5 Additive Processes for Piezoelectric Materials:

Piezoelectric MEMS	273
5.1 Introduction to Piezoelectric Thin Films	273
5.1.1 Direct and Converse Piezoelectricity	275
5.1.2 Materials – Ferroelectrics and Nonferroelectrics	276
5.1.3 Fundamental Design Equations and Models	281
5.1.3.1 Linear Constitutive Equations of Piezoelectricity	281
5.1.3.2 Electromechanical Coupling Factors	282
5.1.3.3 Influence of Boundary Conditions	284
5.1.3.4 Device Configurations	285
5.1.3.5 Free Strain and Blocking Force	287
5.1.3.6 Cantilever Unimorph Model	288
5.1.3.7 Actuator Force Generation Against External Loads	291
5.1.3.8 Piezoelectric Sensing	292
5.1.3.9 Equivalent Circuit Models	294
5.1.3.10 Thin-Film Ferroelectric Nonlinearity	295
5.1.3.11 Heat Generation	299
5.1.4 Materials Selection Guide	299
5.1.5 Applications	300
5.2 Polar Materials: AlN and ZnO	301
5.2.1 Material Deposition	301
5.2.2 Patterning Techniques	305
5.2.3 Device-Design Concerns	307
5.2.4 Device Examples	309
5.2.5 Case Study	313
5.3 Ferroelectrics: PZT	318
5.3.1 Material Deposition	318
5.3.2 Patterning Techniques	324
5.3.3 Device Design Concerns	328
5.3.4 Device Examples	333
5.3.5 Case Study on the Design and Processing of a RF MEMS Switch Using PZT Thin-Film Actuators	338
5.4 Summary	343
