Table of Contents

1 Infant Industry and Incentive Structures 1
1.1 Incentive structures 3
References 4

2 Renewable Energy Technology: Market Development, Subsidy Policy and the Enlargement of Choice 7
2.1 Donor Experiences with Market Making Programs 9
2.2 Attempts at Market Making: An Illustration 9
2.2.1 Solar Photovoltaic Home Lighting Systems. 10
2.2.2 Solar Thermal Water Heating Systems 11
2.3 Quantitative Equivalence of the Two Subsidy Schemes 12
2.4 Qualitative Divergence of the Two Subsidy Schemes. 14
2.5 Choice and Inclusive Development 16
2.6 Subsidy Policy and the Range of Choices. 16
2.7 Sector, Segment and Market Neutrality 18
2.8 Inferences. 19
2.9 Annex 20
References 20

3 Economic Rents and the Power of Scarcity 23
3.1 The Indian Sugar Industry: An In-depth Case Analysis 24
3.1.1 Cogeneration in Indian Sugar Industry: Theoretical Potential and Practical Hurdles 25
3.2 Determination of Prices and Testing for Granger Causality 26
3.3 The Prisoners' Dilemma Model. 29
3.3.1 Stage 1 31
3.3.2 Stage 2 32
3.3.3 Stage 3 33
3.3.4 Stage 4 33
3.4 Exceptions to the Model—Sugar Cooperatives 34
3.5 A Model to Eliminate Reciprocal Defection 35
3.6 The Effectiveness of Product Diversification. 37

3.7 Analysis and Discussion . . . 39
3.8 Application of the Model . . . 41
3.9 Conclusions . . . 44
References . . . 46

4 Revealed Preferences and the Power of Substitutes . . . 49
4.1 The Environmental Footprint of Biofuels . . . 50
4.2 The Food v. Fuel Debate . . . 51
4.3 Indian Biofuel Scenario: A Case in Point . . . 52
4.4 An Analysis of Incentive Structures . . . 53
4.4.1 End-User Price . . . 53
4.5 Biofuel as a Substitute . . . 54
4.6 Revision of End-User Prices . . . 55
4.7 Refining Margins and Farmers' Incentive Structures . . . 56
4.8 Marginal Lands and Conversion of Forest Land . . . 57
4.9 Conclusions . . . 58
References . . . 58

5 Mapping Development Policy onto the Life-Cycle . . . 61
5.1 The Product Life Cycle . . . 62
5.2 Background and Industry Global Trends . . . 63
5.3 Projections for the Indian Solar PV Industry . . . 67
5.4 Summing Up . . . 74
5.5 Policy Support Over the Lifecycle . . . 75
5.5.1 Relevant Experiences . . . 75
5.6 Stages of the Solar Water Heater Life-Cycle . . . 76
5.7 Project vs. Policy Support . . . 78
5.8 Conclusions . . . 80
References . . . 80

6 Accounting for the Environmental Externality . . . 83
6.1 Value-Addition from Biogas . . . 84
6.2 Relevant Experiences and Matters of Concern . . . 85
6.3 Function Modeling . . . 87
6.3.1 Private Benefits and Costs from Digester Installation . . . 87
6.3.2 Benefits of Improved Health . . . 87
6.3.3 Spillover Effects and Value Creation . . . 90
6.3.4 Social Value . . . 90
6.3.5 Enterprise Value Creation . . . 91
6.3.6 Global Benefits . . . 91
6.4 Conclusion: Assignment of Benefits and Beneficiaries . . . 92
References . . . 92

7 Microfinance: Taking RE to the 'Former Poor' 95
7.1 Rural (Stand-Alone) Renewable Energy Applications and Defined Impediments 97
7.2 Microfinance and Non-Self-Liquidating Loans 98
7.3 Microfinance for Micro-Infrastructure 99
7.4 Larger Loan Sizes for RE Systems 100
7.5 Collateral Substitutes and Lowering the Costs of Intermediation 101
7.6 Regulatory Definitions and Market Facilitation 102
7.7 Promoting Eco-Efficiency 103
7.8 Conclusions and Recommendations 103
References 104

8 Epilogue: Rational Exuberance for Renewable Energy 107
8.1 Positive, Non-Distortionary Policy 108
8.2 Fitting the Solution 109
8.3 Policy to Encourage Long-Term Investments 110
8.4 Attaining 'Grid Parity' 111
References 112
