Exposure and Uptake in the Body..... | 88 |
| 7.2.5 | Examination of Materials and Equipment | 89 |
| 7.2.6 | Assessment of Chemical Health Risks in the Environment . | 89 |
| 7.3 | Chemical Health Risks in the Environment and in the Work Environment | 89 |
| 7.3.1 | Uptake of Xenobiotics in the Body | 90 |

| | | |
|----------|--|------------|
| 7.3.2 | What Are the Chemical Effects on the Body? | 90 |
| 7.3.3 | Chemical Health Risks of Current Interest | 91 |
| 7.3.4 | Health Effects of Fine Particles | 92 |
| 7.3.5 | Nanoparticles | 94 |
| 7.3.6 | Air Quality Standards of Fine Particles | 95 |
| 7.3.7 | Diesel Exhaust | 96 |
| 7.3.8 | Indoor Environment Causing Ill-health | 97 |
| 7.4 | Limit Values | 98 |
| 7.5 | Physical Risk Factors | 99 |
| 7.5.1 | Radiation | 99 |
| 7.5.2 | The Influence of Radiation on the Body | 101 |
| 7.5.3 | The Chernobyl Accident | 102 |
| 7.5.4 | Non-ionizing Radiation | 104 |
| 7.5.5 | Limit Values for Radiation | 106 |
| 7.6 | Noise | 106 |
| 7.6.1 | Influence of Noise on Health and Well-being | 107 |
| 7.6.2 | Limit Values for Noise | 108 |
| 7.7 | Environment and Health in a Holistic Perspective | 108 |
| | References | 109 |
| 8 | Safety Factors and Exposure Limits | 113 |
| | Sven Ove Hansson | |
| 8.1 | Numerical Decision Tools | 113 |
| 8.2 | Safety Factors | 113 |
| 8.3 | What Do Safety Factors Protect Against? | 116 |
| 8.4 | Exposure Limits | 117 |
| 8.5 | Dose-response Relationships | 117 |
| 8.6 | Collective Dose Limits | 120 |
| 8.7 | Remaining Uncertainties | 120 |
| | References | 122 |
| 9 | How dangerous Is It to Travel? | 123 |
| | Torbjörn Thedén, Evert Andersson, Lena Mårtensson, and Olle Rutgersson | |
| 9.1 | Introduction | 123 |
| 9.2 | Risks Associated with the Road Traffic System | 125 |
| 9.3 | Risks Associated with Rail Travel | 127 |
| 9.3.1 | How Safe Is Rail Travel? | 127 |
| 9.3.2 | What Are Possible Causes of Accidents? | 128 |
| 9.3.3 | Safety Has Improved | 128 |
| 9.4 | Risks Associated with Aviation | 130 |
| 9.4.1 | Aircraft Accidents | 130 |
| 9.4.2 | Surprised by Automation at Gottröra | 130 |
| 9.4.3 | Überlingen Midair Collision | 133 |
| 9.4.4 | What Is Being Done to Improve Flight Safety? | 133 |
| 9.5 | Risks Associated with the Sea | 135 |

| | | |
|------------|--|------------|
| 9.5.1 | From Daredevil Enterprise to Safe Cruising Traffic | 135 |
| 9.5.2 | Accident Statistics..... | 136 |
| 9.5.3 | Authorities and International Organizations..... | 137 |
| 9.5.4 | Regulation for the Safety of Ships..... | 138 |
| 9.5.5 | The Estonia Accident and Its Consequences for the Future Safety at Sea..... | 139 |
| 9.5.6 | A Few Reflections on Survival Equipment and Attitudes.... | 140 |
| References | | 141 |
| 10 | IT – Risks and Security | 143 |
| | Viiveke Fåk | |
| 10.1 | Computers and IT Systems | 143 |
| 10.2 | Computer-related Risks..... | 144 |
| 10.3 | Where Do We Find Computers and Related Risks? | 147 |
| 10.4 | In What Ways Can a Computer Fail? | 149 |
| 10.5 | Why Do IT Systems Typically Fail?..... | 150 |
| 10.6 | Deliberate Attacks on IT Systems..... | 152 |
| 10.7 | Counter-measures Against IT-related Risks and Failures..... | 154 |
