

Contents

- 1 Introduction** 1
- 2 Elements of Linear Algebra**..... 5
 - 2.1 Introduction 5
 - 2.2 Elementary Vectors 5
 - 2.3 Scalar Product 6
 - 2.4 Linear Independence and Basis 10
 - 2.5 Matrices 12
 - 2.6 Rank, Singularity and Inverses 16
 - 2.7 Decomposition of Matrices: Eigenvalues and Eigenvectors 17
 - 2.8 The Singular Value Decomposition 19
 - 2.9 Functions of Matrices 21
- 3 Basic Statistical Concepts** 25
 - 3.1 Introduction 25
 - 3.2 Climate Datasets 25
 - 3.3 The Sample and the Population 26
 - 3.4 Estimating the Mean State and Variance 27
 - 3.5 Associations Between Time Series 29
 - 3.6 Hypothesis Testing 32
 - 3.7 Missing Data 36
- 4 Empirical Orthogonal Functions**..... 39
 - 4.1 Introduction 39
 - 4.2 Empirical Orthogonal Functions 42
 - 4.3 Computing the EOFs..... 43
 - 4.3.1 EOF and Variance Explained..... 44
 - 4.4 Sensitivity of EOF Calculation 49
 - 4.4.1 Normalizing the Data 50
 - 4.4.2 Domain of Definition of the EOF 51
 - 4.4.3 Statistical Reliability 55
 - 4.5 Reconstruction of the Data 58

- 4.5.1 The Singular Value Distribution and Noise..... 59
 - 4.5.2 Stopping Criterion 62
- 4.6 A Note on the Interpretation of EOF..... 64
- 5 Generalizations: Rotated, Complex, Extended and Combined EOF 69**
 - 5.1 Introduction 69
 - 5.2 Rotated EOF..... 70
 - 5.3 Complex EOF 79
 - 5.4 Extended EOF 87
 - 5.5 Many Field Problems: Combined EOF 90
- 6 Cross-Covariance and the Singular Value Decomposition 97**
 - 6.1 The Cross-Covariance 97
 - 6.2 Cross-Covariance Analysis Using the SVD 99
- 7 The Canonical Correlation Analysis107**
 - 7.1 The Classical Canonical Correlation Analysis.....107
 - 7.2 The Modes.....109
 - 7.3 The Barnett–Preisendorfer Canonical Correlation Analysis114
- 8 Multiple Linear Regression Methods123**
 - 8.1 Introduction123
 - 8.1.1 A Slight Digression.....125
 - 8.2 A Practical PRO Method126
 - 8.2.1 A Different Scaling127
 - 8.2.2 The Relation Between the PRO Method and Other Methods128
 - 8.3 The Forced Manifold129
 - 8.3.1 Significance Analysis.....136
 - 8.4 The Coupled Manifold141
- References.....147**
- Index149**

A Guide to Empirical Orthogonal Functions for Climate
Data Analysis

Navarra, A.; Simoncini, V.

2010, VI, 151 p. With online files/update., Hardcover

ISBN: 978-90-481-3701-5
