Contents

1 Introduction 1
1.1 The Quest for Great Design: Great Designers 2
1.2 Building Buildings and Systems 2
1.3 Humans Know and How They Know It 3
1.4 A Fusion of Perception, Conception, and Construction 3
1.5 A Note of Disclosure to the Reader 6
Reference 6

Part I Thriving Systems Theory

2 Christopher Alexander's Nature of Order 9
2.1 Order, Complexity, and Human Perception 10
2.2 Wholeness and Centers 11
2.3 Choices as Centers 12
2.4 Wholeness and Center Properties 12
References 14

3 Wholeness and Center Properties Mapped to Modeling 15
3.1 Levels of Scale to Stepwise Refinement 15
3.2 Strong Centers to Cohesion 16
3.3 Boundaries to Encapsulation 16
3.4 Alternating Repetition to Extensibility 17
3.5 Positive Space to Modularization 17
3.6 Good Shape to Correctness 17
3.7 Local Symmetries to Transparency 18
3.8 Deep Interlock and Ambiguity to Composition of Function 19
3.9 Contrast to Identity 19
3.10 Gradients to Scale 19
3.11 Roughness to User Friendliness 20
3.12 Echoes to Patterns 20
3.13 The Void to Programmability 21

3.14 Simplicity and Inner Calm to Reliability 21
3.15 Not Separateness to Elegance 22
3.16 Examining the Mapping from Center Properties to Choice Properties 22
References 26

4 Achieving Versus Observing Strength in Choice Properties 27
4.1 Stepwise Refinement (To Elaborate) 27
4.2 Cohesion (To Factor) 29
4.3 Encapsulation (To Encapsulate) 29
4.4 Extensibility (To Render Extendable) 30
4.5 Modularization (To Modularize) 30
4.6 Correctness (To Align) 31
4.7 Transparency (To Expose) 32
4.8 Composition of Function (To Assemble) 32
4.9 Identity (To Identify) 32
4.10 Scale (To Focus) 33
4.11 User Friendliness (To Accommodate) 34
4.12 Patterns (To Pattern) 34
4.13 Programmability (To Generalize) 35
4.14 Reliability (To Normalize) 35
4.15 Elegance (To Coordinate) 36
4.16 Modeling Actions: Syntax and Semantics 36

5 Building *Life* into Information Systems 39
5.1 A Life-Infusing Process for Building Information Systems 39
5.2 Applying Alexander's Generative Building Process 40
5.3 Complexity and the Improbability of Working Systems 40
5.4 Generated Structures: Top-Down Versus Bottom-Up 41
5.5 Accident of Implementation: Threat to System Life 42
5.6 Peripheral Vision in the "Mind's Eye" 43
References 44

6 A Vision of Thriving Systems 47
6.1 The "Field-Effect" of Choice Properties 47
6.2 Choice Property Coherence 48
6.3 Choice Property Clustering 49
6.4 Choice Property Cluster Contribution to Wholeness 51
6.5 Exploring the "Field-Effect" of the Clusters 56
6.5.1 Divisibility: The Field-Effect of Cluster "A" 56
6.5.2 Factorability: The Field-Effect of Cluster "B" 57
6.5.3 Constructibility: The "Field-Effect" of Cluster "C" 59
6.5.4 Confidence: The "Field-Effect" of Cluster "D" 60
6.5.5 Predictability: The "Field-Effect" of Cluster "E" 61
6.5.6 Usability: The "Field-Effect" of Cluster "F" 63

6.5.7 Intuitiveness: The "Field-Effect" of Cluster "G" 64
6.5.8 Scalability: The "Field-Effect" of Cluster "H" 66
6.5.9 Fidelity: The "Field-Effect" of Cluster "I" 67
6.5.10 Effectiveness: The "Field-Effect" of Cluster "J" 68
6.5.11 Robustness: The "Field-Effect" of Cluster "K" 70
6.5.12 Sustainability: The "Field-Effect" of Cluster "L" 71
6.5.13 Vitality: The "Field-Effect" of Cluster "M" 73
6.5.14 Thriving: The "Field-Effect" of Cluster "N" 74
6.6 Directing the "Field-Effect" of Property Clusters 76
6.7 The Consequence of Thriving Systems Theory 78
6.8 Historical Reverberations 79
References 80

Part II Thriving Systems Theory in Systems Development

7 Metaphorology 83
7.1 The Basics of Conceptual Metaphor 83
7.2 The Metaphor in Thought: Lakoff's Embodied Mind 85
7.3 Lakoff's Embodied Mind Meets Alexander's Nature of Order 87
7.4 Metaphors and Patterns 88
References 88

8 Metaphor-Driven Modeling 91
8.1 The Nature of Systems 91
8.2 The Utility of Modeling 92
8.3 Modeling: Crafting Conceptual Metaphors 93
8.4 Modeling Essence: Recognizing Accident 95
8.5 Quality Through Conceptual Metaphors 97
References 98

9 Protecting *Life* in System Life Cycles 99
9.1 Common Models of System Concerns 100
9.2 Model Conjugation and Transparency 100
9.3 The Paradox of Modeling Essence in the Now 103
Reference 103

10 Metaphor-Driven Systems Engineering 105
10.1 Software Engineering 105
10.2 Systems Engineering 106
10.3 Ordering the Now/Accommodating the Future: Architecture 106
10.4 Architecture in Thriving Systems Theory 107
10.5 Essence Versus Accident: Bifurcation or Continuum? 109
10.6 Information Systems Ecology: Managing Life 111
10.7 Checklist for Modeling Thriving Systems 112
References 113

11 Thriving Systems and Beauty 115
11.1 "Objective" System Quality Assessment 115
11.2 "Subjective" System Quality Assessment 116
11.3 The Experience of Quality in Observation 117
11.4 Is It Beauty or Is It Thriving? 120
References 121

12 Promoting *Life* Using the Object-Oriented Paradigm 123
12.1 An Ontology of the Object-Oriented Paradigm 123
12.2 Modeling Living Structure in the Object-Oriented Paradigm 126
12.2.1 Stepwise Refinement 127
12.2.2 Cohesion 128
12.2.3 Encapsulation 129
12.2.4 Extensibility 129
12.2.5 Modularization 130
12.2.6 Correctness 130
12.2.7 Transparency 131
12.2.8 Composition of Function 132
12.2.9 Identity 133
12.2.10 Scale 133
12.2.11 User Friendliness 134
12.2.12 Patterns 135
12.2.13 Programmability 135
12.2.14 Reliability 136
12.2.15 Elegance 137
12.3 Programming Languages Versus Ontology 137
References 138

13 Promoting *Life* Using the Relational Paradigm 139
13.1 An Ontology of the Relational Paradigm 139
13.2 Modeling Living Structure in the Relational Paradigm 143
13.2.1 Stepwise Refinement 144
13.2.2 Cohesion 144
13.2.3 Encapsulation 145
13.2.4 Extensibility 145
13.2.5 Modularization 145
13.2.6 Correctness 146
13.2.7 Transparency 146
13.2.8 Composition of Function 147
13.2.9 Identity 147
13.2.10 Scale 148
13.2.11 User Friendliness 148
13.2.12 Patterns 149
13.2.13 Programmability 149

13.2.14 Reliability 150
13.2.15 Elegance 150
13.3 Programming Languages Versus Ontology 150
References 151

14 Thriving Systems Through Metaphor-Driven Modeling 153
14.1 No Perfect Models: Only Useful Ones 153
14.2 Processes That Generate Useful Models 154
14.3 Useful Models as Enculturated Organisms 155
14.4 Modeling the Business Organism 156
14.5 Modeling the Business Process Organism 157
14.6 Modeling the Software Organism 158
14.7 Disambiguating Essence and Accident 159
14.8 Models Unfolding as Metaphors 160
14.9 The Pace of Life 160
14.10 Engineering Thriving Systems 161
References 161
