In Situ Study of Phase Transformation in Steel During Welding	1
1 Introduction	1
2 In Situ Time-Resolved X-Ray Diffraction Using a Synchrotron	1
3 In Situ Observation by Laser Scanning Confocal Microscopy (LSCM).	3
4 In Situ Observation System in Real and Reciprocal Lattice Space.	5
5 Summary.	9
6 Future Works.	10
References	10
In Situ Studies of Phase Transformation and Residual Stresses in LTT Alloys During Welding Using Synchrotron Radiation	13
1 Introduction.	14
2 Material	15
3 Experimental	16
4 Results	20
5 Summary.	24
References	25
In Situ Scanning Electron Microscopy High Temperature Deformation Experiments to Study Ductility Dip Cracking of Ni–Cr–Fe Alloys	27
1 Introduction.	28
2 Experimental Setup	29
3 Results and Discussion	32
4 Conclusions.	37
References	38

Grain Nucleation and Growth of Individual Austenite and Ferrite

Grains Studied by 3DXRD Microscopy at the ESRF.	41
1 Introduction	41
2 3DXRD Microscopy	43
3 Nucleation Theory	60
4 Examples-Solid-State Nucleation and Grain Growth During Phase Transformations	61
5 Outlook.	71
References	72

Direct Analysis of Solidification-Mode During Welding for the Assessment of Hot-Cracking

1 Introduction	77
2 Experimental Procedure	78
3 Result and Discussion.	79
4 Conclusions	83
References	83

In Situ Synchrotron Study of Inclusions in the Weld Pool for the Assessment of Nucleation Potency of Acicular Ferrite.

1 Introduction	85
2 Experimental Procedure	86
3 Results and Discussion	88
4 Conclusion	91
References	93

Characterization of Solid State Phase Transformation in Continuously Heated and Cooled Ferritic Weld Metal.

1 Introduction	95
2 Experimental Procedure	96
3 Calculation of Phase Fraction of Austenite and Ferrite as a Function of Temperature.	98
4 Results	99
5 Discussion.	103
6 Conclusions.	109
References	110

In Situ Determination of Phase Transformations and Structural Changes During Non-Equilibrium Material Processing.

1 Introduction.	113
2 Technique for Single Sensor Differential Thermal Analysis.	115
3 Summary and Conclusions	130
References	131

In Situ Phase Transformation Studies on a Transformation Induced Plasticity Steel Under Simulated Weld Thermal Cycles Using Synchrotron Diffraction.	133
1 Introduction.	134
2 Experimental Procedure	135
3 Results	137
4 Discussion.	145
5 Conclusions.	147
References	148
 Imaging Fast Processes in Liquid Metal Foams and Semi-Solid Alloys Using Synchrotron Radioscopy with Spatio-Temporal Micro-Resolution.	149
1 Introduction.	149
2 Materials and Methods	150
3 Results	153
4 Discussion.	156
5 Conclusions.	157
References	157
 In Situ Measurements for Structural Integrity: An Engineer's Perspective	159
1 Introduction.	159
2 Quantification of Residual Stresses.	161
3 Modelling Challenges	162
4 In Situ Studies and Material Behaviour.	163
5 Concluding Remarks	173
References	173
 In Situ Neutron Diffraction During Thermo-Mechanically Controlled Process for Low Alloy Steels.	175
1 Introduction.	175
2 Static Ferrite–Austenite Transformation	176
3 Transformation Behavior in Thermo-Mechanically Controlled Process (TMCP) Studied by the Angular Dispersion Method.	180
4 Transformation Behavior in Thermo-Mechanically Controlled Process (TMCP) Studied by the TOF Method	182
5 Concluding Remarks	189
References	190
 Influence of Plastic Deformation on the Residual Stress Distribution and Fatigue Behaviour of High Strength Steels Welds	191
1 Introduction.	191
2 Experimental	192

3	Results	196
4	Discussion.	198
5	Conclusion	199
	References	200
	Epilogue	201

In-situ Studies with Photons, Neutrons and Electrons
Scattering

Kannengiesser, Th.; Babu, S.S.; Komizo, Y.-i.; Ramirez, A.
(Eds.)

2010, XII, 204 p., Hardcover
