Part I Definitions

What Is Engineering Asset Management?	3
Joe E. Amadi-Echendu, Roger Willett, Kerry Brown, Tony Hope, Jay Lee, Joseph Mathew, Nalinaksh Vyas and Bo-Suk Yang	
1 Introduction	4
2 Viewpoints in the Literature About Engineering Asset Management	5
3 Basic Concepts in Engineering Asset Management	7
3.1 What Is an ‘Engineering’ Asset?.....	8
3.2 Engineering Asset Management	11
4 Requirements and Challenges for Broad Based EAM.....	12
5 Conclusions	15
References.....	16

Part II Concepts

Identifying Core Functions of Asset Management	19
Vladimir Frolov, Lin Ma, Yong Sun and Wasana Bandara	
1 Introduction	20
2 Method.....	21
2.1 Industry Type Classification	22
2.2 Identification of Terminology	23
2.3 Level Classification.....	24
2.4 Development of Matrix Templates	25
2.5 Preliminary Extraction of Functions	26
2.6 Synthesis and Analysis of Extracted Functions	26
3 Examples	27
4 Conclusions	29
References.....	29

A Framework for Strategic Infrastructure Asset Management	31
Eric G. Too	
1 Introduction	31
2 Development of Asset Management.....	33
3 Method.....	37
3.1 Data Sources	38
3.2 Data Analysis	39
4 The Goals of Infrastructure Asset Management	40
4.1 Asset Management Goal 1 – Cost Efficiency	43
4.2 Asset Management Goal 2 – Capacity Matching.....	44
4.3 Asset Management Goal 3 – Meeting Customer Needs/Requirements	44
4.4 Asset Management Goal 4 – Market Leadership	45
5 Emerging Framework: The Strategic Infrastructure Asset Management (SIAM) Processes	45
5.1 Capacity Management Process	49
5.2 Options Evaluation Process.....	50
5.3 Procurement & Delivery Process	52
5.4 Maintenance Management Process	54
5.5 Asset Information Management Process.....	56
6 Conclusions	58
Appendix 1: Definition of Asset Management	59
Appendix 2: Case Profile	60
References.....	60

Part III Scope (Investment and Cost Control)

Regulating Asset Management Through Serviceability and a Common Framework for Investment Planning	65
Derek Parsons	
1 Introduction	66
2 Regulation of the Water Industry in England and Wales	66
3 Regulation of Capital Maintenance	67
3.1 Monitoring and Challenging Effectiveness of Capital Maintenance	67
3.2 Determination of Changes to Historic Levels of Capital Maintenance	68
3.3 Stage C – Efficiency Challenge and Incentive Mechanism	69
3.4 Stage D – Adjustments for Enhancement Expenditure – Benefit to Serviceability.....	70
4 Economic Constraints to Limit the Price Paid by Customers.....	70

5	Maintaining the Flow of Services to Customers: ‘Serviceability’	72
5.1	Assessing Serviceability: Anticipating Future Problems from an Historical Perspective	72
6	Appropriate Serviceability Indicators	73
6.1	Service Indicators	74
6.2	Asset Performance Indicators	74
6.3	Examples of Serviceability Indicators	74
6.4	Issues Around Serviceability Indicators	75
6.5	Update on Serviceability Indicators	75
7	Assessment of Serviceability	76
7.1	Assessment Marks	77
7.2	What Is Meant by ‘Stable’ Serviceability?	77
7.3	Issues Around Achieving and Maintaining Stable Serviceability	78
7.4	Monitoring Serviceability from 2010	79
8	Capital Maintenance Planning – A Common Framework (CMPCF)	81
9	Assessment of the Application of CMPCF Principles	83
9.1	Assessment at PR04 (2004)	83
9.2	Issues Around CMPCF Assessment at PR04	84
9.3	Assessment at PR09 (2009)	85
9.4	Behavioural Management Through Dissemination of PR09 Asset Management Assessments	87
9.5	Administrative Issues at PR09	88
10	CMPCF and PAS55	88
11	The Forward Look – Gaining Confidence in Deterioration Modelling ..	89
12	Discussion: Are the Outcomes of PR04 and PR09 Sustainable?	89
13	Most Recent Conclusions on PR09 – Taken from PR09/37	90
	References	92
	Optimizing Budget Allocations in Naval Configuration Management	95
	Andrew Colin, Roger Willett and Peter Lambrineas	
1	Configuration Management	95
2	Existing Capability Management Approaches	96
3	Defining Capability, Risk and Return	97
4	Discussion	99
5	Mean-Variance Optimization	100
6	The Algorithm	101
7	Numerical Issues	104
8	Future Work	111
9	Conclusions	112
	References	112

Modelling Total Cost of Ownership of Rail Infrastructure for Outsourcing Maintenance Services	115
A. Rahman and G. Chattopadhyay	
1 Introduction	115
2 Total Cost of Ownership.....	116
3 Total Cost of Ownership for Rail	117
3.1 Modelling Costs of Maintenance Over the Lifecycle.....	117
3.2 Modelling Inspection Cost	120
3.3 Modelling Risk Costs.....	120
3.4 Total Cost of Ownership	121
4 Contribution and Future Scope.....	121

 Capacity Investment Planning Based on Real Options	 137
Tony J. Rosqvist	
1 Introduction	138
2 Capacity Investment Based on Real Options.....	140
2.1 Definitions of Capacity	140
2.2 Definitions of Real Options	141
2.3 Two-Period Investment Model: Planning and Decision-Making.....	142
3 Investment Portfolio Assessment	144
3.1 Specification of Feasible Real Option.....	144
3.2 Evaluation of the Investment Portfolio	145
4 Worked Example	149
5 Discussion	153
6 Conclusions	154
References.....	154

Part IV Scope (Asset Data and Condition Monitoring)

Business Rule Discovery Through Data Mining Methods	159
Jing Gao, Andy Koronios, Steve Kennett and Halina Scott	
1 Introduction	160
2 Research Problem and Importance	160
2.1 Relative Narrow Focus of the Current DQ Research	160
2.2 A Different Approach and a New Research Perspective – Business Rule Discovery	161
3 Business Rules Brief View	162
4 Evolving Business Rule Expression	163
5 Research Aim	164
6 Research Methods	165
7 Preliminary Finding.....	167
8 Conclusions	170
References.....	171
 Potential Uses of RFID Technology in Asset Management	173
Abrar Haider and Andy Koronios	
1 Introduction	174
2 Issues in Contemporary Asset Management.....	175
2.1 Remote Condition Monitoring	175
2.2 Spares Supply Chain	176
2.3 Configuration Management	177
3 Fundamentals of RFID Technology	178
4 RFID Applications.....	181
5 Making Use of the Uniqueness.....	181
6 Evaluation of RFID Technologies for Asset Management.....	183
6.1 RFID for Configuration Management.....	183
6.2 RFID for Supply Chain Management	186
6.3 RFID for Condition Monitoring.....	189
7 Challenges Posed to RFID.....	193
8 Conclusions	193
References.....	194
 Wireless Condition Monitoring and Embedded Novelty Detection	195
