
Contents

| | |
|---|---------------|
| 1 Introduction to Finite-element-model Updating..... | 1 |
| 1.1 Introduction | 1 |
| 1.2 Finite-element Modeling | 2 |
| 1.3 Vibration Analysis | 5 |
| 1.4 Domains Used for Finite-element-model Updating | 6 |
| 1.4.1 Modal-domain Data (MDD)..... | 6 |
| 1.4.2. Frequency-domain Data..... | 9 |
| 1.5 Finite-element-model Updating Methods..... | 10 |
| 1.6 Computational Intelligence Methods | 17 |
| 1.7 Outline of the Book | 18 |
| References | 18 |
| 2 Finite-element-model Updating Using Nelder–Mead Simplex and Newton Broyden–Fletcher–Goldfarb–Shanno Methods..... | 25 |
| 2.1 Introduction | 25 |
| 2.2 Introduction to Structural Dynamics | 26 |
| 2.3 Expansion/Reduction Methods..... | 28 |
| 2.3.1 Model Expansion and Reduction Procedures | 28 |
| 2.3.2 Model Reduction | 28 |
| 2.3.3 Model Expansion | 31 |
| 2.4 Methods for Comparing Data..... | 33 |
| 2.4.1 Direct Comparison..... | 33 |
| 2.4.2 Frequency-response Functions Assurance Criterion (FRFAC) | 34 |
| 2.4.3. The Model Assurance Criterion (MAC)..... | 35 |
| 2.4.4 The Coordinate Modal Assurance Criterion (COMAC)..... | 36 |
| 2.5 Optimization Methods..... | 36 |
| 2.5.1 Nelder–Mead Simplex Method..... | 36 |
| 2.5.2 Quasi-Newton Broyden–Fletcher–Goldfarb–Shanno (BFGS) Algorithm..... | 38 |
| 2.6 Example 1: Simple Beam | 40 |
| 2.7 Example 2: Unsymmetrical H-shaped Structure | 41 |
| 2.8 Conclusion | 44 |

| | |
|--|-----------|
| 2.9 Further Work | 44 |
| References | 44 |
| 3 Finite-element-model Updating Using Genetic Algorithm | 49 |
| 3.1 Introduction | 49 |
| 3.2 Mathematical Background | 51 |
| 3.3 Genetic Algorithm | 53 |
| 3.3.1 Initialization | 56 |
| 3.3.2 Crossover | 56 |
| 3.3.3 Mutation | 56 |
| 3.3.4 Selection | 57 |
| 3.3.5 Termination | 57 |
| 3.4 Nelder–Mead Simplex Optimization Method | 58 |
| 3.5 Example 1: Simple Beam | 59 |
| 3.6 Example 2: Unsymmetrical H-shaped Structure | 61 |
| 3.7 Conclusion | 63 |
| 3.8 Future Work | 63 |
| References | 63 |
| 4 Finite-element-model Updating Using Particle-swarm Optimization | 67 |
| 4.1 Introduction | 67 |
| 4.2 Mathematical Background | 69 |
| 4.3 Particle-swarm Optimization | 71 |
| 4.4 Genetic Algorithm (GA) | 75 |
| 4.5 Example 1: A Simple Beam | 76 |
| 4.6 Example 2: Unsymmetrical H-shaped Structure | 78 |
| 4.7 Conclusion | 81 |
| 4.8 Future Work | 81 |
| References | 82 |
| 5 Finite-element-model Updating Using Simulated Annealing | 85 |
| 5.1 Introduction | 85 |
| 5.2 Mathematical Background | 87 |
| 5.3 Simulated Annealing (SA) | 87 |
| 5.3.1 Simulated-annealing Parameters | 90 |
| 5.3.2 Transition Probabilities | 91 |
| 5.3.3 Monte Carlo Method | 91 |
| 5.3.4 Markov Chain Monte Carlo (MCMC) | 91 |
| 5.3.5 Acceptance Probability Function: Metropolis Algorithm | 92 |
| 5.3.6 Cooling Schedule | 92 |
| 5.4 Particle-swarm-optimization Method | 94 |
| 5.5 Example 1: Simple Beam | 95 |
| 5.6 Example 2: Unsymmetrical H-shaped Structure | 97 |
| 5.7 Conclusion | 98 |
| 5.8 Future Work | 98 |
| References | 99 |

| | |
|--|----------------|
| 6 Finite-element-model Updating Using the Response-surface Method..... | 103 |
| 6.1 Introduction | 103 |
| 6.2 Mathematical Background | 105 |
| 6.3 Response-surface Method (RSM) | 105 |
| 6.4 Neural Networks | 109 |
| 6.4.1 Multi-layer Perceptron (MLP) | 110 |
| 6.4.2 Training the Multi-layer Perceptron | 111 |
| 6.4.3 Back-propagation Method | 113 |
| 6.4.4 Scaled Conjugate Gradient Method | 114 |
| 6.5 Evolutionary Optimization | 115 |
| 6.6 Example 1: Simple Beam | 117 |
| 6.7 Example 2: Unsymmetrical H-shaped Structure | 119 |
| 6.8 Conclusion | 121 |
| 6.9 Future Work | 121 |
| References | 122 |
| 7 Finite-element-model Updating Using a Hybrid Optimization Method..... | 127 |
| 7.1 Introduction | 127 |
| 7.2 Introduction to Structural Dynamics | 128 |
| 7.3. Hybrid Particle-swarm Optimization and the Nelder–Mead Simplex | 129 |
| 7.4 Example 1: Simple Beam | 135 |
| 7.5 Example 2: Unsymmetrical H-shaped Structure | 136 |
| 7.6 Conclusion | 138 |
| 7.7 Future Work | 138 |
| References | 139 |
| 8 Finite-element-model Updating Using a Multi-criteria Method | 143 |
| 8.1 Introduction | 143 |
| 8.2 Mathematical Foundation | 144 |
| 8.2.1 Frequency-response Function Method (FRFM) | 145 |
| 8.2.2 Modal Property Method (MPM) | 147 |
| 8.2.3 Multi-criteria Method | 151 |
| 8.3 Optimization | 153 |
| 8.4 Example 1: Simple Beam | 154 |
| 8.5 Example 2: Unsymmetrical H-shaped Structure | 155 |
| 8.6 Conclusion | 157 |
| 8.7 Future Work | 157 |
| References | 157 |
| 9 Finite-element-model Updating Using Artificial Neural Networks | 161 |
| 9.1 Introduction | 161 |
| 9.2 Bayesian Neural Networks | 164 |
| 9.2.1 Stochastic Dynamics Model | 167 |
| 9.2.2 Metropolis Algorithm | 170 |
| 9.2.3 Hybrid Monte Carlo | 170 |
| 9.3 Finite-element Updating Using Neural Networks and Control Theory | 172 |
| 9.4 Example 1: Simple Beam | 174 |

| | |
|--|------------|
| 9.5 Example 2: Unsymmetrical H-shaped Structure | 176 |
| 9.6 Conclusion | 177 |
| 9.7 Future Work | 178 |
| References | 178 |
| 10 Finite-element-model Updating Using a Bayesian Approach..... | 183 |
| 10.1 Introduction | 183 |
| 10.2 Mathematical Foundation..... | 185 |
| 10.2.1 Dynamics..... | 185 |
| 10.2.2 Bayesian Method | 186 |
| 10.2.3 Markov Chain Monte Carlo Method | 189 |
| 10.2.4 MCMC: Genetic Programming and Metropolis Algorithm..... | 191 |
| 10.3 Example 1: Simple Beam | 194 |
| 10.4 Example 2: Unsymmetrical H-shaped Structure | 196 |
| 10.5 Conclusion..... | 198 |
| 10.6 Future Work | 198 |
| References | 199 |
| 11 Finite-element-model Updating Applied in Damage Detection..... | 203 |
| 11.1 Introduction | 203 |
| 11.2 Data Used for Damage Detection..... | 205 |
| 11.2.1 Time Domain | 205 |
| 11.2.2 Frequency Domain | 206 |
| 11.2.3 Modal Domain | 207 |
| 11.2.4 Time–Frequency Domain | 207 |
| 11.3 Model Identification Methods | 208 |
| 11.3.1 Neural Networks..... | 208 |
| 11.3.2 Support Vector Machines | 209 |
| 11.3.3 Fuzzy Logic | 209 |
| 11.3.4 Rough Sets..... | 210 |
| 11.4 Finite-element-model Updating Approach..... | 211 |
| 11.5 Example 1: Suspended Beam | 213 |
| 11.6 Example 2: Freely Suspended H-shaped Structure | 215 |
| 11.7 Conclusion..... | 219 |
| 11.8 Future Work | 219 |
| References | 219 |
| 12 Conclusions and Emerging State-of-the-art..... | 225 |
| 12.1 Introduction | 225 |
| 12.2 Overview of the Previous Chapters | 226 |
| 12.3 Outstanding Issues | 227 |
| 12.3.1 Model Selection..... | 227 |
| 12.3.2 Objective Function | 228 |
| 12.3.3 Data Used for Finite-element-model Updating..... | 229 |
| 12.3.4 Local Versus Global Optimally Updated Model | 229 |
| 12.3.5 Online Finite-element-model Updating | 229 |
| 12.3.6 The Issue of Damping..... | 230 |

| | |
|---|------------|
| 12.3.7 Dealing with Nonlinearity | 230 |
| 12.3.8 Nonuniqueness..... | 230 |
| 12.3.9 Parameter Selection | 231 |
| References | 231 |
| A Finite-element Modeling | 233 |
| A.1 Introduction | 233 |
| A.2 Discretization and Shape Functions | 233 |
| A.3 Estimation of Mass and Stiffness Matrices | 235 |
| A.4 Multi-degree-of-freedom Mass-spring System..... | 237 |
| A.5 Damping | 238 |
| A.6 Eigenvalues and Eigenvectors..... | 239 |
| A.7 Frequency-response Functions | 240 |
| A.8 Modal Property Extraction | 242 |
| References | 242 |
| B Introduction to Vibration Analysis | 243 |
| B.1 Introduction | 243 |
| B.2 Excitation and Response Measurements..... | 243 |
| B.3 Amplifiers | 244 |
| B.4 Filter | 244 |
| B.5 Data-logging System | 245 |
| B.6 Signal Processing..... | 245 |
| References | 245 |
