Part I Preliminaries and Literature Review

| | | |
|----------|----------------------------------------------------------------------------|-----------|
| 1 | Preliminaries | 3 |
| 1.1 | Notations | 3 |
| 1.2 | Algebraic Graph Theory Background | 5 |
| 1.3 | Algebra and Matrix Theory Background | 9 |
| 1.4 | Linear and Nonlinear System Theory Background | 13 |
| 1.5 | Nonsmooth Analysis Background | 17 |
| 1.6 | Time-delay System Theory Background | 19 |
| 1.7 | Notes | 21 |
| 2 | Overview of Recent Research in Distributed Multi-agent Coordination | 23 |
| 2.1 | Introduction | 23 |
| 2.2 | Consensus | 25 |
| 2.2.1 | Delay Effect | 26 |
| 2.2.2 | Convergence Speed | 27 |
| 2.2.3 | Stochastic Setting | 27 |
| 2.2.4 | Complex Systems | 28 |
| 2.2.5 | Quantization | 29 |
| 2.2.6 | Sampled-data Setting | 29 |
| 2.2.7 | Finite-time Convergence | 29 |
| 2.2.8 | Asynchronous Effect | 30 |
| 2.3 | Distributed Formation Control | 30 |
| 2.3.1 | Formation Producing | 30 |
| 2.3.2 | Formation Tracking | 32 |
| 2.3.3 | Connectivity Maintenance | 34 |
| 2.3.4 | Controllability | 34 |
| 2.4 | Distributed Optimization | 35 |
| 2.4.1 | Individual Cost Functions | 35 |
| 2.4.2 | Global Cost Functions | 35 |

| | | |
|-------|------------------------------------------|----|
| 2.5 | Distributed Task Assignment | 36 |
| 2.5.1 | Coverage Control | 36 |
| 2.5.2 | Scheduling | 37 |
| 2.5.3 | Surveillance | 38 |
| 2.6 | Distributed Estimation and Control | 38 |
| 2.7 | Intelligent Coordination | 39 |
| 2.7.1 | Pursuer–invader Problem | 39 |
| 2.7.2 | Game Theory | 40 |
| 2.8 | Discussion | 40 |
| 2.9 | Notes | 41 |

Part II Emergent Problems in Distributed Multi-agent Coordination

| | | |
|----------|----------------------------------------------------------------------|------------|
| 3 | Collective Periodic Motion Coordination | 45 |
| 3.1 | Cartesian Coordinate Coupling | 45 |
| 3.1.1 | Single-integrator Dynamics | 46 |
| 3.1.2 | Double-integrator Dynamics | 51 |
| 3.1.3 | Simulation | 60 |
| 3.2 | Coupled Harmonic Oscillators | 62 |
| 3.2.1 | Problem Statement | 63 |
| 3.2.2 | Convergence Under Directed Fixed Interaction | 64 |
| 3.2.3 | Convergence Under Directed Switching Interaction | 69 |
| 3.2.4 | Application to Motion Coordination in Multi-agent Systems | 72 |
| 3.3 | Notes | 74 |
| 4 | Collective Tracking with a Dynamic Leader | 77 |
| 4.1 | Problem Statement | 77 |
| 4.2 | Collective Tracking for Single-integrator Dynamics | 78 |
| 4.2.1 | Coordinated Tracking Under Fixed and Switching Interaction | 78 |
| 4.2.2 | Swarm Tracking Under Switching Interaction | 83 |
| 4.3 | Collective Tracking for Double-integrator Dynamics | 85 |
| 4.3.1 | Coordinated Tracking when the Leader’s Velocity is Varying | 85 |
| 4.3.2 | Coordinated Tracking when the Leader’s Velocity is Constant | 91 |
| 4.3.3 | Swarm Tracking when the Leader’s Velocity is Constant ... | 92 |
| 4.3.4 | Swarm Tracking when the Leader’s Velocity is Varying | 93 |
| 4.4 | Simulation | 96 |
| 4.5 | Notes | 104 |
| 5 | Containment Control with Multiple Leaders | 109 |
| 5.1 | Problem Statement | 109 |
| 5.2 | Stability Analysis for Multiple Stationary Leaders | 111 |
| 5.2.1 | Directed Fixed Interaction | 111 |
| 5.2.2 | Directed Switching Interaction | 113 |
| 5.2.3 | Simulation | 120 |
| 5.3 | Stability Analysis for Multiple Dynamic Leaders | 122 |

| | | |
|-------|------------------------------------------------------|-----|
| 5.3.1 | Directed Fixed Interaction | 123 |
| 5.3.2 | Directed Switching Interaction | 127 |
| 5.3.3 | Simulation | 132 |
| 5.4 | Containment Control with Swarming Behavior | 132 |
| 5.4.1 | Algorithm Design | 133 |
| 5.4.2 | Analysis for Multiple Stationary Leaders | 135 |
| 5.4.3 | Analysis for Multiple Dynamic Leaders | 137 |
| 5.4.4 | Simulation | 141 |
| 5.5 | Notes | 144 |

Part III Emergent Models in Distributed Multi-agent Coordination

| | | |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 6 | Networked Lagrangian Systems | 147 |
| 6.1 | Problem Statement | 147 |
| 6.2 | Distributed Leaderless Coordination for Networked Lagrangian Systems | 149 |
| 6.2.1 | Fundamental Algorithm | 150 |
| 6.2.2 | Nonlinear Algorithm | 152 |
| 6.2.3 | Algorithm Accounting for Unavailability of Measurements of Generalized Coordinate Derivatives | 155 |
| 6.2.4 | Simulation | 157 |
| 6.3 | Distributed Coordinated Regulation and Tracking for Networked Lagrangian Systems | 161 |
| 6.3.1 | Coordinated Regulation when the Leader's Vector of Generalized Coordinates is Constant | 162 |
| 6.3.2 | Coordinated Tracking when the Leader's Vector of Generalized Coordinate Derivatives is Constant | 165 |
| 6.3.3 | Coordinated Tracking when the Leader's Vector of Generalized Coordinate Derivatives is Varying | 174 |
| 6.3.4 | Simulation | 180 |
| 6.4 | Notes | 181 |
| 7 | Networked Fractional-order Systems | 185 |
| 7.1 | Problem Statement | 185 |
| 7.2 | Stability Analysis of a Coordination Algorithm for Networked Fractional-order Systems | 188 |
| 7.2.1 | Directed Fixed Interaction | 188 |
| 7.2.2 | Directed Switching Interaction | 192 |
| 7.2.3 | Simulation | 194 |
| 7.3 | Stability Analysis of Fractional-order Coordination Algorithms with Absolute/Relative Damping for Networked Fractional-order Systems | 197 |
| 7.3.1 | Absolute Damping | 197 |
| 7.3.2 | Relative Damping | 199 |
| 7.3.3 | Simulation | 202 |

| | | |
|-----|-------------|-----|
| 7.4 | Notes | 204 |
|-----|-------------|-----|

Part IV Emergent Issues in Distributed Multi-agent Coordination

| | | |
|----------|-------------------------------------------------------------------------------------------------------------------------------|------------|
| 8 | Sampled-data Setting | 207 |
| 8.1 | Sampled-data Coordinated Tracking for Single-integrator Dynamics | 207 |
| 8.1.1 | Algorithm Design | 208 |
| 8.1.2 | Convergence Analysis of the Proportional-derivative-like Discrete-time Coordinated Tracking Algorithm | 209 |
| 8.1.3 | Comparison Between the Proportional-like and Proportional-derivative-like Discrete-time Coordinated Tracking Algorithms | 213 |
| 8.1.4 | Simulation | 215 |
| 8.2 | Sampled-data Coordination for Double-integrator Dynamics Under Fixed Interaction | 217 |
| 8.2.1 | Coordination Algorithms with Absolute and Relative Damping | 217 |
| 8.2.2 | Convergence Analysis of the Sampled-data Coordination Algorithm with Absolute Damping | 218 |
| 8.2.3 | Convergence Analysis of the Sampled-data Coordination Algorithm with Relative Damping | 224 |
| 8.2.4 | Simulation | 228 |
| 8.3 | Sampled-data Coordination for Double-integrator Dynamics Under Switching Interaction | 230 |
| 8.3.1 | Convergence Analysis of the Sampled-data Coordination Algorithm with Absolute Damping | 231 |
| 8.3.2 | Convergence Analysis of the Sampled-data Coordination Algorithm with Relative Damping | 234 |
| 8.3.3 | Simulation | 237 |
| 8.4 | Notes | 240 |
| 9 | Optimality Aspect | 241 |
| 9.1 | Problem Statement | 241 |
| 9.2 | Optimal Linear Coordination Algorithms in a Continuous-time Setting from a Linear Quadratic Regulator Perspective | 243 |
| 9.2.1 | Optimal State Feedback Gain Matrix Using the Interaction-free Cost Function | 244 |
| 9.2.2 | Optimal Scaling Factor Using the Interaction-related Cost Function | 247 |
| 9.2.3 | Illustrative Examples | 250 |
| 9.3 | Optimal Linear Coordination Algorithms in a Discrete-time Setting from a Linear Quadratic Regulator Perspective | 251 |
| 9.3.1 | Optimal State Feedback Gain Matrix Using the Interaction-free Cost Function | 251 |

| | | |
|-----------|------------------------------------------------------------------------------------------------------------------------|------------|
| 9.3.2 | Optimal Scaling Factor Using the Interaction-related Cost Function | 259 |
| 9.3.3 | Illustrative Examples | 260 |
| 9.4 | Notes | 261 |
| 10 | Time Delay | 263 |
| 10.1 | Problem Statement | 263 |
| 10.2 | Coordination for Single-integrator Dynamics with Communication and Input Delays Under Directed Fixed Interaction | 264 |
| 10.2.1 | Leaderless Coordination | 264 |
| 10.2.2 | Coordinated Regulation when the Leader's Position is Constant | 268 |
| 10.2.3 | Coordinated Tracking with Full Access to the Leader's Velocity | 270 |
| 10.2.4 | Coordinated Tracking with Partial Access to the Leader's Velocity | 273 |
| 10.3 | Coordination for Double-integrator Dynamics with Communication and Input Delays Under Directed Fixed Interaction | 274 |
| 10.3.1 | Leaderless Coordination | 274 |
| 10.3.2 | Coordinated Tracking when the Leader's Velocity is Constant | 277 |
| 10.3.3 | Coordinated Tracking with Full Access to the Leader's Acceleration | 280 |
| 10.3.4 | Coordinated Tracking with Partial Access to the Leader's Acceleration | 282 |
| 10.4 | Simulation | 284 |
| 10.5 | Notes | 287 |
| | References | 291 |
| | Index | 305 |
