

# Contents

**Image and Geometry Processing for 3-D Cinematography:**  
**An Introduction** ..... 1  
Rémi Ronfard and Gabriel Taubin

**Part I 3-D Cinematography and Applications**

**Stereoscopic Cinema** ..... 11  
Frédéric Devernay and Paul Beardsley

**Free-Viewpoint Television** ..... 53  
Masayuki Tanimoto

**Free-Viewpoint Video for TV Sport Production** ..... 77  
Adrian Hilton, Jean-Yves Guillemaut, Joe Kilner, Oliver Grau,  
and Graham Thomas

**Challenges for Multi-View Video Capture** ..... 107  
Bennett Wilburn

**Part II Recent Developments in Geometry**

**Performance Capture from Multi-View Video** ..... 127  
Christian Theobalt, Edilson de Aguiar, Carsten Stoll,  
Hans-Peter Seidel, and Sebastian Thrun

**Combining Multi-view Stereo and Bundle Adjustment  
for Accurate Camera Calibration** ..... 151  
Yasutaka Furukawa and Jean Ponce

**Cell-Based 3D Video Capture Method with Active Cameras** ..... 171  
Tatsuhisa Yamaguchi, Hiromasa Yoshimoto, and Takashi  
Matsuyama

<b>Dense 3D Motion Capture from Synchronized Video Streams .....</b>	<b>193</b>
Yasutaka Furukawa and Jean Ponce	
 <b>Part III Recent Developments in Image Processing</b>	
<b>Wavelet-Based Inverse Light and Reflectance from Images of a Known Object .....</b>	<b>215</b>
Dana Cobzas, Cameron Upright, and Martin Jagersand	
<b>3-D Lighting Environment Estimation with Shading and Shadows .....</b>	<b>239</b>
Takeshi Takai, Susumu Iino, Atsuto Maki, and Takashi Matsuyama	
<b>3-D Cinematography with Approximate or No Geometry .....</b>	<b>259</b>
Martin Eisemann, Timo Stich, and Marcus Magnor	
<b>View Dependent Texturing Using a Linear Basis .....</b>	<b>285</b>
Martin Jagersand, Neil Birkbeck, and Dana Cobzas	

Image and Geometry Processing for 3-D  
Cinematography

Ronfard, R.; Taubin, G. (Eds.)

2010, X, 305 p., Hardcover
