Part I Strategy for Improving Profitability and Productivity

1	Changing Strategy for Productivity and Profitability Activity	3
1.1	Is Japanese Productivity Really High in World Competition?	3
1.2	Constantly Declining Profit Margins.....	5
1.3	Potential for Major Profitability Increases.....	7
1.4	Enhancing Corporate Dignity Rather than Economic Growth	10
1.4.1	Changing from Growth to Maturity	11
1.4.2	Estrangement Results Between Welfare and Gross National Product	12
1.4.3	One Crucial Assignment of Productivity	12
1.4.4	Company Dignity Should Be Enhanced.....	13
1.5	Strategy for Manufacturing	14
1.6	Case Studies: Successful Companies in Productivity	15
1.6.1	Productivity	15
1.6.2	Profitability	18
1.6.3	Effectiveness in Unit Labor Costs.....	20
	References.....	22
2	Systematic Approach for Manufacturing Strategy.....	23
2.1	Seven Losses Regarding Productivity and Profitability	23
2.2	Feasibility Study of Productivity Improvement.....	24
2.2.1	Difference Diagnosis and Different Results.....	24
2.2.2	Symptoms and Background	27
2.2.3	Points of Feasibility Study Practice	28
2.2.4	Practice of Feasibility Study	30
2.2.5	Sensitivity Analysis of Profitability	32
2.3	Four Levels of Manufacturing Strategy.....	34
2.3.1	The First Level: Recognizing Poor Levels and Conquering Them.....	34

2.3.2	The Second Level: Eradicate Old Corporate Position.....	35
2.3.3	The Third Level: Preparing an Auditing System for Production	35
2.3.4	The Fourth Level: Accomplishing WCM	36
	References.....	37
3	General Meaning of Engineering As It Relates to Management	39
3.1	Definition of Engineering.....	39
3.2	Management and Management Engineering	40
3.2.1	Management Should Always Include Measurement.....	41
3.2.2	How Much Productivity Improvement Is Expected?	42
3.2.3	Methods Improvement Based on Engineering Approach	42
3.3	Industrial Engineering and Productivity.....	43
3.4	Necessity of Facts (Work Measurement).....	45
	References.....	45

Part II Theory of Productivity

4	Definition of Productivity/Requirements for Improving It.....	49
4.1	What Is Productivity?	49
4.2	Purpose of Productivity Improvement.....	52
4.3	Different Approaches Lead to Different Results	54
4.3.1	Input Reduction First	54
4.3.2	Engineering Approach for Productivity	56
4.3.3	Three Levels of Improvement.....	57
	References.....	64

Part III Outline of the Engineering Approach to Productivity

5	Three Dimensions of Productivity	67
5.1	Points of Successful Productivity	67
5.2	Relationship of M, P, and U to Standard Time.....	68
5.2.1	Dimension of Methods.....	69
5.2.2	Dimension of Performance	71
5.2.3	Dimension of Utilization.....	73
5.3	Methods and Performance Meaning with Standard Time	76
5.4	Meaning of Standard Time on the Productivity Dimension	78
	References.....	80
6	Methods Design Concept.....	81
6.1	Application Results	81
6.1.1	Improvement of Workers Number	81

6.1.2	Improvement of Set-up Operations	83
6.1.3	Sequence Analysis for Mechanized Machine	84
6.2	Fundamental Points of MDC	86
6.2.1	Disregard or Leave Behind Current Methods	86
6.2.2	Functional Analyses with Output Definition	87
6.2.3	New Ideas Through Creative or Innovative Thinking.....	87
6.2.4	Faithful Reflection of Management Requirements or Policy	87
6.2.5	Target/Kaizenshiro Oriented Design.....	87
6.3	Features of MDC	87
6.3.1	What Is the Objective of Applying MDC?.....	87
6.3.2	Designing New Methods with an Engineering Approach.....	88
6.3.3	Focusing Function of Work Contents	89
6.3.4	New Methods Are Easy to Implement	92
6.3.5	Design Company Owns Original Methods	92
6.4	Areas of Design	93
6.4.1	Manufacturing Methods.....	93
6.4.2	Manufacturing Systems.....	93
6.4.3	Management Systems	94
6.5	Development Steps of MDC.....	95
6.5.1	Freedom from Three Restrictions – What is the Real Reason?.....	108
6.5.2	Discarding Fictitious Restrictions	109
6.5.3	Separate to Find a Solution	110
6.5.4	Successful Brainstorming	111
6.5.5	Limited Hours of Brainstorming/Three Rounds	111
6.5.6	Two Stages for Identifying Ideas	112
6.5.7	Reasonable Theme Setting.....	112
6.5.8	Demand 100 Ideas.....	112
6.5.9	Aid for Finding Ideas	113
	References.....	120
7	Work Measurement.....	121
7.1	Standard Time	121
7.1.1	Definition of Standard Time	121
7.1.2	Why Standard Time Is Effective?	123
7.1.3	Two Standards of Working Pace.....	123
7.1.4	How to Set Standard Time, Measuring Methods?	129
7.1.5	Crucial Steps for Setting Basic Time	133
7.1.6	Maintaining Standard Methods and Time	141
7.2	Allowances	144
7.3	Performance Control	144
7.3.1	Cases of Improved Performance	144
7.3.2	Three Control Systems for Shop Floors.....	146

7.3.3	Why Performance Improved?	146
7.3.4	Keys to a Successful Performance Improvement.....	154
	References.....	158
8	White-collar Productivity	161
8.1	Managing Office Productivity: a Tool for White-collar Work	161
8.2	Feasibility Study for Office Productivity.....	162
8.3	Methods of Managing Office Productivity Outline.....	163
	Reference	166
 Part IV Monitoring Productivity		
9	MBM: Measurement/Monitoring-based Management	169
9.1	Monthly Productivity Reports	169
9.2	Two Measures of Office Productivity	173
	Reference	174
 Part V Keys to Success for Improved Management		
10	Changing for Productivity	177
10.1	Creation of New Methods in MDC	177
10.1.1	Manning Number Depends on Production Rate.....	177
10.1.2	“What You Can Do” vs. “What You Should Do”.....	179
10.1.3	A New Standard vs. New Practice	179
10.1.4	MDC Practice Is Not an Objective.....	180
10.1.5	The Importance of Performance Control: Practical Hints.....	180
10.2	Developing an Innovation-Minded View of Organization with Performance Control	181
10.3	Designing Systems for Success	183
10.3.1	Top-down Activities	183
10.3.2	Design Approach	186
10.3.3	Full-time Project Teams.....	187
10.3.4	A Key Person Is the Project Leader	188
	Appendix	191
A.1	Sequential Activity and Methods Analysis (SAM)	191
A.1.1	Introduction to the SAM System.....	191
A.1.2	Supplementary Activities	192
A.1.3	SAM Symbols for the Supplementary Activities	193
A.1.4	Repetitive Activities.....	193
A.1.5	The SAM System Analysis Form	194
A.1.6	Theoretical Balance Time for the SAM System	194

A.1.7	SAM System Activities.....	195
A.1.8	Repetitive Activities.....	201
A.2	MTM-1 Data Cards	208
A.3	MTM-2 Data Card.....	211
A.4	Motion Economy.....	213
A.4.1	Principles of Motion Economy as Related to Use of the Human Body	213
A.4.2	Principles of Motion Economy as Related to Use of the Work Place.....	213
A.4.3	Principles of Motion Economy as Related to the Design of Tools and Equipment.....	214
A.5	Work Sampling.....	214
A.5.1	Calculation of Sampling Sizes	215
A.6	25% Selection.....	217
	References.....	218
Bibliography.....		219
Index		221
