<b>Discrete Holomorphic Local Dynamical Systems</b>	<b>1</b>
Marco Abate	
1 Introduction	1
2 One Complex Variable: The Hyperbolic Case	4
3 One Complex Variable: The Parabolic Case	9
4 One Complex Variable: The Elliptic Case	20
5 Several Complex Variables: The Hyperbolic Case	32
6 Several Complex Variables: The Parabolic Case	38
7 Several Complex Variables: Other Cases	49
References	50
<b>Dynamics of Rational Surface Automorphisms</b>	<b>57</b>
Eric Bedford	
1 Polynomial Automorphisms of $\mathbb{C}^2$	57
1.1 Hénon Maps	57
1.2 Filtration	59
1.3 Fatou Components	62
1.4 Hyperbolicity	65
1.5 Rate of Escape	69
1.6 Böttcher Coordinate	72
1.7 Currents on $\mathbb{R}^N$	76
1.8 Currents on $\mathbb{C}^N$ and Especially $\mu^\pm$	78
1.9 Convergence to $\mu^+$	82
2 Rational Surfaces	83
2.1 Blowing Up	83
2.2 Cohomology	86
2.3 Invariant Currents and Measures	88
2.4 Three Involutions	90
2.5 Linear Fractional Recurrences	94
2.6 Linear Fractional Automorphisms	96

2.7	Cremona Representation	98
2.8	More Automorphisms	100
	References	103
	<b>Uniformisation of Foliations by Curves</b>	105
	Marco Brunella	
1	Foliations by Curves and their Uniformisation	105
2	Some Results on Stein Fibrations	107
2.1	Hyperbolic Fibrations	107
2.2	Parabolic Fibrations	110
2.3	Foliations on Stein Manifolds	112
3	The Unparametrized Hartogs Extension Lemma	115
4	Holonomy Tubes and Covering Tubes	120
4.1	Vanishing Ends	120
4.2	Holonomy Tubes	124
4.3	Covering Tubes	126
4.4	Rational Quasi-Fibrations	130
5	A Convexity Property of Covering Tubes	131
5.1	Boundedness of Areas	133
5.2	Convergence Around the Boundary	135
5.3	Convergence on the Interior	137
5.4	Construction of the Limit Levi-flat Hypersurface	139
6	Hyperbolic Foliations	140
7	Extension of Meromorphic Maps from Line Bundles	148
7.1	Volume Estimates	148
7.2	Extension of Meromorphic Maps	151
8	Parabolic Foliations	154
8.1	Global Tubes	154
8.2	Parabolic Foliations	156
8.3	Foliations by Rational Curves	158

	<b>Dynamics in Several Complex Variables: Endomorphisms of Projective Spaces and Polynomial-like Mappings</b>	165
	Tien-Cuong Dinh and Nessim Sibony	
	Introduction	166
1	Endomorphisms of Projective Spaces	168
1.1	Basic Properties and Examples	169
1.2	Green Currents and Julia Sets	174
1.3	Other Constructions of the Green Currents	182
1.4	Equidistribution of Points	190
1.5	Equidistribution of Varieties	200
1.6	Stochastic Properties of the Green Measure	205
1.7	Entropy, Hyperbolicity and Dimension	222
	Notes	233

2	Polynomial-like Maps in Higher Dimension	234
2.1	Examples, Degrees and Entropy	235
2.2	Construction of the Green Measure	240
2.3	Equidistribution Problems	246
2.4	Properties of the Green Measure	249
2.5	Holomorphic Families of Maps	257
	Notes	262
	Appendix: Currents and Pluripotential Theory	262
A.1	Projective Spaces and Analytic Sets	263
A.2	Positive Currents and p.s.h. Functions	269
A.3	Intersection, Pull-back and Slicing	277
A.4	Currents on Projective Spaces	281
	References	289
	<b>Dynamics of Entire Functions</b>	295
	Dierk Schleicher	
1	Fatou and Julia Set of Entire Functions	298
2	The Fatou Set of Entire Functions	307
3	Entire Functions of Finite Type and of Bounded Type	312
4	The Escaping Set	317
5	Hausdorff Dimension	322
6	Parameter Spaces	325
7	Newton Maps of Entire Functions	329
8	A Few Open Questions	332
A.	Background and Notation	334
	References	335

# Holomorphic Dynamical Systems

Lectures given at the C.I.M.E. Summer School held in  
Cetraro, Italy, July 7-12, 2008

Sibony, N.; Schleicher, D.; Cuong, D.T.; Brunella, M.;  
Bedford, E.; Abate, M. - Gentili, G.; Patrizio, G.; Guenot,  
J. (Eds.)

2010, XII, 348 p., Softcover

ISBN: 978-3-642-13170-7
