

Contents

Preface	vii
Acknowledgments	xi
List of Illustrations	xiii
1 Exploring the world of galaxies	1
1.1 Finding the galaxies	3
1.2 Galaxy properties: classification and evolving views	11
1.3 Modern views: universal classes and scalings	18
1.4 Discovering collisions and interactions	23
1.5 Collision basics	27
2 Head-on collisions and rings of fire	31
2.1 Early stage archetypes	31
2.2 Forging the rare rings	32
2.3 Why rings?	40
2.4 How precise a bullseye? Angles and offsets	41
2.5 Taffy galaxies and shovels: companions with gas disks	44
2.6 Twice-made rings	47
2.7 Bejeweled rings	49
2.8 The mysterious cartwheel: prototype or anomaly?	51
2.9 Other ways to make rings	53
3 Swinging on by: the tidal twists	57
3.1 Tides near and far	57
3.2 Discovering the whirlpool spirals	62
3.3 Into the tidal whirlpool: understanding the mechanisms	64
3.4 The foaming waves	68
3.5 The eye galaxies	71
3.6 Making bars	72
3.7 Probing the darkness with tails and dwarfs	75
3.8 Retrograde encounters: dancing backwards	86
4 Major mergers and their colossal consequences	93
4.1 Ellipticals from mergers?	93
4.2 A sticky aside on dynamical friction	96
4.3 Bringing a little data to the subject	98
4.4 Relaxing in the merger: quickly and violently!	100

4.5	Starbursts, super-starbursts and mergers	103
4.6	A new generation of merger studies	110
4.7	Starbursts, winds and nuclear activity	114
4.8	Growing quasars	119
4.9	Merger models with feedback	123
4.10	Ellipticals and mergers again	130
5	What happens to the little guy: minor mergers	139
5.1	Classifications and destructive processes	139
5.2	Global dynamical friction and anti-friction	145
5.3	Cumulative effects	149
6	The secret of fire: triggered star formation	155
6.1	Counting young stars	155
6.2	The spreading fire	162
6.3	Attacking the flames with the latest tools	167
6.4	Glowing embers: induced star cluster formation	170
6.5	Fading embers: star cluster disruption	178
6.6	How to start the fire	182
6.7	Forecasting fires	187
6.8	How did it burn?	195
7	Not always in a galaxy far, far away	201
7.1	Our Local Group of galaxies	201
7.2	Collisions here and now: the Magellanic Clouds	203
7.3	Collisions now and then: contrails in the halo	215
7.4	... And those yet to come	226
8	A wider view	233
8.1	In the beginning...	233
8.2	Many different evolutionary pathways in groups	239
8.3	The bright lights of the galaxy metropolis	251
9	Epilogue: the galacto-biology of collisions	261
	Glossary	273
	Resources	277
	Index	279

Galaxy Collisions

Forging New Worlds from Cosmic Crashes

Struck, C.

2011, XV, 285 p., Softcover

ISBN: 978-0-387-85370-3
