

# Contents

<b>1</b>	<b>Theory and Experience</b>	<b>1</b>
1.1	The Law of Rutherford–Soddy	2
1.2	Determination of Decay Constants	4
1.3	Mass Spectrometry	4
1.4	Isotope Dilution	5
1.5	Statistical Estimation of Results	8
1.6	Summary	9
<b>2</b>	<b>Geochronometric Models</b>	<b>11</b>
2.1	Isochron Model	11
2.1.1	Isochron Plane	11
2.1.2	Common Rb–Sr Isochron	15
2.2	Pb–Pb Isochron	17
2.3	Concordia–Discordia Model	19
2.4	Summary: Models for Open and Closed Parent–Daughter Systems	24
<b>3</b>	<b>Principle Geochronometric Isotope Systems</b>	<b>25</b>
3.1	Th, U–Pb Isotope System	25
3.1.1	Decay Constants of $^{235}\text{U}$ and $^{238}\text{U}$	25
3.1.2	U–Pb Dating	25
3.1.3	Pb–Pb Dating	26
3.2	K–Ar Isotope System	27
3.2.1	Constants of Radioactive Transformation	28
3.2.2	Conventional K–Ar Method	28
3.2.3	$^{40}\text{Ar}/^{39}\text{Ar}$ Method	30
3.3	Rb–Sr Isotope System	35
3.4	Sm–Nd Isotope System	35
3.5	Re–Os Isotope System	37
3.6	Isotope Systems of Extinct Nuclides	38

3.7	Isotope System of $^{14}\text{C}$ .....	39
3.8	Summary: Reliability of the Modern Isotopic Methods .....	42
<b>4</b>	<b>Atmospheric Argon</b> .....	<b>43</b>
4.1	Origin of $^{40}\text{Ar}$ .....	43
4.2	Variations of $^{40}\text{Ar}/^{36}\text{Ar}$ and $^{36}\text{Ar}/^{38}\text{Ar}$ .....	45
4.3	Summary: Isotopically Inhomogeneous Atmosphere .....	48
<b>5</b>	<b>Distribution of Radiogenic Argon Within a Mineral</b> .....	<b>49</b>
5.1	Closing Isotopic System: $\alpha$ -Factor .....	50
5.2	The $\alpha$ -Factor in the Conventional K–Ar Method .....	51
5.3	Influence of Argon Distribution on Diffusion Parameters .....	53
5.4	Application for Dating of Imposed Geologic Processes .....	55
5.4.1	Rectangular Distribution of Argon ( $\alpha = 0$ ) .....	56
5.4.2	Dominating Rectangular Argon Fraction ( $0 < \alpha < 0.5$ ) .....	56
5.4.3	Dominating Semi-Sinusoidal Argon Fraction ( $0.5 < \alpha \leq 1$ ) .....	58
5.5	Summary: Low-Temperature Argon Losses .....	59
<b>6</b>	<b>Thermal Spectra of Argon Isotopes</b> .....	<b>61</b>
6.1	Presentation of Argon–Argon Spectra on Diagrams .....	61
6.2	Histograms of Argon Release .....	63
6.3	Deduction of an Algebraic Expression for an Isochron Line in Inverse Ar–Ar Coordinates .....	66
6.4	Kinetics of Stepwise Heating .....	67
6.5	Separating Air and Radiogenic Argon .....	68
6.6	$E_{\text{cont}} = E_{\text{rad}} = E_{39}$ .....	69
6.7	$E_{\text{cont}} < E_{\text{rad}} = E_{39}$ .....	70
6.8	$E_{\text{cont}} < E_{39} < E_{\text{rad}}$ .....	71
6.9	Loss of Radiogenic Argon in the Geologic Past .....	73
6.10	Excessive Argon-40 .....	74
6.11	Argon of Poly-mineral Aggregates .....	74
6.12	Argon in Two-Component Crystal Structure .....	76
6.13	Irreversible Processes of Argon Release from Mineral Phases ...	78
6.14	Summary: Peculiarities of Ar–Ar Spectra .....	81
<b>7</b>	<b>Radiogenic Argon in a Cooling Dike</b> .....	<b>85</b>
7.1	Argon Kinetics .....	85
7.2	K–Ar Isotopic Balance in a Cooling Dike .....	88
7.3	Closure of K–Ar Isotope System .....	92
7.4	Geologic Application .....	94
7.5	Summary: Temporally Varying Diffusion .....	95

<b>8</b>	<b>Radiogenic Isotopes in an Exocontact Zone of a Magmatic Body</b>	97
8.1	Theoretical Consideration	99
8.1.1	Thermal Model	99
8.1.2	Radiogenic Argon Retention in a Mineral under Varying Temperatures	102
8.2	Geochronological Application	104
8.3	Summary: Theory of Diffusion and Its Application for Study of Exocontact Processes	106
8.4	Appendix: Two- and Three-Dimensional Cases	107
<b>9</b>	<b>Diffusion in a Laplace Regime</b>	109
9.1	Deduction of the Laplace Age Equation	109
9.2	Geologic Examples	111
9.3	Summary: Estimation of the Diffusion Parameter $D/h^2\lambda$	113
<b>10</b>	<b>Early Earth</b>	115
10.1	Initial Processes in the Solar System (4.57–4.54 Ga)	115
10.1.1	Classification of Meteorites	115
10.1.2	Dating of Meteorites	117
10.1.3	Significance of Short-Lived Radionuclides	118
10.1.4	Evolution of Asteroids	121
10.2	Priscoan Crust (4.4–3.8 Ga)	122
10.3	Archean Crust (3.8–2.5 Ga)	123
10.4	Oldest Crust in Asia	125
10.5	Summary: Geologic Processes of the Early Earth	126
<b>11</b>	<b>Important Phanerozoic Boundaries</b>	129
11.1	Vendian–Cambrian	129
11.1.1	Stratotype Sections	129
11.1.2	Radiogenic Isotope Ages	130
11.1.3	Events and Hypotheses	131
11.1.4	Alkaline Ultramafic Magmatism with Carbonatites in Cissayan, Siberia	132
11.2	Permian–Triassic	135
11.2.1	Stratotype Sections	135
11.2.2	Radiogenic Isotope Ages	137
11.2.3	Events	137
11.2.4	Hypotheses	138
11.2.5	Siberian Traps	138
11.3	Cretaceous–Tertiary	145
11.3.1	Definition of the Boundary	145
11.3.2	Radiogenic Isotope Ages	146

11.3.3	Events and Hypotheses .....	146
11.3.4	Deccan Traps .....	147
11.4	Summary: Specifications of the Important Phanerozoic Boundaries .....	147
<b>12</b>	<b>Late Phanerozoic Magmatic Evolution of Asia .....</b>	<b>149</b>
12.1	Hierarchy and Periodicity of Magmatic Events .....	152
12.2	Middle–Late Cretaceous: First-Order Processes .....	158
12.2.1	Dating .....	159
12.2.2	Geologic Background .....	160
12.3	Early Tertiary: First-Order Processes .....	162
12.3.1	Thanetian Magmatic Events .....	162
12.3.2	Spatial Connections Between the Thanetian and Lutetian Magmatic Events .....	163
12.3.3	Geologic Background .....	164
12.4	Middle–Late Tertiary through Quaternary Transition from the First-, through the Second- to the Third-Order Processes .....	166
12.4.1	Central Mongolia and Adjacent Regions .....	167
12.4.2	South Primorye and Adjacent East Asia .....	190
12.5	Summary: Magmatic Geodynamics in Asia .....	205
<b>13</b>	<b>Late Phanerozoic Magmatic Evolution of North America and Northeast Africa: Comparisons with Asia .....</b>	<b>209</b>
13.1	North America .....	209
13.1.1	Magmatic Migration of 120–37 Ma .....	211
13.1.2	Transition from Intermediate–Silicic to Basaltic Magmatism of 37–18 Ma .....	211
13.1.3	Predominating Basaltic Magmatism of the Past 17–15 Ma .....	213
13.1.4	Geodynamic Models .....	214
13.2	Northeast Africa .....	215
13.2.1	Earliest Volcanic Events in the Western Rift .....	216
13.2.2	Hypotheses .....	218
13.2.3	Bilateral along-Axis Propagation of Rift-Related Magmatism .....	219
13.2.4	Geodynamics of the East African Plateau .....	221
13.3	Comparisons: Africa—Eurasia—North America .....	222
13.4	Summary: Two Geodynamic Patterns of Rift-Related Magmatic Evolution in Continents .....	229
<b>14</b>	<b>Separated Lead Isotopes .....</b>	<b>231</b>
14.1	Dating Problems of Ore Mineralization .....	231
14.2	Definition of Separated Leads .....	232
14.3	Diffusion Discordia .....	233
14.4	Electrical Charge of Pb Separated from U–Pb System .....	236

14.5	Connected Points of Concordia and Discordia . . . . .	236
14.6	Leads Released by Continuous Diffusion . . . . .	238
14.7	Instant Release of Leads . . . . .	239
14.8	Tuning of $T$ , $t$ , and $\mu$ . . . . .	240
14.9	Interpreting Separated Leads from Ore Deposits in Asia . . . . .	242
	14.9.1 The Southern Part of the Siberian Craton . . . . .	242
	14.9.2 The Gargan Block . . . . .	244
	14.9.3 Geologic Implication . . . . .	246
14.10	Summary: Application of Separated Leads for Understanding Timing of Ore-Forming Processes . . . . .	247
<b>References . . . . .</b>		249

Radiogenic Isotopes in Geologic Processes

Rasskazov, S.V.; Brandt, S.B.; Brandt, I.S.

2010, XIII, 306 p., Hardcover

ISBN: 978-90-481-2998-0
