

# Contents

**Abbreviations.....xxxi**

**1 Evolution of Supply Chain Management (SCM)..... 1**

1.1 Role of SCM in Enterprise Management ..... 1

1.2 Predecessors and Establishment of SCM ..... 4

1.2.1 Market and Enterprise Management Developments 1960–2010 ..... 4

1.2.2 Objective Economic Grounds of SCM Development..... 4

1.2.3 Development and Merit of SCM ..... 5

1.2.4 Organizational Aspects of SCM..... 6

1.3 SCM and Related Disciplines ..... 10

1.3.1 Logistics and SCM ..... 10

1.3.2 The Multi-disciplinary Nature of SCM ..... 12

1.3.3 The Main Directions of Research on SCM..... 13

References..... 15

**2 Conceptual Frameworks for SCM..... 19**

2.1 Agile, Flexible and Responsive Supply Chains ..... 19

2.1.1 Postponement, Modularization and Agility ..... 20

2.1.2 Virtualization and Agility ..... 21

2.1.3 Coordination and Agility ..... 22

2.1.4 Flexibility, Coordination and Agility ..... 22

2.2 Vision of the Adaptive SCM (A-SCM): Conceptual Framework ..... 23

2.2.1 Adaptive Supply Chains: State of the Art ..... 23

2.2.2 Basic Terms and Definitions ..... 26

2.2.3 A-SCM Framework..... 27

2.2.4 A-SCM Drivers and Organization ..... 28

2.2.5 Application Issues ..... 31

References..... 31

**3 Decision-making Support for SCM..... 35**

3.1 Model-based Decision-making Support..... 35

3.1.1 Models: Basic Terms and Classifications..... 35

3.1.2 Mathematical Models ..... 39

3.1.3 Information Models..... 40

3.2 Information Systems-based Decision-making Support..... 42

3.2.1 Coordination and Information Technologies..... 42

3.2.2 Classification of Information Technologies in SCM..... 44

3.2.3 Impact of Information Technology on Management..... 46

3.3 Integrated Frameworks of Decision-making Support ..... 47

3.3.1 Information View of Integrated Modelling Frameworks ..... 47

3.3.2 Mathematical View of Integrated Modelling Frameworks..... 48

3.3.3 Main Requirements for Integrated Decision-support Systems .....	49
References .....	52
<b>4 Challenges in Research on Modern and Future Supply Chains .....</b>	<b>57</b>
4.1 Potential Supply Chain Performance and Stability .....	57
4.2 Uncertainty and Dynamics.....	58
4.3 Interrelations and Optimality of Decisions .....	59
4.4 Multi-structural Nature of Supply Chains.....	60
4.5 Multi-Disciplinary Modelling.....	61
4.6 Establishing Links to Product Life Cycle, Related Enterprise Management Functions and the Environment .....	62
4.7 Information Technologies and Organizational Aspects .....	63
4.8 Twelve Main Misunderstandings of SCM.....	63
References .....	65
<b>5 Uncertainty, Risk and Complexity.....</b>	<b>69</b>
5.1 Origins and Variety of Uncertainty.....	69
5.1.1 Uncertainty and Perturbation Impacts .....	69
5.1.2 Sources of Uncertainty .....	70
5.1.3 Uncertainty Within the Complexity Management.....	73
5.2 Risk Management in Supply Chains.....	74
5.3 Supply Chains as Complex Systems.....	76
5.4 Practical Issues of Uncertainty in Supply Chains .....	78
References .....	79
<b>6 Handling Uncertainty in Supply Chains .....</b>	<b>81</b>
6.1 Supply Chain Security .....	81
6.1.1 Purposeful Perturbation Influences on Supply Chains .....	81
6.1.2 The Concept and Tools of Supply Chain Security .....	82
6.2 Supply Chain Vulnerability .....	84
6.2.1 Prevention of Non-purposeful Perturbation Impacts on Supply Chains .....	84
6.2.2 Supply Chain Adjustment in the Case of Non-purposeful Perturbation Impacts .....	85
6.3 Managerial Impacts to Handle Uncertainty in Supply Chains.....	86
6.3.1 Supply Chain Reliability .....	87
6.3.2 Supply Chain Flexibility and Adaptation .....	87
References .....	89
<b>7 STREAM: Stability-based Realization of Economic Performance and Management .....</b>	<b>93</b>
7.1 Necessity for STREAM.....	93
7.2 Economic Performance and Stability of Supply Chains: A Strategic Analysis .....	94
7.2.1 “Waterline” Concept for Stability Analysis .....	94
7.2.2 Factors of Stability Decrease and Maintenance .....	95

7.3 Terminological Basics of Global Stability Analysis at the Tactical– Operational Level .....	96
7.4 Interrelations of Properties.....	100
7.4.1 Robustness, Adaptability and Adaptation .....	101
7.4.2 Resilience and BIBO Stability.....	103
7.4.3 Supply Chain Global Stability and Manageability .....	105
7.5 Example of Decision Making in the Case of Perturbation Influences.....	108
7.6 General Algorithms of Supply Chain (Re)planning Under Uncertainty ..	110
7.6.1 General Algorithm of Supply Chain Planning.....	110
7.6.2 General Algorithm of Supply Chain Replanning .....	113
References.....	116
<b>8 Quantitative Modelling of Supply Chains .....</b>	<b>119</b>
8.1 Operations Research .....	119
8.1.1 Optimization.....	119
8.1.2 Simulation .....	121
8.1.3 Heuristics.....	123
8.2 Control Theory.....	124
8.2.1 Control Theory Basics.....	124
8.2.2 Advantages of Control Theory Application in the SCM Domain ....	127
8.2.3 Shortcomings and Requirements for Extension .....	129
8.3 Complex Adaptive Systems and Multi-agent Systems .....	130
8.4 Critical Analysis .....	131
References.....	132
<b>9 DIMA – Decentralized Integrated Modelling Approach .....</b>	<b>137</b>
9.1 General Basics of DIMA .....	137
9.2 Active Modelling Objects.....	139
9.3 Integration Views.....	140
9.4 Multi-model Complexes and Qualimetry of Models .....	143
9.5 Decentralization .....	147
9.6 Integrated Modelling for Supply Chain Adaptive Planning and Execution .....	148
References.....	150
<b>10 Structure Dynamics Control and Multi-model Analysis.....</b>	<b>153</b>
10.1 On the Control Approach: Conceptual and Mathematical Issues .....	153
10.2 Basics of Structure Dynamics Control.....	155
10.3 Multi-model Description of Supply Chain Control Processes .....	159
10.4 General Formal Statement of the Supply Chain Structure Dynamics Control Problem .....	162
10.5 Generalized Dynamic Model of Supply Chain Control Processes ( <i>M</i> Model).....	164
10.6 Main Phases and Steps of Optimal Structure Dynamics Control Modelling.....	166

10.6.1 Supply Chain Synthesis Algorithm .....	166
10.6.2 Method of Attainable Sets for the Evaluation of Supply Chain Goal Abilities .....	166
10.6.3 Supply Chain Resynthesis Algorithm .....	170
References .....	171
<b>11 Adaptive Planning of Supply Chains.....</b>	<b>173</b>
11.1 Planning .....	173
11.2 Adaptive Planning .....	176
11.3 Adaptation Framework .....	177
11.4 Controller Concept.....	179
11.5 Supply Chain Planning Levels and Their Reflections .....	180
References .....	182
<b>12 Modelling Operations Dynamics, Planning and Scheduling .....</b>	<b>185</b>
12.1 Research Approach.....	185
12.2 Dynamic Models of Operations Dynamics Control.....	186
12.2.1 Dynamic Model of Collaborative Operations Control .....	187
12.2.2 Dynamic Model of Resource Control.....	191
12.2.3 Dynamic Model of Flow Control .....	192
12.2.4 Integrated Dynamic Model of Supply Chain Operations Control ..	194
12.2.5 Formal Problem Statement of Complex Operations Dynamics Control .....	195
12.3 Algorithms of Operations Dynamics Planning and Scheduling.....	195
12.3.1 Transformation of the Optimal Control Problem to the Boundary Problem .....	195
12.3.2 Existing Methods for Optimal Control Based on the Maximum Principle.....	199
12.3.3 Propocsed Algorithm of Supply Chain Scheduling.....	201
12.4 Concluding Remarks .....	202
References .....	203
<b>13 Supply Chain Reconfiguration and Models' Adaptation.....</b>	<b>205</b>
13.1 Variety of Supply Chain Reconfiguration Issues.....	205
13.2 Mathematical Model of the Supply Chain Reconfiguration .....	206
13.3 Algorithms of Supply Chain Parametrical and Structural Model Adaptation .....	213
13.3.1 Parametric Adaptation.....	214
13.3.2 Structural Adaptation .....	216
References .....	218
<b>14 Models of Supply Chain Global Stability and Manageability .....</b>	<b>219</b>
14.1 General Remarks on the Evaluation of Supply Chain Goal Abilities ....	219
14.2 Construction of the Attainable Sets .....	220
14.3 Dynamic Multi-criteria Model of Supply Chain Global Stability Analysis .....	223

14.4 Stability Analysis Models for Different Input Data .....	224
14.4.1 Deterministic Data.....	224
14.4.2 Stochastic Data .....	227
14.4.3 Interval Data.....	228
14.5 Stability Index Calculation .....	230
References.....	232
<b>Chapter 15 Experimental Environment .....</b>	<b>233</b>
15.1 Concept of the United Experimental Environment .....	233
15.2 Integrated Supply Chain Planning and Scheduling.....	234
15.3 Supply Chain Stability Analysis .....	238
References.....	241
<b>Conclusion.....</b>	<b>243</b>
Discussion of Findings.....	243
Future Research Outlook .....	249
<b>Glossary .....</b>	<b>251</b>
<b>Notations .....</b>	<b>257</b>
<b>Index .....</b>	<b>267</b>
