

Contents

1	Introduction	1
1.1	Overview of Lab-on-Chip	1
1.1.1	Main Objectives of LoC Systems	1
1.2	From Macro to Micro Bioassays	3
1.2.1	Micro-scale Liquid Handling	3
1.2.2	Thermal Management in Microenvironment	4
1.2.3	DNA Amplification	5
1.2.4	Sample Handling	5
1.2.5	Advantages of Performing Bioassays in Microscale	8
1.3	CMOS-Based LoC	9
1.3.1	Manipulation Methods	10
1.3.2	Optical Techniques	12
1.3.3	Electrochemical Sensors	14
1.3.4	Mechanical Sensors	16
1.3.5	Magnetic Sensor	17
1.3.6	Temperature Control	18
1.3.7	Capacitive Sensing LoC	21
1.4	Objectives and Organization of Book	22
2	Capacitive Sensing Electrodes	25
2.1	On-Chip Microelectrode Configurations	25
2.1.1	Passivated Electrodes	25
2.1.2	Unpassivated Electrodes	27
2.1.3	Sensitivity-Enhanced Passivated Electrodes	27
2.1.4	Quasi Interdigitated Electrodes	27
2.1.5	Gold Electrodes on CMOS Chip	28
2.1.6	Microfluidic Channel Integrated Atop Sensing Electrodes	28
2.2	Micromachining Gold Electrode on CMOS Chip	29
2.3	Electrical Model of Sensing Electrodes	31
2.4	Summary	33

3	Capacitive Bio-interfaces.....	35
3.1	Biochemical Capacitive Sensing Methods.....	36
3.1.1	Hybridization Detection.....	36
3.1.2	Antibody–Antigen Recognition	37
3.1.3	Living Cells Monitoring.....	38
3.1.4	Organic Solvent Sensors	40
3.1.5	Bacteria Growth Monitoring	41
3.1.6	Polyelectrolyte Monolayer.....	43
3.1.7	Detection of Protein Conformation.....	44
3.2	Design of Recognition Element: An Example for Continuous Glucose Monitoring	45
3.2.1	Introduction to Glucokinase-Based Glucose Sensor.....	46
3.2.2	Immobilization of Glucokinase on Gold Electrode	47
3.2.3	Glucose Testing.....	48
3.3	Summary	50
4	Capacitive Interface Circuits for LoC Applications	51
4.1	LBCS Versus MBCS.....	51
4.1.1	Instant Measurement.....	51
4.1.2	Aqueous Measurement.....	52
4.1.3	On-Chip Sensing Electrodes	53
4.1.4	Measurement Time.....	53
4.1.5	RC Model Sample.....	53
4.2	LBCS Methods.....	54
4.2.1	SC-Based Interface Circuit	54
4.2.2	Time Constant Method.....	55
4.2.3	Capacitive Inverter Amplifier	56
4.2.4	CBCM Methods	59
4.3	Core–CBCM Interface Circuit.....	60
4.3.1	Principle of CBCM for Sensing Applications	60
4.3.2	Two Transistors CBCM Sensor.....	61
4.3.3	Opamp-Based Integrator Incorporated with CBCM Sensor	64
4.3.4	Differential Current CBCM Techniques	65
4.3.5	Current Mirror Integrated with CBCM Structure	66
4.4	Core-CBCM $\Sigma\Delta$ Capacitive Sensor	79
4.4.1	Definitions.....	79
4.4.2	Charge to Digital Converter	79
4.4.3	Discussions	82
4.4.4	Circuit Level Simulation Results	83
4.4.5	Decoding Technique	84
4.5	Core-CBCM Capacitive Sensing System	86
4.5.1	A System Level Realization.....	86
4.5.2	Experimental Procedures	87
4.6	Summary	90

5	Microfluidic Packaging Process	91
5.1	Microfluidic Packaging Methods.....	92
5.1.1	On-Chip Micromachining Procedures	92
5.1.2	Adhesive Methods.....	93
5.1.3	Rapid Prototyping Techniques	94
5.2	Direct-Write Microfabrication Process.....	95
5.2.1	Direct-Ink Writing	95
5.2.2	Fundamentals of DWFP.....	96
5.2.3	Direct-Write Microfluidic Fabrication Process.....	98
5.3	Direct-Write Microfluidic Packaging Procedure	105
5.3.1	Encapsulation of Bonding Pads and Wires	106
5.3.2	Ink Deposition.....	106
5.3.3	Fitting Connections	110
5.3.4	Fugitive Dam.....	110
5.3.5	Ink Encapsulation and Filling Process	110
5.3.6	Ink Removal and Analyte Injection	110
5.4	Emerging Applications of DWFP	112
5.4.1	Microvalve	112
5.4.2	Direct-Write Heat Exchanger	114
5.4.3	Optical Waveguide for Biosensing Applications	115
5.5	Summary	118
6	Current Technology and Future Works.....	119
6.1	Conventional Impedometric and Capacitive Measurement Systems	119
6.2	Handheld Impedance Measurement Systems	122
6.3	Towards Fully Integrated Capacitive Sensing LoC.....	124
6.3.1	Packaging.....	124
6.3.2	Capacitance Characterization.....	124
6.3.3	Electrical Modeling of Biological Sample.....	125
6.3.4	Cleaning Procedure	126
6.4	Summary	126
	References	127
	Index.....	143

CMOS Capacitive Sensors for Lab-on-Chip Applications

A Multidisciplinary Approach

Ghafari-Zadeh, E.; Sawan, M.

2010, X, 146 p., Hardcover

ISBN: 978-90-481-3726-8
