

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Domains and Uses	2
1.2	Questions about Voting Systems	3
1.3	Simulation Phases	4
1.4	Phase 1: Define the System and Team Charter	5
1.5	Problems	6
<b>2</b>	<b>Probability Theory and Monte Carlo</b>	<b>9</b>
2.1	Random Variables and Expected Values	9
2.2	Confidence Intervals	12
2.2.1	Confidence Intervals Construction Method	12
2.3	Expected Value Formula and Leaps of Faith	15
2.4	Discrete Event Simulation	17
2.4.1	Linear Congruential Generators	18
2.4.2	Inverse Cumulative Distribution Functions	19
2.4.3	Discrete Event Simulation	21
2.5	Monte Carlo Errors	23
2.6	Monte Carlo Simulation Example	24
2.6.1	Problem	24
2.6.2	Solution	24
2.7	Voting Systems Example Summary	25
2.8	Problems	26
<b>3</b>	<b>Input Analysis</b>	<b>29</b>
3.1	Guidelines for Gathering Data	29
3.2	Relative Frequency Histograms and SSE	32
3.2.1	Relative Frequency Histograms	32
3.2.2	Sum of Squares Error	33
3.3	The Kolmogorov–Smirnov Test	35
3.3.1	Constructing Cumulative Empirical Distributions	35
3.3.2	The Kolmogorov–Smirnov Test	36

3.4	Empirical Distributions . . . . .	37
3.5	Summary Example . . . . .	39
3.6	Problems . . . . .	40
<b>4</b>	<b>Simulating Waiting Times. . . . .</b>	<b>43</b>
4.1	Exponential Interarrivals or Poisson Processes . . . . .	44
4.2	Discrete Event Simulation Controllers . . . . .	45
4.3	IID Normally Distributed. . . . .	48
4.4	Batching Complete Replicates for Normality . . . . .	50
4.4.1	The Central Limit Theorem . . . . .	50
4.4.2	Batching for Normality . . . . .	51
4.5	Other Arrival Processes . . . . .	53
4.6	Model Verification and Validation . . . . .	53
4.7	Summary Example . . . . .	55
4.8	Problems . . . . .	56
<b>5</b>	<b>Output Analysis . . . . .</b>	<b>59</b>
5.1	Multiple Comparisons Techniques . . . . .	61
5.1.1	The Bonferroni Inequality and Simultaneous Intervals. . . . .	61
5.1.2	Which Election System Reduces Voter Waits? . . . . .	63
5.1.3	Sample Size Estimates. . . . .	65
5.2	Statistical Selection and Ranking Methods (Optional) . . . . .	66
5.2.1	Subset Selection and Indifference Zone Procedures . . . . .	66
5.2.2	Subset Selection . . . . .	67
5.2.3	An Indifference Zone Method . . . . .	68
5.3	Design of Experiments and Main Effects Plots (Optional) . . . . .	70
5.4	Black Box Simulation Optimization Methods (Optional) . . . . .	73
5.4.1	Variable Sample Size Methods . . . . .	74
5.4.2	Population Indifference Zone Search Method . . . . .	75
5.5	Output Analysis and Steady State Simulation . . . . .	76
5.6	Problems . . . . .	76
<b>6</b>	<b>Theory of Queues. . . . .</b>	<b>79</b>
6.1	Steady State Utilization . . . . .	80
6.2	Number of Machines Formula . . . . .	81
6.3	Steady State Theory (Optional). . . . .	82
6.4	Little's Law and Expected Waiting Times . . . . .	84
6.5	Summary Example . . . . .	84
6.6	Problems . . . . .	85
<b>7</b>	<b>Decision Support and Voting Systems Case Study . . . . .</b>	<b>87</b>
7.1	Theory of Constraints . . . . .	88
7.2	Lean Production . . . . .	88

7.3	Sample Project: Lessons from the 2008 Election in Ohio . . .	90
7.3.1	Project Definition: Learning What Works . . . . .	90
7.3.2	Input Analysis and HAVA Compliance . . . . .	92
7.3.3	Simulation and Non-Interacting Systems . . . . .	92
7.3.4	Output Analysis: Studying Alternative Scenarios . . .	94
7.3.5	Decision Support . . . . .	95
7.4	Case Study of Supermarket Checkout Fast Lane. . . . .	97
7.4.1	Problem Definition . . . . .	97
7.4.2	Input Analysis . . . . .	98
7.4.3	Simulation . . . . .	100
7.4.4	Modeling Using Alternative Software: SIMIO . . . . .	101
7.4.5	Output Analysis . . . . .	104
7.4.6	Decision Support . . . . .	105
7.5	Project Planning Exercise . . . . .	107
7.6	Problems . . . . .	108
<b>8</b>	<b>Variance Reduction Techniques and Quasi-Monte Carlo . . . . .</b>	<b>111</b>
8.1	Variance-Reduction Techniques and Common Random Numbers . . . . .	112
8.1.1	Common Random Numbers . . . . .	113
8.2	“Better” than Pseudorandom . . . . .	115
8.2.1	Latin Hypercube Sampling. . . . .	115
8.2.2	Descriptive Sampling . . . . .	116
8.2.3	Quasi-Monte Carlo Sampling . . . . .	117
8.2.4	Comparison of Alternative Techniques . . . . .	119
8.3	Importance Sampling and Rare Events . . . . .	121
8.4	Getting More Out of a Stream than the Batch Average . . . . .	121
8.5	Problems . . . . .	123
<b>9</b>	<b>Simulation Software and Visual Basic . . . . .</b>	<b>125</b>
9.1	Getting Started . . . . .	126
9.1.1	Making a Simple Program . . . . .	127
9.1.2	Other Ways to Interact with Excel . . . . .	128
9.2	Loops: For and Do-While . . . . .	129
9.3	Conditional Statements: If-Then-Else and Case . . . . .	131
9.4	Subroutines and Functions . . . . .	131
9.5	Visual Basic and Simulation . . . . .	132
9.5.1	Pseudorandom Numbers and Initialization . . . . .	133
9.5.2	The Event Controller. . . . .	135
9.5.3	Arrival and Departure Events . . . . .	137
9.5.4	Calling the Average Waiting Time Function . . . . .	142
9.4	Problems . . . . .	143

<b>10</b>	<b>Introduction to ARENA Software</b>	145
10.1	Getting Started: Voting Example	146
10.2	ARENA Input Analyzer	153
10.3	ARENA Process Analyzer	154
10.4	Processes, Resources, Queues, and Termination	155
10.5	Nonhomogeneous and Batch Arrivals	156
10.6	Summary Example	156
10.7	Problems	158
<b>11</b>	<b>Advanced Modeling with ARENA</b>	161
11.1	Stations	162
11.2	Animation	163
11.3	Scheduling	164
11.4	Manufacturing Example: Decide, Assign, and Stations	165
11.5	Additional Examples: Health Care and Manufacturing	168
11.5.1	Single Machine System	168
11.5.2	Acute-Care Facility	169
11.6	Problems	170
<b>12</b>	<b>Agents and New Directions</b>	175
12.1	Agent-based and Other Types of Simulation	176
12.2	The History of Agent-based Simulation	179
12.3	NetLogo	181
12.4	New Directions	186
12.5	Problems	189
<b>13</b>	<b>Answers to Odd Problems</b>	191
13.1	Solutions: Chapter 1	191
13.2	Solutions: Chapter 2	192
13.3	Solutions: Chapter 3	193
13.4	Solutions: Chapter 4	194
13.5	Solutions: Chapter 5	195
13.6	Solutions: Chapter 6	196
13.7	Solutions: Chapter 7	196
13.8	Solutions: Chapter 8	197
13.9	Solutions: Chapter 9	198
13.10	Solutions: Chapter 10	201
13.11	Solutions: Chapter 11	202
13.12	Solutions: Chapter 12	207

	<b>Index</b>	213

Introduction to Discrete Event Simulation and  
Agent-based Modeling

Voting Systems, Health Care, Military, and  
Manufacturing

Allen, T.

2011, XII, 215 p., Hardcover

ISBN: 978-0-85729-138-7
