

Contents

1	Introduction.....	1
1.1	Global Energy Sources	1
1.2	Fossil Fuel Sources.....	3
1.2.1	The History of Petroleum.....	4
1.2.2	Petroleum Refining	6
1.2.3	Petroleum Products and Fuels.....	9
1.2.4	Coal.....	13
1.2.5	Chemicals and Fuels from Coal	15
1.2.6	Natural Gas	17
1.2.7	Gas Hydrates.....	17
1.2.8	Oil Shale	18
1.2.9	Tar Sands	19
1.2.10	Natural Bitumen and Extra-heavy Oil.....	20
1.3	Renewable Energy Sources	21
1.3.1	Biomass.....	22
1.3.2	Hydropower	43
1.3.3	Geothermal Energy	46
1.3.4	Wind Energy	47
1.3.5	Solar Energy.....	48
1.3.6	Other Renewable Energy Sources.....	50
1.3.7	Municipal Solid Waste and Landfill Gas	50
1.4	Nuclear Fuel Sources.....	52
1.5	Summary	53
	References.....	54
2	Natural Gas	57
2.1	Introduction	57
2.2	Definition and History	59
2.3	Origin of Natural Gas	60
2.4	Natural Gas Resources.....	61

2.5	Natural Gas Production, Consumption, and Distribution	62
2.6	Compressed Natural Gas	65
2.7	Liquefied Natural Gas	66
2.8	Contribution of Natural Gas to Global Warming	67
2.9	Use of Natural Gas	68
2.9.1	Industrial Uses	69
2.9.2	Residential Use	70
2.9.3	Electricity Generation using Natural Gas.....	71
2.9.4	Commercial Use.....	72
2.9.5	Natural Gas in the Transportation Sector	72
2.10	Importance of Natural Gas	73
2.11	Environmental Impacts.....	73
2.12	Summary	75
	References.....	76
3	Gas Hydrates.....	77
3.1	Introduction	77
3.1.1	Definition	79
3.1.2	History	80
3.1.3	Gas Hydrate Origin and Formation.....	81
3.1.4	Clathrates and Crystalline Clathrate Solids.....	85
3.1.5	Storage of Hydrogen in Clathrates.....	86
3.2	Chemical Structures.....	87
3.2.1	Chemical Structure of the Water Molecule.....	87
3.2.2	Chemical Structure of the Methane Molecule.....	89
3.2.3	Crystalline Structure of Water Ice.....	90
3.2.4	Crystalline Structure of Gas Hydrate	91
3.3	Crystal Types of Gas Hydrates.....	92
3.3.1	Clathrate Structure I	94
3.3.2	Clathrate Structure II.....	95
3.3.3	Clathrate Structure H	96
3.4	Methane Gas Fuel.....	98
3.4.1	Combustion of Methane.....	100
3.4.2	Main Reactions of Methane	103
3.5	Summary	107
	References.....	108
4	Methane Gas Hydrate: as a Natural Gas Source	113
4.1	Introduction	113
4.2	Importance of Methane Hydrates	114
4.3	Global Climate Change	116
4.3.1	Air Pollution.....	116
4.3.2	Greenhouse Effect.....	121
4.3.3	Global Warming.....	122
4.3.4	Arguments Against Global Warming.....	125

4.3.5	Kyoto Protocol	125
4.3.6	Carbon Credits	126
4.3.7	Carbon Sequestration	127
4.4	Effects of Methane Hydrates on Climate Change	128
4.5	World's Methane Hydrate Resources	132
4.5.1	Gas Hydrates on the North Slope, Alaska	136
4.5.2	Gas Hydrates in the Gulf of Mexico	136
4.5.3	Gas Hydrates in Russia's West Siberian Basin	137
4.5.4	Gas Hydrates in Canada	137
4.5.5	Projects Related to Methane Hydrates in Japan, India, China, Malaysia, and Korea	138
4.5.6	A Case Study: Methane Hydrates in the Black Sea	139
4.6	Properties of Methane Hydrates	141
4.7	Methane Hydrate Stability	143
4.8	Facilities for Recovery of Methane from Methane Hydrate	147
4.8.1	Disposal of Impurities from Methane	148
4.8.2	Gas Hydrate Research and Development	148
4.9	Properties of Seawater	150
4.10	Summary	154
	References	155
5	Processes for Methane Production from Gas Hydrates	161
5.1	Introduction	161
5.2	Depressurization Process	163
5.3	Thermal Stimulation Process	165
5.4	Chemical Inhibitor Injection Process	166
5.5	Gas Hydrate Reservoirs	169
5.5.1	Arctic Hydrates	169
5.5.2	Marine Hydrates	170
5.6	Seafloor Drilling of the Hydrate Zone for Exploration and Production of Methane	171
5.7	Possible Transportation Routes	174
5.8	Economic and Political Issues	176
5.9	Summary	177
	References	178
	Index	183

Methane Gas Hydrate

Demirbas, A.

2010, X, 186 p. 47 illus., Hardcover

ISBN: 978-1-84882-871-1
