1	Introduction	1
	References	2
2	Fundamentals	5
2.1	Principle of the STM	5
2.2	Origin of the Tunneling Current	7
2.3	Scanning Tunneling Spectroscopy	9
2.4	Contrast Mechanism of Molecular Adsorbates	10
2.5	Temperature Programmed Desorption	12
2.6	Low Energy Electron Diffraction	14
	References	15
3	Experimental Setup	17
3.1	UHV System	17
3.2	Scanning Tunneling Microscope	18
3.3	Control Electronics and Vibration Isolation	21
3.4	Ag(111)	22
3.5	Porphyrinoids	24
3.6	Preparation of thin Porphyrinoid Layers	25
3.7	Vapor-deposition of Cobalt and Iron	27
	References	28

Part I Results

4	Self-Assembly and Individual Appearance of Tetraphenylporphyrins on Ag(111)	31
4.1	Introduction	31
4.2	Epitaxial Growth	32
4.3	Appearance and Intramolecular Conformation	36

4.4	Ordering Aspects	37
4.5	Conclusion.	43
	References	44
5	Self-Assembly and Individual Appearance of	
	Cobalt(II)-Tetrakisdi-tert-butylphenylporphyrins on Ag(111)	47
5.1	Polymorphism of CoTTBPP.	47
5.1.1	Conclusion	59
5.2	Polarity-Dependent Appearance	60
5.2.1	Conclusion	61
	References	62
6	Coordination of Iron and Cobalt Atoms by Tetraphenylporphyrin	
	Monolayers on Ag(111) and Formation of	
	Metal(II)-Tetraphenylporphyrin	63
6.1	Introduction	63
6.2	Coordination of Post-deposited Iron Atoms by	
	Tetraphenylporphyrin Monolayers.	64
6.2.1	Conclusion	68
6.3	Coordination of Pre-deposited Iron Atoms by	
	Tetraphenylporphyrin Monolayers.	68
6.3.1	Conclusion	71
6.4	Coordination of Post-deposited Cobalt Atoms by	
	Tetraphenylporphyrin Monolayers.	71
6.4.1	Conclusion	75
6.5	Discussion of the Metalation Reaction.	75
	References	77
7	Different Aspects of 2H-Tetrakis-di-tert-butylphenylporphyrin	
	on Ag(111).	79
7.1	Introduction	79
7.2	Monolayer Preparation	80
7.3	Arrangement of 2HTBPP.	82
7.3.1	Conclusion	85
7.4	Voltage-Dependent Appearance	86
7.4.1	Conclusion	87
7.5	Direct Metalation of 2HTBPP with Co-adsorbed Iron	87
7.5.1	Conclusion	88
	References	89
8	Direct Metalation of a Phthalocyanine Monolayer on Ag(111)	
	with Co-adsorbed Iron Atoms.	91
8.1	Introduction	91
8.2	Results	92

8.3	Conclusion.	98
	References	98
9	Multicomponent Adlayers of Tetraphenylporphyrins on Ag(111). .	101
9.1	Understanding the Contrast Mechanism in STM Images of Cobalt Tetraphenylporphyrin on Ag(111).	101
9.1.1	Introduction	102
9.1.2	Results.	102
9.1.3	Conclusion	108
9.2	Fingerprints of Different Porphyrins	109
9.2.1	Introduction	109
9.2.2	Results.	111
9.2.3	Conclusion	120
9.3	Addressing Molecular Orbitals of Cobalt- and Iron-Tetraphenylporphyrins by Continuous Imaging Tunneling Spectroscopy.	121
9.3.1	Introduction	121
9.3.2	Results.	122
9.3.3	Conclusion	127
	References	127
10	Modification of the Growth of Iron on Ag(111) by Predeposited Organic Monolayers.	129
10.1	Introduction	129
10.1.1	Growth of Fe on Ag(111).	130
10.1.2	Growth of Fe on Ag(111) Precovered with Different Tetrapyrrolic Monolayers	132
10.2	Conclusion.	139
	References	139
11	Geometric and Electronic Aspects of CoTPP upon Dosage of NO	141
11.1	Introduction	141
11.2	In Situ Observation of the Rearrangement of CoTPP on Ag(111).	142
11.3	Conclusion.	146
11.4	Modification of the Appearance of CoTPP upon Formation of NO-CoTPP	147
11.5	Conclusion.	150
	References	151
12	Self-Assembly and Voltage-Dependent Appearance of Octaethylporphyrins.	153
12.1	Introduction	153

12.2	Results	154
12.3	Conclusion.	158
	References	159
13	Summary and Outlook	161
13.1	Molecular Ordering and Intramolecular Conformation.	161
13.2	Coordination of Metal Atoms by Free Base Porphyrinoids. . . .	162
13.3	Electronic Properties of Porphyrins.	163
13.4	Interaction with Small Molecules	163
13.5	Outlook	164

STM Investigation of Molecular Architectures of
Porphyrinoids on a Ag(111) Surface
Supramolecular Ordering, Electronic Properties and
Reactivity

Buchner, F.
