

TABLE OF CONTENTS

Preface	ix
MEMS/NEMS TECHNOLOGIES AND APPLICATIONS	
History of Early Research on MEMS in Russia (U.S.S.R.) <i>V. Vaganov</i>	3
Challenges of Complete CMOS/MEMS Systems Integration <i>V. Vaganov</i>	17
MEMS for Practical Applications <i>M. Esashi</i>	31
Nanochip: A MEMS-Based Ultra-High Data Density Memory Device <i>N. Belov, D. Adams, P. Ascanio, T.-K. Chou, J. Heck, B. Kim, G. Knight, Q. Ma, J.-S. Park, V. Rao, R. Stark, and G. Tchelepi</i>	41
Low Cost Silicon Coriolis' Gyroscope Paves the way to Consumer IMU <i>B. Vigna, F. Pasolini, R. De Nuccio, M. Capovilla, L. Prandi, and F. Biganzoli</i>	67
Microwave and Millimetre Wave Devices Based on Micromachining of III–V Semiconductors <i>A. Müller, D. Neculoiu, G. Konstantinidis, and T. Vähä-Heikilä</i>	75
Monocrystalline-Silicon Microwave MEMS Devices <i>J. Oberhammer, M. Sterner, and N. Somjit</i>	89
Three-Dimensional Photonic Crystals Based on Opal-Semiconductor and Opal-Metal Nanocomposites <i>V.G. Golubev</i>	101
MEMS DEVICE AND RELIABILITY PHYSICS	
Pull-in Dynamics of Electrostatically Actuated Bistable Micro Beams <i>S. Krylov and N. Dick</i>	117
Path Following and Numerical Continuation Methods for Non-Linear MEMS and NEMS <i>P.G. Steeneken and J. Stulemeijer</i>	129

The Impact of Dielectric Material and Temperature on Dielectric Charging in RF MEMS Capacitive Switches <i>G. Papaioannou</i>	141
--	-----

ADVANCED PROCESSES AND MATERIALS

Development of DRIE for the Next Generation of MEMS Devices <i>H. Ashraf, J. Hopkins, and L.M. Lea</i>	157
---	-----

Low-Temperature Processes for MEMS Device Fabrication <i>J. Kiihamäki, H. Kattelus, M. Blomberg, R. Puurunen, M. Laamanen, P. Pekko, J. Saarilahti, H. Ritala, and A. Rissanen</i>	167
---	-----

High-Temperature Stable Au–Sn and Cu–Sn Interconnects for 3D Stacked Applications <i>N. Hoivik, H. Liu, K. Wang, G. Salomonsen, and K. Aasmundtveit</i>	179
--	-----

3D Integration of MEMS and IC: Design, Technology and Simulations <i>M.M.V. Taklo, K. Schjølberg-Henriksen, N. Lietaer, J. Prainsack, A. Elfving, J. Weber, M. Klein, P. Schneider, and S. Reitz</i>	191
---	-----

Low-Frequency Electronic Noise in the Back-Gated and Top-Gated Graphene Devices <i>G. Liu, Q. Shao, A.A. Balandin, W. Stillman, M. Shur, and S. Rumyantsev</i>	205
---	-----

Modeling of Dry Etching in Production of MEMS <i>A. Rusakov, P. Bystrov, A. Knizhnik, and B. Potapkin</i>	215
--	-----

XRD and Raman Study of Low Temperature AlGaAs/GaAs(100) Heterostructures <i>P. Seređin, A. Glotov, E. Domashevskaya, I. Arsentyev, D. Vinokurov, A. Stankevich, and I. Tarasov</i>	225
---	-----

Internal Stresses in Martensite Formation in Copper Based Shape Memory Alloys <i>O. Adiguzel</i>	237
---	-----

SENSORS

Smart Sensors: Advantages and Pitfalls <i>P.J. French</i>	249
--	-----

Vertically Integrated MEMS SOI Composite Porous Silicon-Crystalline Silicon Cantilever-Array Sensors: Concept for Continuous Sensing of Explosives and Warfare Agents	261
<i>S. Stolyarova, A. Shemesh, O. Aharon, O. Cohen, L. Gal, Y. Eichen, and Y. Nemirovsky</i>	
Integration of Diverse Biological Materials in Micro/Nano Devices	275
<i>R. Ghodssi, P. Dykstra, M. Meyer, S. Koev, K. Gerasopoulos, X. Luo, G. Rubloff, W. Bentley, G. Payne, and J. Culver</i>	
Force Sensing Optimization and Applications	287
<i>J.C. Doll, S.-J. Park, A.J. Rastegar, N. Harjee, J.R. Mallon Jr., G.C. Hill, A.A. Barlian, and B.L. Pruitt</i>	
Using Parametric Resonance to Improve Micro Gyroscope Robustness	299
<i>L. Oropeza-Ramos, C.B. Burgner, and K.L. Turner</i>	
Subject Index	311
Author Index	313

Advanced Materials and Technologies for
Micro/Nano-Devices, Sensors and Actuators

Gusev, E.; Garfunkel, E.; Dideikin, A. (Eds.)

2010, XI, 314 p., Hardcover

ISBN: 978-90-481-3805-0
