

Contents

1	Introduction	1
1.1	Historical Background	1
1.2	Fuel Cell Types	8
1.3	Costs of Fuel Cells	12
1.4	Distributed Generation	13
	References	16
2	Theory	17
2.1	Thermodynamic Background	17
2.1.1	Thermal Effect of Chemical Reaction	17
2.1.2	Kirchhoff Equations	20
2.1.3	Maximum Work of Chemical Reaction	21
2.1.4	Chemical Equilibrium Constant	24
2.1.5	Van't Hoff Isotherm	25
2.1.6	The Temperature Dependence of Equilibrium Constant	25
2.1.7	Solid Oxide Fuel Cell Maximum Voltage	27
2.2	Kinetics of Chemical Reaction	28
2.2.1	Reaction Rate	29
2.2.2	Zero-Order Reactions	33
2.2.3	First-Order Reactions	34
2.2.4	Second-Order Reactions	34
2.2.5	Pseudo-First-Order Reactions	35
2.2.6	Practical Example	36
2.3	Diffusion	36
2.3.1	Fick's First Law	37
2.3.2	Fick's Second Law	37
2.3.3	Maxwell-Stefan Diffusion	38
	References	39

3	Advanced Methods in Mathematical Modeling	41
3.1	Introduction	41
3.2	Mathematical Models	43
3.3	The “Classical” Black Box Type Modelling: From The Linear ARX Models to NARMAX	47
3.4	The AI Methods: From Neural Networks to Immune Systems	49
	References	62
4	Experimental Investigation	63
4.1	Laboratory Set-Up	63
4.2	Cell Preparation Procedure	66
4.3	Fuel Type Dependence	67
4.3.1	Flow and Temperature Dependence	68
4.3.2	Diluents and Temperature Dependence	73
4.3.3	Composition and Temperature Dependence—The Case of Bio-Hydrogen Feeding	80
4.3.4	Composition and Processing Dependence—The Case of Bio-Methane Feeding	84
4.4	Oxidant Dependence	86
4.4.1	Flow and Temperature Dependence	86
5	SOFC Modeling	91
5.1	Singular Cell	94
5.1.1	Classical Approach	95
5.1.2	Advanced Approach	98
5.1.3	Artificial Neural Network Based Model	110
5.2	Fuel Cell Module	130
5.2.1	Fuel Cell Stack	132
5.2.2	(Pre-)Reformer	132
5.2.3	Anode Recycle	133
5.2.4	Heat Exchanger	140
5.2.5	Combustion Chamber	142
5.3	Fuel Cell–Gas Turbine Hybrid System	142
5.3.1	SOFC–GT Hybrid System Evaluation	144
5.3.2	Control Issues of SOFC-GT Hybrid System	154
5.3.3	Rotating Equipment	166
5.4	Triple-Generation Applications	170
5.4.1	Chillers	173
5.4.2	SOFC Based Triple-Generation System	179
5.5	Simulation of Bio-Fuels as Fuel for SOFC	180
5.5.1	Bio-Fuels	183
5.5.2	Modeling SOFC Fueled by Bio-Fuels	189
5.5.3	Economic Issues of Biofuels as Fuel for SOFC	193
	References	198

Appendix A: Thermodynamic Tables	201
Appendix B: Electrochemical Impedance Spectroscopy Experimental Data	203
Appendix C: Weight Values for ANN Models.	213
Index	215

Advanced Methods of Solid Oxide Fuel Cell Modeling

Milewski, J.; Świrski, K.; Santarelli, M.; Leone, P.

2011, XIV, 218 p., Hardcover

ISBN: 978-0-85729-261-2
