

Contents

Introduction	ix
Wladek Grabinski and Thomas Gneiting	
1 Numerical Power/HV Device Modeling	1
Oliver Triebel and Tibor Grasser	
2 HiSIM-HV: A Scalable, Surface-Potential-Based Compact Model for High-Voltage MOSFETs	33
H.J. Mattausch, N. Sadachika, M. Yokomichi, M. Miyake, T. Kajiwara, Y. Oritsuki, T. Sakuda, H. Kikuchihara, U. Feldmann, and M. Miura-Mattausch	
3 MM20 HVMOS Model: A Surface-Potential-Based LDMOS Model for Circuit Simulation	65
Annemarie C.T. Aarts and Alireza Tajic	
4 Modeling of High Voltage MOSFETs Based on EKV (HV-EKV)	95
Yogesh Singh Chauhan, Francois Krummenacher, and Adrian Mihai Ionescu	
5 Power Devices	129
Andrzej Napieralski, Małgorzata Napieralska, and Łukasz Starzak	
6 Distributed Modeling Approach Applied to the IGBT	149
Patrick Austin and Jean-Louis Sanchez	
7 Web-Based Modelling Tools	183
Andrzej Napieralski, Łukasz Starzak, Bartłomiej Świercz, and Mariusz Zubert	
Index	199

POWER/HVMOS Devices Compact Modeling

Grabinski, W.; Gneiting, Th. (Eds.)

2010, XII, 200 p., Hardcover

ISBN: 978-90-481-3045-0
