

# Contents

<b>1</b>	<b>Preliminaries</b>	<b>1</b>
1.1	Banach Spaces and Linear Operators	1
1.2	Sobolev Spaces and Elliptic Boundary Value Problems	3
1.2.1	Variational Theory of Elliptic Boundary Value Problems	7
1.2.2	Infinite-dimensional Sobolev Spaces	10
1.3	The Semigroups of Class $C_0$	12
1.4	The Nonlinear Cauchy Problem	14
1.5	Strong Solutions to Navier–Stokes Equations	17
<b>2</b>	<b>Stabilization of Abstract Parabolic Systems</b>	<b>25</b>
2.1	Nonlinear Parabolic-like Systems	25
2.2	Internal Stabilization of Linearized System	30
2.2.1	The Case of Not Semisimple Eigenvalues	37
2.2.2	Direct Proportional Stabilization of Unstable Modes	40
2.3	Boundary Stabilization of Linearized System	42
2.4	Stabilization by Noise of the Linearized Systems	45
2.4.1	The Boundary Stabilization by Noise	50
2.5	Internal Stabilization of Nonlinear Parabolic-like Systems	52
2.5.1	High-gain Riccati-based Stabilizable Feedback	54
2.5.2	Low-gain Riccati-based Stabilizable Feedback	57
2.5.3	Internal Stabilization of Nonlinear System via High-gain Riccati-based Feedback	58
2.5.4	Internal Stabilization of Nonlinear System via Low-gain Riccati-based Feedback	61
2.5.5	High-gain Feedback Controller Versus Low-gain Controller and Robustness	63
2.6	Stabilization of Time-periodic Flows	66
2.6.1	The Functional Setting	66
2.6.2	Stabilization of the Linearized Time-periodic System	68
2.6.3	The Stabilizing Riccati Equation	74
2.6.4	Stabilization of Nonlinear System (2.148)	79
2.7	Comments to Chap. 2	85

<b>3</b>	<b>Stabilization of Navier–Stokes Flows</b>	87
3.1	The Navier–Stokes Equations of Incompressible Fluid Flows	87
3.2	The Spectral Properties of the Stokes–Oseen Operator	91
3.3	Internal Stabilization via Spectral Decomposition	93
3.3.1	The Internal Stabilization of the Stokes–Oseen System	94
3.3.2	The Stabilization of Stokes–Oseen System by Proportional Feedback Controller	100
3.3.3	Internal Stabilization via Feedback Controller; High-gain Riccati-based Feedback	103
3.3.4	Internal Stabilization; Low-gain Riccati-based Feedback	112
3.4	The Tangential Boundary Stabilization of Navier–Stokes Equations	119
3.4.1	The Tangential Boundary Stabilization of the Stokes–Oseen Equation	120
3.4.2	Stabilizable Boundary Feedback Controllers via Low-gain Riccati Equation	130
3.4.3	The Boundary Feedback Stabilization of Navier–Stokes Equations	135
3.5	Normal Stabilization of a Plane-periodic Channel Flow	142
3.5.1	Feedback Stabilization	149
3.6	Internal Stabilization of Time-periodic Flows	156
3.7	The Numerical Implementation of Stabilizing Feedback	159
3.8	Unique Continuation and Generic Properties of Eigenfunctions	164
3.9	Comments on Chap. 3	174
<b>4</b>	<b>Stabilization by Noise of Navier–Stokes Equations</b>	177
4.1	Internal Stabilization by Noise	177
4.1.1	Stabilization by Noise of the Linearized Navier–Stokes System	180
4.1.2	Proof of Theorem 4.1	181
4.1.3	Stabilization by Noise of Navier–Stokes Equations	186
4.1.4	Proof of Theorem 4.2	188
4.1.5	Stochastic Stabilization Versus Deterministic Stabilization	199
4.2	Stabilization of the Stokes–Oseen Equation by Impulse Feedback Noise Controllers	201
4.2.1	Proof of Theorem 4.3	204
4.2.2	Proof of Theorem 4.4	209
4.2.3	The Robustness of the Noise Feedback Controller	209
4.2.4	Deterministic Impulse Controller	211
4.3	The Tangential Boundary Stabilization by Noise	211
4.4	Stochastic Stabilization of Periodic Channel Flows by Noise Wall Normal Controllers	217
4.4.1	Feedback Stabilization	221
4.4.2	Proof of Theorem 4.6	223
4.5	Stochastic Processes	230
4.6	Comments on Chap. 4	236

<b>5</b>	<b>Robust Stabilization of the Navier–Stokes Equation via the <math>H^\infty</math>-Control Theory</b>	237
5.1	The State-space Formulation of the $H^\infty$ -Control Problem	237
5.2	The $H^\infty$ -Control Problem for the Stokes–Oseen System	248
5.2.1	Internal Robust Stabilization with Regulation of Turbulent Kinetic Energy	249
5.2.2	Robust Internal Stabilization with the Regulation of Fluid Enstrophy	251
5.3	The $H^\infty$ -Control Problem for the Navier–Stokes Equations	252
5.3.1	Proof of Theorem 5.7	254
5.4	The $H^\infty$ -Control Problem for Boundary Control Problem	267
5.4.1	The Abstract Formulation	268
5.4.2	The $H^\infty$ -Boundary Control Problem for the Linearized Navier–Stokes Equation	269
5.5	Comments on Chap. 5	270
