Part I Fundamentals

Wall-Modeled Large-Eddy Simulations: Present Status and Prospects

Ugo Piomelli 3

A Study of the Influence of the Reynolds Number on Jet Self-Similarity Using Large-Eddy Simulation

Christophe Bogey and Christophe Bailly 13

Direct Numerical Simulation of Fractal-Generated Turbulence

S. Laizet and J. Christos Vassilicos..... 19

Turbulent Oscillating Channel Flow Subjected to Wind Stress

W. Kramer, H.J.H. Clercx, and V. Armenio 27

DNS of a Periodic Channel Flow with Isothermal Ablative Wall

O. Cabrit and F. Nicoud..... 35

Diagnostic Properties of Structure Tensors in Turbulent Flows

D.G.E. Grigoriadis, C.A. Langer, and S.C. Kassinos 43

Development of Brown–Roshko Structures in the Mixing Layer Behind a Splitter Plate

Neil D. Sandham and Richard D. Sandberg..... 51

DNS of Spatially-Developing Three-Dimensional Turbulent Boundary Layers

Philipp Schlatter and Luca Brandt 57

Direct Numerical Simulation and Experimental Results of a Turbulent Channel Flow with Pin Fins Array

B. Cruz Perez, J. Toro Medina, N. Sundaram, K. Thole, and S. Leonardi..... 65

New Experimental Results for a LES Benchmark Case <i>Ch. Rapp, F. Pfleger, and M. Manhart</i>	71
Direct Computation of the Sound Radiated by Shear Layers Using Upwind Compact Schemes <i>M. Cabana, V. Fortuné, and E. Lamballais</i>	77
DNS of Orifice Flow with Turbulent Inflow Conditions <i>George K. El Khoury, Mustafa Barri, Helge I. Andersson, and Bjørnar Pettersen</i>	83
The Mean Flow Profile of Wall-Bounded Turbulence and Its Relation to Turbulent Flow Topology <i>Vassilios Dallas, J. Christos Vassilicos, and Geoffrey F. Hewitt</i>	87
Large Eddy Simulation of a Rectangular Turbulent Jet in Crossflow <i>E.H. Kali, C. Brun, and O. Métais</i>	91
Numerical Simulation of a 2D Starting-Plume Cloud-Flow <i>K. Aditya, S.M. Deshpande, K.R. Sreenivas, and R. Narasimha</i>	97
<hr/>	
Part II Methodologies and Modelling Techniques	
<hr/>	
Variational Multiscale Theory of LES Turbulence Modeling <i>Y. Bazilevs, V.M. Calo, T.J.R. Hughes, and G. Scovazzi</i>	103
An Immersed Interface Method in the Framework of Implicit Large-Eddy Simulation <i>M. Meyer, A. Devesa, S. Hickel, X.Y. Hu, and N.A. Adams</i>	113
Simulation of Gravity-Driven Flows Using an Iterative High-Order Accurate Navier–Stokes Solver <i>R. Henniger and L. Kleiser</i>	121
Compact Fourth-Order Finite-Volume Method for Numerical Solutions of Navier–Stokes Equations on Staggered Grids <i>Arpiruk Hokpunna and Michael Manhart</i>	129
An Accurate Numerical Method for DNS of Turbulent Pipe Flow <i>J.G.M. Kuerten</i>	135
Local Large Scale Forcing of Unsheared Turbulence <i>Julien Bodart, Laurent Joly, and Jean-Bernard Cazalbou</i>	141

Large-Eddy Simulations of a Turbulent Magnetohydrodynamic Channel Flow <i>A. Viré, D. Krasnov, B. Knaepen, and T. Boeck</i>	147
Development of a DNS-FDF Approach to Inhomogeneous Non-Equilibrium Mixing for High Schmidt Number Flows <i>Florian Schwertfirm and Michael Manhart</i>	153
Multi-Scale Simulation of Near-Wall Turbulent Flows <i>Ayşe Gul Gungor and Suresh Menon</i>	161
Explicit Algebraic Subgrid Stress Models for Large Eddy Simulation <i>L. Marstorp, G. Brethouwer, and A.V. Johansson</i>	167
Scrutinizing the Leray-Alpha Regularization for LES in Turbulent Axisymmetric Free Jets <i>F. Picano, C.M. Casciola, and K. Hanjalić</i>	173
Localization of Unresolved Regions in the <i>Selective</i> Large-Eddy Simulation of Hypersonic Jets <i>D. Tordella, M. Iovieno, S. Massaglia, and A. Mignone</i>	181
An ADM-Based Subgrid Scale Reconstruction Procedure for Large Eddy Simulation <i>M. Terracol and B. Aupoix</i>	189
Large-Eddy Simulation of Turbulent Flow in a Plane Asymmetric Diffuser by the Spectral-Element Method <i>Johan Ohlsson, Philipp Schlatter, Paul F. Fischer, and Dan S. Henningson</i>	197
h and p Refinement with Wall Modelling in Spectral-Element LES <i>S. Hulshoff, E. Muntz, and J. Labrujere</i>	205
Error-Landscape Assessment of LES Accuracy Using Experimental Data <i>Johan Meyers, Charles Meneveau, and Bernard J. Geurts</i>	209
The Role of Different Errors in Classical LES and in Variational Multiscale LES on Unstructured Grids <i>H. Ouvrard, B. Koobus, A. Dervieux, S. Camarri, and M.V. Salvetti</i> ...	215

Part III LES Modelling Errors

Practical Quality Measures for Large-Eddy Simulation*S.E. Gant* 223**The Simplest LES***M. Germano* 229**Application of an Anisotropy Resolving Algebraic Reynolds Stress Model within a Hybrid LES-RANS Method***M. Breuer, O. Aybay, and B. Jaffrézic* 237**LES Meets FSI – Important Numerical and Modeling Aspects***M. Breuer and M. Münsch* 245**A New Multiscale Model with Proper Behaviour in Both Vortex Flows and Wall Bounded Flows***L. Briceux, M. Duponcheel, and G. Winckelmans* 253**LES Based POD Analysis of Jet in Cross Flow***D. Cavar, K.E. Meyer, S. Jakirlić, and S. Šarić* 259**A Dissipative Scale-Similarity Model***L. Davidson* 267**Optimization of Turbulent Mixing Restricted by Linear and Nonlinear Constraints***Sara Delport, Martine Baelmans, and Johan Meyers* 275**Stochastic Coherent Adaptive LES of Forced Isotropic Turbulence***Giuliano De Stefano and Oleg V. Vasilyev* 281**An Improvement of Increment Model by Using Kolmogorov Equation of Filtered Velocity***L. Fang, L. Shao, J.P. Bertoglio, G.X. Cui, C.X. Xu, and Z.S. Zhang* .. 287**Symmetry-Preserving Regularization Modelling of a Turbulent Plane Impinging Jet***O. Lehmkuhl, F.X. Trias, R. Borrell, and C.D. Pérez Segarra* 295**Progress in the Development of Stochastic Coherent Adaptive LES Methodology***Oleg V. Vasilyev and Giuliano De Stefano* 303

Part IV Scalars

LES of Heat Transfer in a Channel with a Staggered Pin Matrix
G. Delibra, D. Borello, K. Hanjalić, and F. Rispoli 311

Turbulent Channel Flow with Λ -Shape Turbulators on One Wall
Jaime A. Toro Medina, Benjamin Cruz Perez, and S. Leonardi 317

Implicit Large-Eddy Simulation of Passive-Scalar Mixing in a Confined Rectangular-Jet Reactor
Antoine Devesa, Stefan Hickel, and Nikolaus A. Adams 323

Direct Numerical Simulation of a Turbulent Boundary Layer with Passive Scalar Transport
Qiang Li, Philipp Schlatter, Luca Brandt, and Dan S. Henningson 329

Part V Active Scalars

Numerical Experiments on Turbulent Thermal Convection
Roberto Verzicco 339

Direct Numerical Simulation of Turbulent Reacting and Inert Mixing Layers Laden with Evaporating Droplets
J. Xia and K.H. Luo 347

Large Eddy Simulation of a Two-Phase Reacting Flow in an Experimental Burner
M. Sanjosé, E. Riber, L. Gicquel, B. Cuenot, and T. Poinso 355

Hybrid LES/CAA Simulation of a Turbulent Non-Premixed Jet Flame
C. Klewer, F. Hahn, C. Olbricht, and J. Janicka 363

LES/CMC of Forced Ignition of a Bluff-Body Stabilised Non-Premixed Methane Flame
A. Triantafyllidis, E. Mastorakos, and R.L.G.M. Eggels 371

Large Eddy Simulation of a High Reynolds Number Swirling Flow in a Conical Diffuser
Cédric Duprat, Olivier Métais, and Guillaume Balarac 377

Direct Numerical Simulation of Hot and Highly Pulsated Turbulent Jet Flows
V. Clauzon and T. Dubois 385

DNS of Convective Heat Transfer in a Rotating Cylinder <i>R.P.J. Kunnen, B.J. Geurts, and H.J.H. Clercx</i>	393
Numerical Simulations of Thermal Convection at High Prandtl Numbers <i>G. Silano, K.R. Sreenivasan, and R. Verzicco</i>	399
Influence of the Lateral Walls on the Thermal Plumes in Turbulent Rayleigh–Bénard Convection in Rectangular Containers <i>M. Kaczorowski and C. Wagner</i>	405
DNS of Mixed Convection in Enclosed 3D-Domains with Interior Boundaries <i>Olga Shishkina, Andrei Shishkin, and Claus Wagner</i>	411
LES and Hybrid RANS/LES of Turbulent Flow in Fuel Rod Bundle Arranged with a Triangular Array <i>Stefano Rolfo, J.C. Uribe, and D. Laurence</i>	419
Large-Scale Patterns in a Rectangular Rayleigh–Bénard Cell <i>A. Sergent and P. Le Quéré</i>	425
LES and Laser Measurements of Dynamic Flame/Vortex Interactions <i>V. Di Sarli, A. Di Benedetto, G. Russo, E.J. Long, and G.K. Hargrave</i>	429
3D Direct Simulation of a Nonpremixed Hydrogen Flame with Detailed Models <i>G. Fru, D. Thévenin, C. Zistl, G. Janiga, L. Gouarin, and A. Laverdant</i>	433
<hr/> Part VI Environmental and Multiphase Flows <hr/>	
Large Eddy Simulation of Pollen Dispersion in the Atmosphere <i>Marcelo Chamecki, Charles Meneveau, and Marc B. Parlange</i>	441
Internal Wave Breaking in Stratified Flows Past Obstacles <i>Sergey N. Yakovenko, T. Glyn Thomas, and Ian P. Castro</i>	449
DNS of a Gravity Current Propagating over a Free-Slip Boundary <i>Alberto Scotti</i>	457

Large Eddy Simulation of Turbulent Mixing in an Estuary Region <i>F. Roman, V. Armenio, R. Inghilesi, and S. Corsini</i>	463
Dispersion of (Light) Inertial Particles in Stratified Turbulence <i>M. van Aartrijk and H.J.H. Clercx</i>	469
The Influence of Magnetic Fields on the Rise of Gas Bubbles in Electrically Conductive Liquids <i>Daniel Gaudlitz and Nikolaus A. Adams</i>	477
Large Eddy Simulation of a Turbulent Droplet Laden Mixing Layer <i>W.P. Jones, S. Lyra, and A.J. Marquis</i>	485
The Diffuse Interface Method with Korteweg Approach for Isothermal, Two-Phase Flow of a Van der Waals Fluid <i>A. Pecenko and J.G.M. Kuerten</i>	491
Numerical Simulation of Air Flows in Street Canyons Using Mesh-Adaptive LES <i>Dimitrios Pavlidis, Elsa Aristodemou, Jefferson L.M.A. Gomes, Christopher C. Pain, and Helen ApSimon</i>	497

Part VII Aerodynamics and Wakes

LES of the Flow Around a Two-Dimensional Vehicle Model with Active Flow Control <i>S. Krajnović and J. Fernandes</i>	505
Wake-Vortex Decay in External Turbulence <i>Bernard J. Geurts and Arkadiusz K. Kuczaj</i>	513
DNS of Aircraft Wake Vortices: The Effect of Stable Stratification on the Development of the Crow Instability <i>G.N. Coleman, R. Johnstone, C.P. Yorke, and I.P. Castro</i>	519
On the Download Alleviation for the XV-15 Wing by Active Flow Control Using Large-Eddy Simulation <i>M. El-Ali, P. Kjellgren, and L. Davidson</i>	527
Turbulent Flow Simulations Around an Airfoil At High Incidences Using URANS, DES and ILES Approaches <i>Bowen Zhong, Satish K. Yadav, and Dimitris Drikakis</i>	533

Large Eddy Simulation of Flow Around an Airfoil Near Stall <i>Jaber H. Almutairi, Lloyd E. Jones, and Neil D. Sandham</i>	541
---	-----

Large Eddy Simulation of Turbulent Flows Around a Rotor Blade Segment Using a Spectral Element Method <i>A. Shishkin and C. Wagner</i>	547
--	-----

Part VIII Compressible Flows

DNS of Compressible Turbulent Flows <i>Rainer Friedrich and Somnath Ghosh</i>	553
---	-----

Large-Eddy Simulation of Transonic Buffet over a Supercritical Airfoil <i>E. Garnier and S. Deck</i>	565
--	-----

Detached-Eddy and Delayed Detached-Eddy Simulation of Supersonic Flow over a Three-Dimensional Cavity <i>V. Togiti, H. Lüdeke, and M. Breuer</i>	571
--	-----

A WALE-Similarity Mixed Model for Large-Eddy Simulation of Wall Bounded Compressible Turbulent Flows <i>G. Lodato, P. Domingo, and L. Vervisch</i>	579
--	-----

Parametric Study of Compressible Turbulent Spots <i>J.A. Redford, N.D. Sandham, and G.T. Roberts</i>	587
--	-----

Azimuthal Resolution Effects in LES of Subsonic Jet Flow and Influence on Its Noise <i>F. Keiderling and L. Kleiser</i>	593
---	-----

Large Eddy Simulations of Compressible MHD Turbulence in Heat-Conducting Fluid <i>A.A. Chernyshov, K.V. Karelsky, and A.S. Petrosyan</i>	601
--	-----

Direct and Large-Eddy Simulation VII

Proceedings of the Seventh International ERCOFTAC

Workshop on Direct and Large-Eddy Simulation, held at

the University of Trieste, September 8-10, 2008

Armenio, V.; Geurts, B.; Fröhlich, J. (Eds.)

2010, IV, 646 p., Hardcover

ISBN: 978-90-481-3651-3
