<b>Acknowledgments.....</b>	<b>vii</b>
<b>Preface .....</b>	<b>ix</b>
Phenomenology of diesel combustion and modeling.....	ix
<b>1 Introduction .....</b>	<b>1</b>
Role of internal combustion engines .....	1
Developments in DI diesel engines .....	2
Modelling of combustion in DI diesel engines .....	6
<b>2 Phenomenology of Diesel Combustion and Modelling .....</b>	<b>9</b>
Combustion model.....	10
Emission models.....	14
Theme of the book.....	17
<b>3 Experiments .....</b>	<b>23</b>
Studies in a bomb .....	23
Real engine studies .....	29
<b>4 Turbulent Structure of the Diesel Spray.....</b>	<b>39</b>
Vaporising spray .....	39
Combusting sprays .....	49
Summary of the model for vapourising and combusting sprays .....	53
Modern view of the vaporising and burning spray.....	55
<b>5 Ignition Delay in a Diesel Engine .....</b>	<b>59</b>
Definition and measurement of ignition delay .....	60
Classical model for ignition delay and its extension to other fuels.....	61
Phenomenological model of ignition delay .....	63
<b>6 Heat Transfer.....</b>	<b>79</b>
<b>7 Heat Release in Indirect Injection Engines.....</b>	<b>83</b>
Description of the phenomenological model.....	84
Experimental technique .....	90
Results and discussions .....	91
Conclusions .....	94
<b>8 Mixing Correlations for Smoke and Fuel Consumption of Direct Injection Engines .....</b>	<b>99</b>
Characteristic parameter for air fuel mixing in a cross flow .....	100

Validation of the mixing parameter.....	107
Conclusion .....	111
<b>9 Heat Release in Direct Injection Engines.....</b>	<b>113</b>
Heat release rate in diesel engines.....	114
Model for mixing controlled combustion.....	117
Modelling three regimes of heat release rate.....	123
Steps to calculate heat release rate using the new model.....	124
Experimental validation .....	125
Heat release rate from the experiments .....	125
Estimation of heat transfer across the walls .....	126
Results .....	126
Discussions .....	130
<b>10 Hydrocarbons from DI Diesel Engines .....</b>	<b>137</b>
HC model.....	139
Predicting HC in the exhaust.....	143
Discussions .....	145
<b>11 Hydrocarbon Emissions from Spark Ignition Engines .....</b>	<b>147</b>
Description of the engine model .....	149
Comparison of the model prediction with engine experiments .....	156
Conclusions .....	164
<b>12 Smoke from DI Diesel Engines.....</b>	<b>167</b>
Phenomenon of soot formation .....	168
Application to engine conditions.....	171
<b>13 Oxides of Nitrogen from Direct Injection Diesel Engines .....</b>	<b>189</b>
Exhaust gas recirculation (EGR) .....	194
Phenomenology of oxides of nitrogen.....	195
<b>14 Particulate Matter from Direct Injection Diesel Engines.....</b>	<b>203</b>
Phenomenology of particulate matter (PM) .....	203
Validation of correlation.....	205
<b>15 Multi-dimensional Modelling of Diesel Combustion: Review .....</b>	<b>207</b>
Basic approach.....	208
Turbulence modelling.....	210
Spray and evaporation modelling.....	212
Combustion modelling .....	218
Pollutant emissions modelling.....	223
Heat transfer modelling .....	227

Efficient multi-dimensional simulation of diesel engine combustion with detailed chemistry .....	229
CFD codes for engine simulation .....	238
Future and challenge .....	241
<b>16 Multi-dimensional Modelling of Diesel Combustion: Applications .....</b>	<b>247</b>
Case studies .....	248
<b>Appendices .....</b>	<b>283</b>
Appendix I: Estimation of products of combustion from the interferogram .....	283
Appendix II: Estimation of concentration of fuel vapour in the vapourising and combusting spray from the interferogram .....	284
Appendix III: Estimation of mass and heat transfer functions .....	285
Appendix IV: Vapour pressure of diesel and fuels A & B and B* .....	285
Appendix V: Calculation of tangential velocity of air in the piston cavity from the inlet swirl number .....	286
Appendix VI: Momentum of useful air of the three different combustion cavities described in Kuo <i>et al.</i> (1988) .....	286
Appendix VII: Momentum of useful air for engines A8, B8, C8 and D8 .....	287
Appendix VIII: Estimation of spray properties and impingement parameters .....	288
Appendix IX: Calculation of fuel injection rate .....	290
Appendix X: Influence of nozzle features .....	291
Appendix XI: Henry's constant $H_c$ for fuel (n-octane) in oil .....	292
Appendix XII: Evaluation of $g_F^*$ and $g_G^*$ .....	293
Appendix XIII: In-cylinder oxidation of HC .....	294
Appendix XIV: Estimation of wall surface temperature .....	297
Appendix XV: Experimental data on HC emissions from DI diesel engines .....	298
<b>Index .....</b>	<b>301</b>
