

## Additional Materials

Directories contain:

**src** - Java source files;

**classes** - Java class files;

**example..** - examples.

### To run examples you need:

JVM 1.6 or higher and Java 3D 1.5 or higher installed.

You can download JDK or JRE and Java 3D API from:

<http://java.sun.com/javase/downloads/>

<http://java.sun.com/javase/technologies/desktop/java3d/>

### To compile Java source files into Java class files:

You need Java compiler installed. Java compiler `javac` is a part of JDK.

Compilation is performed with the following two lines (your current directory contains subdirectories `src` and `classes`)

```
javac -verbose -sourcepath src -d classes src/fea/*.java
```

```
javac -verbose -sourcepath src -d classes src/gener/*.java
```

These two commands are placed in file `jc.bat`.

### To run examples:

Go to an example directory and follow directions of ReadMe file.
