

Contents

Integration of Systems Biology with Bioprocess Engineering: L-Threonine Production by Systems Metabolic Engineering of <i>Escherichia Coli</i>	1
Sang Yup Lee and Jin Hwan Park	
Analysis and Engineering of Metabolic Pathway Fluxes in <i>Corynebacterium glutamicum</i>	21
Christoph Wittmann	
Systems Biology of Industrial Microorganisms	51
Marta Papini, Margarita Salazar, and Jens Nielsen	
<i>De Novo</i> Metabolic Engineering and the Promise of Synthetic DNA	101
Daniel Klein-Marcuschamer, Vikramaditya G. Yadav, Adel Ghaderi, and Gregory N. Stephanopoulos	
Systems Biology of Recombinant Protein Production in <i>Bacillus megaterium</i>	133
Rebekka Biedendieck, Boyke Bunk, Tobias Fürch, Ezequiel Franco-Lara, Martina Jahn, and Dieter Jahn	
Extending Synthetic Routes for Oligosaccharides by Enzyme, Substrate and Reaction Engineering	163
Jürgen Seibel, Hans-Joachim Jördening, and Klaus Buchholz	
Regeneration of Nicotinamide Coenzymes: Principles and Applications for the Synthesis of Chiral Compounds	195
Andrea Weckbecker, Harald Gröger, and Werner Hummel	
Index	243

Biosystems Engineering I

Creating Superior Biocatalysts

Wittmann, C.; Krull, R. (Eds.)

2010, XIV, 250 p. 95 illus., 18 illus. in color., Hardcover

ISBN: 978-3-642-14230-7
