

Contents

- 1 Propositional Logic 1**
 - 1.1 Statements 1
 - 1.2 Implication and Equivalence 5
 - 1.3 Adequate Sets of Connectives 8
 - 1.4 Normal Form 11
 - 1.5 Multivalued Logic 14
 - References 18
- 2 Semi-tensor Product of Matrices 19**
 - 2.1 Multiple-Dimensional Data 19
 - 2.2 Semi-tensor Product of Matrices 29
 - 2.3 Swap Matrix 37
 - 2.4 Properties of the Semi-tensor Product 41
 - 2.5 General Semi-tensor Product 49
 - References 53
- 3 Matrix Expression of Logic 55**
 - 3.1 Structure Matrix of a Logical Operator 55
 - 3.2 Structure Matrix for k -valued Logic 59
 - 3.3 Logical Matrices 63
 - References 65
- 4 Logical Equations 67**
 - 4.1 Solution of a Logical Equation 67
 - 4.2 Equivalent Algebraic Equations 68
 - 4.3 Logical Inference 78
 - 4.4 Substitution 84
 - 4.5 k -valued Logical Equations 85
 - 4.6 Failure Location: An Application 89
 - 4.6.1 Matrix Expression of Route Logic 89
 - 4.6.2 Failure Location 92

4.6.3	Cascading Inference	97

Analysis and Control of Boolean Networks

A Semi-tensor Product Approach

Cheng, D.; Qi, H.; Li, Z.

2011, XVI, 472 p., Hardcover

ISBN: 978-0-85729-096-0
