

Contents

Preface	vii
Introduction	xv
Memorials	
Ellery Eells (1953–2006)	xxxvii
Malcolm R. Forster	
At the Memorial Gathering for Ellery Eells	xxxix
Elliott Sober	
Remembrances of Ellery Eells	xliii
Paul Weirich	
Prologue	
Objective Probability Theory Theory	3
Ellery Eells	
Part I Alternative Conceptions of Probability	
Probabilistic Causality and Causal Generalizations	47
Daniel M. Hausman	
The Possibility of Infinitesimal Chances	65
Martin Barrett	
Probabilistic Metaphysics	81
James H. Fetzer	

Part II The Objectivity of Macro-Probabilities

Chance and Necessity:

From Humean Supervenience to Humean Projection	101
Wolfgang Spohn	

Evolutionary Theory and the Reality of Macro-Probabilities.....	133
Elliott Sober	

Is Evolution An Optimizing Process?	163
James H. Fetzer	

Part III Probabilities as Explanatory Properties

Propensity Trajectories, Preemption, and the Identity of Events.....	181
Ellery Eells	

Miraculous Consilience of Quantum Mechanics	201
Malcolm R. Forster	

Probability and Objectivity in Deterministic and Indeterministic Situations.....	229
James H. Fetzer	

Part IV Probabilities in Inference and Decision

How Bayesian Confirmation Theory Handles the Paradox of the Ravens.....	247
Branden Fitelson and James Hawthorne	

Learning to Network.....	277
Brian Skyrms and Robin Pemantle	

Probabilities in Decision Rules	289
Paul Weirich	

Epilogue

Propensities and Frequencies: Inference to the Best Explanation	323
James H. Fetzer	

Index.....	353
