# Contents

<b>Preface</b> .....	IX
<b>Introduction</b> .....	XI
<b>I Elementary local properties of holomorphic functions of several complex variables</b> .....	1
1 Notation and definitions .....	1
2 The Cauchy formula for polydiscs .....	3
3 The open mapping theorem .....	8
4 Series of holomorphic functions .....	10
5 Holomorphic maps .....	11
6 Some holomorphic extension theorems .....	13
<b>II Currents and complex structures</b> .....	21
1 Currents .....	21
2 Regularisation .....	28
3 Kronecker index of two currents .....	38
4 Complex analytic manifolds .....	44
5 Complex structures .....	46
6 Differential forms of type $(p, q)$ .....	48
7 The $\bar{\partial}$ operator and Dolbeault cohomology .....	49
8 Complex tangent space to the boundary of a domain .....	52
<b>III The Bochner–Martinelli–Koppelman kernel and formula and applications</b> .....	57
1 The Bochner–Martinelli–Koppelman kernel and formula .....	57
2 Existence of solutions to the $\bar{\partial}$ equation for compactly supported data .....	63
3 Regularity of $\bar{\partial}$ .....	68
4 Hartogs’ phenomenon .....	71

<b>IV</b>	<b>Extensions of CR functions</b> . . . . .	75
1	The Bochner–Martinelli transform . . . . .	75
2	CR functions on a real hypersurface . . . . .	79
3	Bochner’s theorem . . . . .	82
4	Stokes’ formula for CR functions . . . . .	86
5	Integral of the Bochner–Martinelli kernel . . . . .	88
6	An extension theorem for CR functions . . . . .	90
<b>V</b>	<b>Extensions of holomorphic and CR functions on manifolds</b>	95
1	Cohomology with compact support and Hartogs’ phenomenon	95
2	Extension of $\mathcal{C}^\infty$ CR functions . . . . .	98
3	The Cauchy–Fantappi� formula and Dolbeault’s lemma . . . . .	100
4	The Dolbeault isomorphism . . . . .	105
5	Bochner’s theorem and extensions of CR functions on manifolds . . . . .	110
<b>VI</b>	<b>Domains of holomorphy and pseudoconvexity</b> . . . . .	113
1	Domains of holomorphy and holomorphic convexity . . . . .	113
2	Plurisubharmonic functions . . . . .	121
3	Pseudoconvexity . . . . .	133
<b>VII</b>	<b>The Levi problem and the resolution of <math>\bar{\partial}</math> in strictly pseudoconvex domains</b> . . . . .	147
1	Solving $\bar{\partial}$ with H�lder estimates in strictly convex open sets .	147
2	Local uniform approximation of $\bar{\partial}$ -closed forms in strictly pseudoconvex domains . . . . .	157
3	Finiteness of Dolbeault cohomology groups of strictly pseudoconvex domains . . . . .	160
4	Invariance of Dolbeault cohomology under strictly pseudoconvex extensions . . . . .	162
5	Vanishing theorems for Dolbeault cohomology of strictly pseudoconvex domains in $\mathbb{C}^n$ . . . . .	166
6	Integral formulae for solving $\bar{\partial}$ with H�lder estimates in strictly pseudoconvex domains . . . . .	168
7	The Levi problem in $\mathbb{C}^n$ . . . . .	176
8	The Levi problem for complex analytic manifolds . . . . .	179
<b>VIII</b>	<b>Characterisation of removable singularities of CR functions on a strictly pseudoconvex boundary</b> . . . . .	195
1	Reduction to continuous functions . . . . .	195
2	The two-dimensional case . . . . .	196
3	A cohomological characterisation in dimension $n \geq 3$ . . . . .	198
4	Characterisation of weakly removable singularities . . . . .	200

---

**Appendix**

---

<b>A</b>	<b>Differentiable manifolds and differential forms</b> . . . . .	213
1	Differentiable manifolds . . . . .	213
2	Partitions of unity . . . . .	215
3	Cotangent space at a point and differential forms of degree 1 .	216
4	The tangent space at a point and vector fields . . . . .	218
5	The algebra of differential forms . . . . .	221
6	Integration of differential forms . . . . .	226
7	Stokes' theorem . . . . .	230
<b>B</b>	<b>Sheaf theory</b> . . . . .	233
<b>C</b>	<b>Functional analysis</b> . . . . .	241
	<b>References</b> . . . . .	245
	<b>Index of notation</b> . . . . .	249
	<b>Index</b> . . . . .	251

Holomorphic Function Theory in Several Variables

An Introduction

Laurent-Thiébaud, C.

2011, XIII, 252 p., Softcover

ISBN: 978-0-85729-029-8
