

Contents

1	Introduction	1
1.1	The Hydrogen Energy Transition.	2
1.2	Technological Barriers	3
1.3	Hydrogen Storage Technology	5
1.4	Solid State Storage	7
1.5	The Hydrogen Storage Properties of Materials	8
1.6	Hydrogen Sorption Measurement.	10
1.7	Terminology	13
1.8	Summary	15
	References	15
2	Potential Storage Materials	19
2.1	Microporous Materials	19
2.1.1	Carbons	21
2.1.2	Zeolites	24
2.1.3	Metal-Organic Frameworks	25
2.1.4	Organic Polymers	28
2.2	Interstitial Hydrides	29
2.2.1	Intermetallic Compounds	30
2.2.2	Solid Solution Alloys	34
2.2.3	Modified Binary Hydrides	35
2.2.4	Amorphous and Nanostructured Alloys	37
2.3	Complex Hydrides	40
2.3.1	Alanes	40
2.3.2	Nitrides, Amides and Imides	42
2.3.3	Borohydrides	42
2.3.4	Complex Transition Metal Hydrides	43
2.4	Other Materials	44
2.4.1	Clathrates	44
2.4.2	Ionic Liquids	46

2.4.3	The Use of Hydrogen Spillover	46
2.4.4	Organic and Inorganic Nanotubes	47
2.5	Summary	47
	References	50
3	Hydrogen Sorption Properties of Materials	61
3.1	Practical Storage Properties	61
3.1.1	Reversible Storage Capacity	62
3.1.2	Long-Term Cycling Stability	73
3.1.3	Gaseous Impurity Resistance	76
3.1.4	Ease of Activation.	79
3.2	Thermodynamic Properties	81
3.2.1	Enthalpy of Adsorption	81
3.2.2	Enthalpy of Hydride Formation or Decomposition	85
3.3	Kinetic Properties	87
3.3.1	Hydrogen Adsorption	88
3.3.2	Hydrogen Absorption	89
3.4	Isotherm Models	94
3.4.1	Supercritical Hydrogen Adsorption	94
3.4.2	Hydrogen Absorption	100
3.5	Kinetic Models	102
3.5.1	Surface Penetration	104
3.5.2	Hydrogen Diffusion.	107
3.5.3	Phase Transformation	107
3.6	Summary	108
	References	108
4	Gas Sorption Measurement Techniques	117
4.1	Volumetric Techniques.	118
4.1.1	The Manometric (Sieverts) Method	119
4.1.2	Other Volumetric Approaches	122
4.1.3	Kinetic Measurements	124
4.2	Gravimetric Techniques	124
4.2.1	The Gravimetric Method	125
4.2.2	Vacuum Microbalances	129
4.2.3	High Pressure Systems.	130
4.2.4	Other Gravimetric Approaches	132
4.3	Thermal Desorption	132
4.3.1	Thermogravimetric Analysis (TGA)	133
4.3.2	Thermal Desorption Spectroscopy	134
4.4	A Comparison of the Techniques	135
4.5	Summary	136
	References	137

5	Complementary Characterisation Techniques	141
5.1	Thermal Analysis and Calorimetry	142
5.2	Gas Adsorption	144
5.2.1	Surface Area Determination	144
5.2.2	Pore Volume Determination	146
5.2.3	Pore Size Distribution Determination	146
5.2.4	Discussion	149
5.3	Powder Diffraction	153
5.3.1	Neutrons	155
5.3.2	X-rays	158
5.3.3	Small Angle Scattering	159
5.4	Spectroscopy	161
5.4.1	Inelastic Neutron Scattering	162
5.4.2	Nuclear Magnetic Resonance	164
5.4.3	Infrared Spectroscopy	166
5.5	Other Techniques	168
5.6	Summary	169
	References	170
6	Experimental Considerations	183
6.1	Properties of Gas Phase Hydrogen	184
6.1.1	Compressibility	184
6.1.2	The Joule–Thomson Effect	195
6.1.3	Thermal Conductivity	196
6.1.4	Continuum, Transition and Free Molecule Regimes	197
6.1.5	Thermal Transpiration (Thermomolecular Flow)	198
6.1.6	Gas Purity	198
6.2	Properties of Materials	199
6.2.1	Sample Volume, Density and Mass	200
6.2.2	Air and Moisture Sensitivity	205
6.2.3	Sample History	206
6.2.4	Sample Purity	207
6.2.5	Gaseous Impurity Gettering	208
6.3	General Instrumentation Issues	210
6.3.1	Vacuum and Pressure Capability Considerations	210
6.3.2	Thermal Stability and Homogeneity	212
6.3.3	Pressure Measurement	214
6.3.4	Temperature Measurement	216
6.4	Experimental Methodology	217
6.4.1	Sample Degassing and Activation	217
6.4.2	Equilibration Times	219
6.5	Volumetric Measurement	220
6.5.1	Thermal Gradients	220
6.5.2	Sample Size to System Volume Ratio	221

6.5.3	Dead Volume Corrections	222
6.5.4	Accumulative Errors	223
6.5.5	Leakage	223
6.6	Gravimetric Measurement	224
6.6.1	Sample Size Considerations	224
6.6.2	Buoyancy Effect Corrections	225
6.6.3	Disturbance of the Balance	227
6.7	Thermal Desorption Measurement	228
6.7.1	Sample Size Considerations	228
6.7.2	Temperature Ramp Rate	229
6.7.3	Signal Calibration Method	229
6.8	Summary	230
	References	231
7	Concluding Remarks	235
7.1	Interlaboratory Studies	236
7.2	Reference Materials	240
7.3	Measurement Guidelines	243
7.3.1	Gas Supply and Instrumentation	244
7.3.2	Sample Considerations	245
7.3.3	Methodology	245
7.3.4	Data Reduction	246
7.3.5	Data Reporting	246
7.4	Future Research	248
7.5	Summary	249
	References	250
	Index	253

Hydrogen Storage Materials

The Characterisation of Their Storage Properties

Broom, D.P.

2011, XII, 260 p., Hardcover

ISBN: 978-0-85729-220-9
