Conference Committees.....	vii

ICMA Lectures

Asko Ellman

Designing Mobile Work Machines in Cyber Space	1
---	---

Yuichi Utsumi

Proposal of 3D Micro Prototyping Using Synchrotron Radiation and Its Application to Bio-Microsystems	7
--	---

Medical applications

Makoto Yagihashi, Hirohisa Narita and Hideo Fujimoto

Surgical Tool Based Preoperative Planning System for Total Hip Arthroplasty	15
---	----

Hirohisa Narita, Kakeru Harusawa, Makoto Yagihashi and Hideo Fujimoto

A Trial of Numerical Calculation of Wear for Artificial Hip Joints	21
--	----

Noriko Masuta, Makoto Yagihashi, Hirohisa Narita and Hideo Fujimoto

A Non-invasive Method to Measure Joint Range of Motion for Hip Joints	27
---	----

Assembly

Masaya Sanji, Tomonori Nakamura, Masato Suzuki and Seiji Aoyagi

Robot Task of Pin Insertion to a Hole without Chamfering and with Small Clearance Using Fuzzy Control	33
---	----

Hidefumi Wakamatsu, Minoru Matsuishi, Eiji Morinaga and Eiji Arai

Disassembly Support System for Used Products Considering Destruction of Their Parts	37
---	----

Tohru Sasaki and Yoshihiro Sakai

The Discriminative Method of the Insertion Using a Cantilever Model for the Optical Fiber Array Automatic Assemble	43
--	----

Tomomi Yamaguchi, Naomichi Furushiro and Masahiro Higuchi

Application of the Active Flexible Fixture to a Peg-in-hole Task	49
--	----

Hydraulic and pneumatic control

Tapio Virvalo

Comparison of Tracking Controllers of Hydraulic Cylinder Drive by Simulations	55
---	----

Y. Liu, H. Handroos, O. Alkkiomäki, V. Kyrki and H. Kälviäinen

Development of a Hybrid Position/Force Controlled Hydraulic parallel Robot for Impact Treatment	61
---	----

Huapeng Wu, Pekka Pessi, Yongbo Wang and Heikki Handroos

Modeling and Control of Water Hydraulic Driven Parallel Robot	69
---	----

Rehabilitation and Orthosis systems

Takehito Kikuchi, Sousuke Tanida,, Kikuko Otsuki, Taigo Kakehashi and Junji Furusho

Development of Intelligent Ankle-Foot Orthosis (i-AFO) with MR Fluid Brake and Control System for Gait Control	75
--	----

Takehito Kikuchi, Takuya Ozawa, , Kazuki Fukushima and Junji Furusho

Development of Force-Measurable Grip and Software for "PLEMO", Rehabilitation System for Upper Limbs Based on Physical Therapy	81
--	----

Ying Jin, Takehito Kikuchi, Junji Furusho and Hiroki Akai

Mechanism Design and Software of Quasi-3-DOF Active-Passive Rehabilitation System for Upper Limbs, "Hybrid-PLEMO"	87
---	----

Kunihiko Oda, Yuuki Ohyama, Junji Furusho, Takehito Kikuchi and Shiro Isozumi

6-DOF Stand-Alone Rehabilitation System 'Robotherapist' and Its Applications to Stroke Patients	91
---	----

<i>Shahrol Mohamaddan and Mohd Shahril Osman</i>	
Development of Grip Mechanism Assistant Device for Finger Rehabilitation	95

Legged robots

<i>Satoshi Tsuda, Kuniya Shinozaki and Ryohei Nakatsu</i>	
Development and Evaluation of a Centaur Robot	101
<i>Jining Liu, Yoshitsugu Kamiya, Hiroaki Seki and Masatoshi Hikizu</i>	
Motion Simulation for a Stance Robot by Repeatedly Direct Kinematics	107
<i>Takuya Fukuda, Tomohito Takubo, Yasushi Mae and Tatsuo Arai</i>	
Manipulation Method Using Wheeled-Hand Mechanism for Humanoid Robot	113
<i>Masafumi Miwa, Hiroyasu Sakane, Kenji Nagase, Yasuhiro Koshimoto and Shigeki Tuchitani</i>	
Study on One-legged Robot Jumping	119

Control and Simulation

<i>Masafumi Miwa, Ittetsu Shiraishi, Makoto Matsushima and Kiyoshi Minami</i>	
Remote Control Support System for R/C Helicopter	125
<i>Junso Kimura</i>	
Finite-Time Settling Control restraining Amplitude of Control Input by Linear Programming	131
<i>Koji Funamoto, Naoki Uchiyama, Masaya Hattori, Shigenori Sano and Shoji Takagi</i>	
Robust Control of Mechanical Systems with Nonlinear Friction Considering Compliance of Transmission Mechanism	137
<i>Masahiko Kita, Tohru Ishida, Koji Teramoto and Yoshimi Takeuchi</i>	
Size Reduction and Performance Improvement of Automatic Discharge Gap Controller for Curved Hole Electrical Discharge Machining	143
<i>Joni Sallinen, Tero Eskola and Heikki Handroos</i>	
Design of a Motion Platform for a Mobile Machine Simulator by Utilizing 6-D Measurements and Inverse Dynamics Analysis	149

Position measurement

<i>Tomohiro Tanahashi, Akihiro Torii, Masaaki Banno, Akiteru Ueda and Kae Doki</i>	
A Position Measurement Method for a Miniature Mobile Robot Using Three Moving Landmarks	153
<i>Yasuhiro Kawahara, Hiroshi Yoshida and Hiroshi Hosaka</i>	
Transport Equipment Positioning System Using Accelerometer and PHS	159
<i>Xiaofeng Wu, Florent Servillat, Shinji Yamazaki, Tsuyoshi Taki, Ryohei Nakatsu, Masafumi Okajima, Tadashi Enomoto, Satoshi Kagami, Simon Thompson and Yoshifumi Nishida</i>	
A Four-legged Robot Connected to Ubiquitous Devices in a Home	165
<i>Sho Komai, Tomomi Kuroda, Masaharu Takano, Seiji Aoyagi and Eiji Fukui</i>	
Development of Invisible Mark and Its Application to a Home Robot	171

Actuators

<i>Shinji Yamazaki, Yoshihiro Yasumuro and Masahiko Fuyuki</i>	
Adaptive Polyhedral Subdivision for Image-based Lighting	177
<i>Katsushi Furutani and Atsushi Furuta</i>	
Comparison of Driving Performance of Piezoelectric Actuator - Current Pulse Drive and Voltage Linear Drive -	183
<i>Jun Iwasaki, Tomohiro Ishii, Satoru Yoshikawa, Hiroshi Hosaka and Ken Sasaki</i>	
Steady State Analysis of Gyroscopic power Generator	189
<i>Yoichi Kadota, Hiroshi Hosaka and Takeshi Morita</i>	
Characterization of Shape Memory Piezoelectric Actuator and Investigation of the Origin of the Imprint Electrical Field	195

Manufacturing systems

<i>Koji Iwamura, Norihisa Mayumi, Yoshitaka Tanimizu and Nobuhiro Sugimura</i>	
--	--

A Study on Real-time Scheduling for Holonic Manufacturing Systems - Application of Reinforcement Learning -	201
---	-----

Shigeru Harashima and Katsuhisa Ohno

Flexible Production Systems developed and utilized in DENSO CORPORATION and their Evaluation	205
--	-----

Kiyohiko Hori, Tsuneo Kawano and Keiichi Shirase

Promotion Methods of Job Redesigning for Elderly Workers on the Production Line	211
---	-----

Yoshitaka Tanimizu, Yoshiyuki Sakashita, Koji Iwamura and Nobuhiro Sugimura

Human-Oriented Dynamic Task Reallocation and Rescheduling in Cellular Manufacturing Systems	217
---	-----

Applicaion of vision

Tatsuya Ogino, Yoshihiro Yasumuro and Masahiko Fuyuki

Shape Data Registration based on Structured Light Pattern Direction	223
---	-----

Hiroyuki Ukida and Yasuyuki Yamanaka

Object Tracking System Using Pan-Tilt Cameras and Arm Robot	229
---	-----

Driving support and Wheel chair

Takafumi Asao, Kentaro Kotani and Ken Horii

Influence of Reaching Actions on Driving Performance	235
--	-----

Hideki Tomimori, Yoshio Ishida, Ken Sasaki, Yasuhiko Nakano and Satoshi Sano

Measurement of a Car Driver's Pulse Interval while Driving with One Hand	241
--	-----

Tatsuto Suzuki, Hironobu Uchiyama, Junichi Kurata, Yoshihiro Murakami and Masako Baba

Validation of Performances on Attendant Propelled Wheelchairs with Assisting Control Based on Autonomous Propelling Model	245
---	-----

Optimization and Reasoning

Masahiro Arakawa

Hierarchy Genetic Algorithm to Solve Multi-Objective Scheduling Problems Involving Various Types of Assignments for Parallel Processing System	251
--	-----

Yoshichika Tanaka, Hirohisa Narita, Ren Kanehira and Hideo Fujimoto

Productivity Analysis of Closed-loop Manufacturing System Which Performs Maintenance Activities	257
---	-----

Toshiya Kaihara, Nobutada Fujii, Hiroyuki Hasegawa and Shinji Kurose

A Study on Optimization Method with Combinatorial Auction -Application to Resource Allocation Problem of Re-entrant Flow Shop-	263
--	-----

Robots

Atsushi Kohama, Ryosuke Mori, Sho Komai, Masato Suzuki, Seiji Aoyagi, Jun Fujioka and Yoshitsugu Kamiya

Calibration of Kinematic Parameters of a Robot Using Neural Networks by a Laser Tracking System	269
---	-----

Kuniya Shinozaki, Akitsugu Iwatani and Ryohei Nakatsu

Construction and Evaluation of a Robot Dance System	275
---	-----

Masanori Goka, Akira Tsumaya and Toshiharu Taura

Evolutionary Artificial Neural Networks using Extended Minimal Simulation on Evolutionary Robotics	281
--	-----

Hirofumi Niimi, Minoru Koike, Seiichi Takeuchi and Noriyoshi Douhara

ROBO-BLOCK and Rational Formula of Robots	287
---	-----

Sensors

Ryota Ishibashi, Ryuta Ozawa and Sadao Kawamura

Experimental Verification of a Mass Measurement Device under Zero Gravity with a Prismatic Variable Stiffness Mechanism	293
---	-----

Takuro Aonuma, Shinya Kumagai, Minoru Sasaki, Motoki Tabata and Kazuhiro Hane

Piezoresistive Rotation Angle Sensor in Micromirror for Feedback Control	299
--	-----

Kenta Maekawa, Yoshito Tanaka, Takayuki Fujita and Kazusuke Maenaka

Proposal of 2-axis Bulk-PZT Gyroscope	305
---	-----

<i>Jungmyoung Ju, Yutaka Yamagata, Kozo Inoue and Toshiro Higuchi</i> A Study on Atomization Characteristics of Surface Acoustic Wave Atomizer using Laser Doppler Anemometry	309
--	-----

Manufacturing

<i>Tatsuhiko Sakaguchi, Toshiaki Shimauchi and Keiichi Shirase</i> Scheduling Based Collision Avoidance for Multitasking Machine	313
<i>Keiichi Nakamoto, Kouta Otake, Toshimichi Moriwaki and Keiichi Shirase</i> Development of a Support System of Operation Planning for Parallel Kinematic Machine Tool	317
<i>Eiji Morinaga, Yutaka Matsuura, Ryohei Satoh, Kouji Nakagawa, Reo Usui, Yoshiharu Iwata, Hidefumi Wakamatsu and Eiji Arai</i> Method of Process Parameter Identification and Resist Profile Design for Thin-Film Pattern Formation	323
<i>Michiya Matsushima, Naohiro Kawai, Hiroyuki Fujie, Kiyokazu Yasuda and Kozo Fujimoto</i> Visual Inspection of Soldering Joints by Neural Network with Multi-angle View and Principal Component Analysis	329

Robot control

<i>Chikatoyo Nagata, Eri Sakamoto, Masato Suzuki and Seiji Aoyagi</i> Path Generation and Collision Avoidance of Robot Manipulator for Unknown Moving Obstacle using Real-time Rapidly-exploring Random Trees (RRT) Method	335
<i>Kenji Hiraoka and Seiji Aoyagi</i> Path Searching of a Robot Manipulator Using Reinforcement Learning and Self-Organizing Maps	341
<i>Ali Muhammad, Jouni Mattila, Tapio Virvalo and Matti Vilenius</i> Improved Positioning Accuracy for a Water Hydraulic Manipulator with State Feedback Controller	347
<i>Hiroaki Ichii and Sadao Kawamura</i> Trajectory Tracking Feedback Control of Robot Manipulators with Coupled Dynamics of Force and Position	353

Elements and Components

<i>Norio Tagawa, Hisamitsu Yano and Atsunobu Mori</i> Experimental Study of Lubricant Depletion in Laser-assisted Magnetic Recording	359
<i>Toshinori Ohashi, Hiroshi Hosaka and Takeshi Morita</i> Light Transmittance Memory Effect of Ferroelectric Materials Induced by Electrical Imprint Field	363

Machine tools

<i>Nelfa Desmira, Hirohisa Narita and Hideo Fujimoto</i> A Minimization of Environmental Burden of High-Speed Milling	367
<i>Jun'ichi Kaneko, Koji Teramoto, Kenichiro Horio and Yoshimi Takeuchi</i> Fast Estimation Method of Workpiece Shape in NC Machining Process for Prediction of Instantaneous Cutting Force	373
<i>Yoshitaka Morimoto</i> Development of 2-dimensional Contouring by Endless Wire Saw	379
<i>Yasufumi Kume</i> Application of Cusp Surface Analysis to Jumping Phenomenon	385

Authors' Index	391
-----------------------------	-----

Service Robotics and Mechatronics

Selected Papers of the International Conference on
Machine Automation ICMA2008

Shirase, K.; Aoyagi, S. (Eds.)

2010, XII, 392 p., Hardcover

ISBN: 978-1-84882-693-9
