

Contents

1 Progression of Product Manufacturing Technologies	1
1.1 Introduction to Product Manufacturing.....	1
1.2 Historical Changes in Product Manufacturing Methodology Paradigms....	4
Exercises	7
2 Evaluative Criteria for Product Manufacturing and Optimization	
Fundamentals.....	9
2.1 Evaluative Items and Criteria in Product Manufacturing.....	9
2.1.1 Product Quality and Product Performance	10
2.1.2 Manufacturing Cost.....	10
2.1.3 Product Demand, Lead Time, Inventory, and Delivery.....	11
2.1.4 Items Pertaining to Production Method.....	13
2.1.5 Flexibility in Manufacturing.....	15
2.1.6 Processing Capability	17
2.1.7 Safety and Reliability	19
2.1.8 Natural Environment and Natural Resources	20
2.1.9 Mental Satisfaction Level.....	21
2.2 Criteria Requirements	22
2.3 Relationships Between Criteria and Optimization	26
Exercises	32
References.....	33
3 Technologies for Product Manufacturing Innovation.....	35
3.1 Generation of Better Products from Wider Feasibilities	35
3.2 Generation from Conceptual Design Stages	36
3.3 Concurrent Engineering.....	37
3.4 Collaboration	46
Exercises	55
References.....	55
4 Involvement of People in Product Manufacturing	57
4.1 Roles of Individuals in Product Manufacturing.....	57
4.1.1 Human Abilities	57

4.1.2 Relationships Between Customers and Manufacturers	59
4.2 Kansei Engineering.....	60
4.3 Ergonomics	69
4.4 Collaboration Circumstances.....	74
Exercises.....	77
References	78
5 Product Manufacturing Support Technologies	79
5.1 Representative Supporting Systems.....	79
5.1.1 Product Shape Description Technologies.....	80
5.1.2 Technologies for Analysis of Performance Characteristics.....	83
5.1.3 Technologies that Support Generation of Product Ideas	85
5.1.4 Database Technologies.....	90
5.1.5 Manufacturing Support Technologies	91
5.1.6 Technologies to Acquire Information Concerning Customer Needs.....	107
5.1.7 Technologies Supporting Enterprise Management.....	110
5.2 Utilization of Information Technology for Product Manufacturing	111
Exercises.....	114
References	115
6 Optimization Technologies for Product Manufacturing.....	117
6.1 Fundamental Optimization Technologies and Difficulties in their Application	117
6.1.1 Linear Programming Problems	118
6.1.2 Nonlinear Programming Problems and Local Optimum Solutions .	118
6.1.3 Multiobjective Optimization Problems	123
6.1.4 Optimization Problems Including Discrete Variables	126
6.1.5 Genetic Algorithms (GAs)	129
6.1.6 Large Scale Optimization Problems.....	130
6.2 Fundamental Strategies for Effectively Applying Optimization Methods	131
6.3 Fundamental System Optimization Approaches.....	134
6.3.1 Decision-making Sequence Applied to Task Operations and Optimization of Evaluative Characteristics.....	134
6.3.2 Two Stage Integrated Optimization	138
6.4 System Design Optimization Strategies.....	145
6.4.1 Features of Machine Product Characteristics and Fundamental Optimization Strategies	145
6.4.2 Priority Relationships among Characteristics	148
6.4.3 Creation of Hierarchical Optimization	152
6.4.4 Conflicting Relationships Between Characteristics	153
6.4.5 Construction of Hierarchical Optimization Procedures.....	153
6.4.6 Practical Procedures for Product Optimization	155

6.4.7 Discussion Concerning System Design Optimization	162
6.5 Optimum Selection Method for Alternative Design Solutions	162
Exercises	167
References	167
7 Decision-making Methods.....	171
7.1 Decision-making Difficulties and Fundamentals of Decision-making ...	171
7.1.1 Decision-making Difficulties	171
7.1.2 Fundamental Schemes to Facilitate Decision-making	172
7.2 Fundamentals of Decision-making	173
7.2.1 Method for Selecting the Best Alternatives when There Are Many Evaluative Factors	173
7.2.2 Calculation of Weighting Coefficients for Attributes Using the Pair Comparison Method	173
7.2.3 Finding the Best Alternative from Among Several Alternatives Using the Analytic Hierarchy Process (AHP) Method	176
7.2.4 Decision-making Using Subjective Probability Under Uncertain Circumstances	177
7.2.5 Decision-making Considering Personal Preferences of a Decision-maker	179
7.3 Methodologies for Decision-making in Collaborative Circumstances ...	181
Exercises	184
References	184
8 Design Optimization for Creativity and Balance.....	185
8.1 Creativity Optimization Based on Collaborative Effort.....	185
8.2 Cultural Impact of Product Manufacturing	189
Exercises	190
References	191
Index	193

System Design Optimization for Product Manufacturing

Yoshimura, M.

2010, XIII, 200 p., Hardcover

ISBN: 978-1-84996-007-6
