A Collocation Method for Cauchy Integral Equations in L^2	1
M. Ahues and A. Mennouni	
1 Introduction	1
2 Description of the Method	1
3 Numerical Example	4
References	5
On a New Definition of the Reynolds Number from the Interplay of Macroscopic and Microscopic Phenomenology	7
B.E.J. Bodmann, M.T. Vilhena, J.R. Zabadal, and D. Beck	
1 Introduction	7
2 The Vortex Correlator	8
3 The Transport Equation	10
4 Conclusion	12
References	14
A Self-Consistent Monte Carlo Validation Procedure for Hadron Cancer Therapy Simulation	15
L.N. Burigo, D. Hadjimichef, and B.E.J. Bodmann	
1 Introduction	15
2 Particle Transport by GEANT4 Monte Carlo	16
3 Heavy Ion Transport	17
4 Simulation Results and Validation	19
5 Conclusion	21
References	22
A General Analytical Solution of the Advection–Diffusion Equation for Fickian Closure	25
D. Buske, M.T. Vilhena, C.F. Segatto, and R.S. Quadros	
1 Introduction	25
2 The Analytical Solution	26
3 Experimental Data and Turbulent Parameterization	30

4	Numerical Results	30
5	Conclusions	31
	References	33
 A Novel Method for Simulating Spectral Nuclear Reactor Criticality by a Spatially Dependent Volume Size Control 35		
D.Q. de Camargo, B.E.J. Bodmann, M.T. Vilhena, and S.d.Q.B. Leite		
1	Introduction	35
